## HYDB

### iShares High Yield Systematic Bond ETF<sup>1</sup>

Expense Ratio: 0.35%  
30-Day SEC Yield: 7.30%  
Duration: 3.42 years

## Key takeaways

**Seek Income** – High yield bond ETFs can offer more income than investment grade bonds and U.S. Treasuries, while staying diversified with hundreds of individual bonds. High yield bond ETFs, such as USHY, HYG, SHYG, and HYDB can potentially boost income in portfolios.

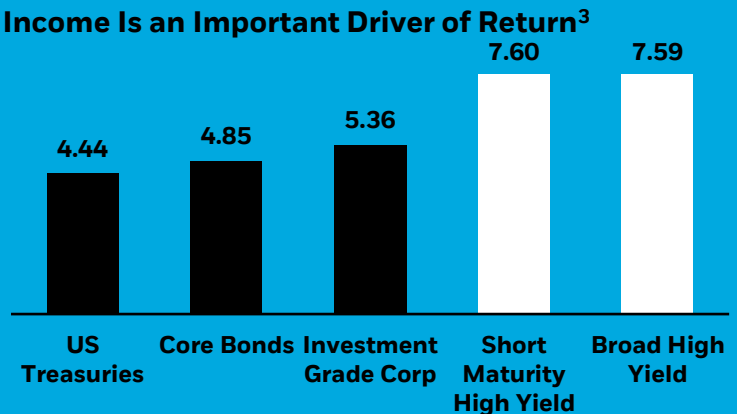

**Diversification** – Exposure to hundreds of individual bonds in a single ETF.

**Access** – Use USHY for a broad and diverse portfolio of high yield bonds, HYG for access to one of the most actively traded high yield bond ETFs globally<sup>2</sup>, SHYG to gain exposure to short-maturity high yield bonds, and HYDB to pursue income with less risk than the broad high yield bond market.

## Income Is an Important Driver of Return<sup>3</sup>

**High yield corporate bonds are currently yielding more than investment grade bonds.**

Max per issuer	2%	3%	3%	4.5%
Maturity Range	1+ years	1-15 years	0-5 years	1+ years
Price Floor	Not applicable	Not applicable	Must be higher than \$60	Must be higher than \$40

## Credit quality breakdown

Source: BlackRock as of 3/31/2024. Credit quality ratings on underlying securities of the fund are received from S&P, Moody's and Fitch and converted to the equivalent S&P major rating category. This breakdown is provided by BlackRock and takes the median rating of the three agencies when all three agencies rate a security, the lower of the two ratings if only two agencies rate a security, and one rating if that is all that is provided. Unrated securities do not necessarily indicate low quality. Below investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time.

## Standardized Performance

Fees as of Current Prospectus. All Other Data as of 3/31/2024	Fund Inception Date	Gross Expense Ratio (%)	30-Day SEC Yield (With / Without Waiver)	Contractual Fee Waiver Expiration (If Applicable)	1-Year Returns		5-Year Returns		10-Year Returns		Since Inception

Performance data represents past performance and does not guarantee future results. Investment return and principal value will fluctuate with market conditions and may be lower or higher when you sell your shares. Current performance may differ from the performance shown. For most recent month-end performance see [www.iShares.com](http://www.iShares.com).

iShares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the fund. Any applicable brokerage commissions will reduce returns. Beginning August 10, 2020, market price returns for BlackRock and iShares ETFs are calculated using the closing price and account for distributions from the fund. Prior to August 10, 2020, market price returns for BlackRock and iShares ETFs were calculated using the midpoint price and accounted for distributions from the fund. The midpoint is the average of the bid/ask prices at 4:00 PM ET (when NAV is normally determined for most ETFs). The returns shown do not represent the returns you would receive if you traded shares at other times.

**Carefully consider the Funds' investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the Funds' prospectuses and, if available, summary prospectuses, which may be obtained by visiting [www.iShares.com](http://www.iShares.com) or [www.blackrock.com](http://www.blackrock.com). Read the prospectus carefully before investing.**

**Investing involves risk, including possible loss of principal.**

Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Non-investment-grade debt securities (high-yield/junk bonds) may be subject to greater market fluctuations, risk of default or loss of income and principal than higher-rated securities. Diversification may not protect against market risk or loss of principal.
