

BlackRock CollegeAdvantage® 529 Plan

BlackRock®

The following tables present a summary of the current fees and expenses applicable for the Investment Options and the Classes of Units as of the Plan's most recent Program Description. The estimated Underlying Fund expense ratios represent estimates of the net annual operating expenses of the Underlying Fund(s) that each Investment Option bears indirectly, based on the expense ratio of the applicable Underlying Fund(s) for the most recent audited fiscal year or most recent six month unaudited period for such Underlying Fund, whichever period is more current, and in the case of each Target Date Investment Option and Target Risk Investment Option, based on projected expenses assuming a projected allocation of the Investment Option's assets among the applicable Underlying Funds. Actual expenses may be higher or lower.

Summary of fees and expenses

Class A units – Fee schedule and breakpoints

All Investment Options (except BlackRock Money Market Option)¹

Investment Amount	Initial Sales Charge (as a percentage of offering price) ²	Initial Sales Charge (as a percentage of net amount invested) ²
Less than \$25,000	3.00%	3.09%
\$25,000 or more, but less than \$100,000	2.75%	2.83%
\$100,000 or more, but less than \$250,000	2.50%	2.56%
\$250,000 or more, but less than \$500,000	2.25%	2.30%
\$500,000 or more, but less than \$750,000	2.00%	2.04%
\$750,000 or more, but less than \$1 million	1.50%	1.52%
\$1 million or more	None	None

BlackRock CollegeAdvantage 529 Plan

Want to know more?

blackrock.com

1 There is no initial sales charge on the BlackRock Money Market Option. **2** Because of rounding in the calculation of offering price and the number of shares purchased, actual sales charges you pay may be more or less than these percentages. If you invest \$1 million or more in Class A Units, you will not pay an initial sales charge. In that case, BlackRock compensates the Financial Intermediary from its own resources as described below under “ — Fees Paid by BlackRock Investment to Financial Intermediaries for Distribution.” However, if you withdraw your Units within 18 months after purchase, you may be charged a deferred sales charge of 1.00% of the lesser of the original cost of the Units being withdrawn or reallocated or the then-current market value at the time of Distribution. Investors should note that very large Contributions to the Plan, while they may qualify for breakpoint discounts, may be subject to federal gift taxation if they exceed the applicable exclusion amount. Investing involves risk, including possible loss of principal. Asset allocation models and diversification do not promise any level of performance or guarantee against loss of principal. Investment in the funds is subject to the risks of the underlying funds.

BlackRock CollegeAdvantage 529 Plan is offered to residents of all states. However, you should note that (i) depending on the laws of the state where you or your beneficiary live or pay state income taxes, favorable state tax treatment or other benefits offered by the applicable state for investing in qualified tuition programs may be available only for investments in such state’s qualified tuition program, (ii) any state-based benefit offered with respect to a particular qualified tuition program should be one of many appropriately weighted factors to consider in making an investment decision and (iii) you should consult with your financial, tax or other advisers to learn more about how state tax and state-based benefits such as financial aid, scholarship funds and protection from creditors that are only available for investments in such state’s qualified tuition program would apply to your specific circumstances and you may wish to contact your home state and your beneficiary’s home state, or any other qualified tuition program, to learn more about the features, benefits and limitations of the applicable state’s qualified tuition program.

The Ohio Tuition Trust Authority (OTTA) imposes a fee at an annualized rate of 0.02% per annum of the fair market value of the assets in your Account. OTTA may waive the assessment of all or a portion of its fee against particular categories of accounts. Additional information can be found in the Program Description.”

Investing involves risk, including possible loss of principal. The underlying funds, target date and target risk options are actively managed, and characteristics will vary. Stock and bond values fluctuate in price so the value of your investment can go down depending on market conditions. International investing involves special risks including, but not limited to, currency fluctuations, illiquidity and volatility. These risks may be heightened for investments in emerging markets. Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Non-investment-grade debt securities (high-yield/junk bonds) may be subject to greater market fluctuations, risk of default or loss of income and principal than higher-rated securities. Asset allocation strategies do not assure profit and do not protect against loss.

An investor should consider the investment objectives, risks, charges and expenses associated with municipal fund securities before investing. More information about municipal fund securities is available in the issuer’s Program Description. You may obtain a Program Description by visiting blackrock.com/529 or calling 866-529-8582. The Program Description should be read carefully before investing.

Any investment in a BlackRock CollegeAdvantage mutual fund-based investment option is not insured or guaranteed by the FDIC or any other governmental agency or other party, including the custodian/state of Ohio, the Tuition Trust, BlackRock or any of the mutual fund firms under contract with the Ohio Tuition Trust Authority.
