¹ Latest Declared Distribution is the regular monthly cash distribution. Not reflected in 3-month average UNII ending balances.

² Represents estimated Average Earned Income per share over the past three months, as of 12/31/2023

³ Distribution Coverage Ratio is calculated dividing the 3 Month Avg. Earned by the Latest Declared Distribution as of 12/31/2023

⁴ Represents an Estimate of Average Undistributed Net Investment Income balance over the past three months, as of 12/31/2023

⁵ Represents % of Total Assets represented by bank borrowings or reverse repurchase agreements outstanding, as of 12/31/2023

⁶ FRA, BGT, DSU, HYT, BLW, BHK, BIT, BTZ, and EGF (the "Funds") have adopted a level distribution plan (the "Plan") and employ a managed distribution to support a level distribution of income, capital gains and/or return of capital. The fixed amount distributed per share is subject to change at the discretion of the Fund's Board of Directors. Shareholders should not draw any conclusions about the Fund's investment performance from the amount of the Fund's current distributions or from the terms of the Plan.

The Funds may estimate that they have distributed more than their income and net realized capital gains in the current fiscal year; therefore, a portion of the distribution may be a return of capital. A return of capital may occur, for example, when some or all of a shareholder's investment is paid back to the shareholder. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with 'yield' or 'income'. When distributions exceed total return performance, the difference will reduce the Fund's net asset value per share.

Although the character of income will not be determined until the end of the fund's fiscal year, below are Fund's that have a portion of their distribution classified as return of capital fiscal year to date:

EGF's distribution fiscal year to date is comprised of 32% return of capital as of 12/31/2023

BIT's distribution fiscal year to date is comprised of 42% return of capital as of 12/31/2023

FRA's distribution fiscal year to date is comprised of 5% return of capital as of 12/31/2023

BGT's distribution fiscal year to date is comprised of 4% return of capital as of 12/31/2023

DSU's distribution fiscal year to date is comprised of 6% return of capital as of 12/31/2023

HYT's distribution fiscal year to date is comprised of 27% return of capital as of 12/31/2023

BHK's distribution fiscal year to date is comprised of 40% return of capital as of 12/31/2023

BTZ's distribution fiscal year to date is comprised of 37% return of capital as of 12/31/2023

BLW's distribution fiscal year to date is comprised of 12% return of capital as of 12/31/2023

Section 19(b) of the 1940 Act. The Fund expects that distributions under the Plan will exceed current income and capital gains and therefore will likely include a return of capital. BKT may

⁷ BlackRock Income Trust, Inc. (NYSE:BKT) and BlackRock Income Trust, Inc. (NYSE:BBN) have adopted a Plan whereby the Funds will make fixed monthly distributions to common stockholders and will distribute all available investment income to its stockholders, consistent with their investment objective and as required by the Code. If sufficient investment income is not available on a monthly basis, the Funds will distribute long-term capital gains and/or return capital to its stockholders in order to maintain a level distribution. The Fund is currently not relying on any exemptive relief from Section 19(b) of the 1940 Act. The Funds expects that distributions under the Plan will exceed current income and capital gains and therefore will likely include a return of capital.

The Funds may make additional distributions from time to time, including additional capital gain distributions at the end of the taxable year, if required to meet requirements imposed by the Code and/or the 1940 Act. **No conclusions should be drawn about the Fund's investment performance from the amount of the Fund's distributions or from the terms of the Fund's Plan.**

BKT and BBN estimates that they have distributed more than its income and net realized capital gains in the current fiscal year; therefore, a portion of the distribution may be a return of capital. A return of capital may occur, for example, when some or all of a shareholder's investment is paid back to the shareholder. A return of capital distribution does not necessarily reflect BKT and BBN's investment performance and should not be confused with 'yield' or 'income'. When distributions exceed total return performance, the difference will reduce BKT or BBN's net asset value per share.

Although the character of income will not be determined until the end of the fund's fiscal year, BKT currently estimates that its distribution fiscal year to date is comprised of 37% net investment income and 63% return of capital.

Although the character of income will not be determined until the end of the fund's fiscal year, BBN currently estimates that its distribution fiscal year to date is comprised of 77% net investment income and 23% return of capital.

BKT and BBN will send its shareholders a Form 1099-DIV for the calendar year that will illustrate how its distributions should be reported for federal income tax purposes.

[Click here to access the BlackRock Closed-End Fund Section 19 notices.](#)

Distributions and yields may be affected by: 1) changes in the portfolio as when bonds paying higher interest rates are called or mature and are replaced by bonds paying lower current interest rates and 2) in the case of leveraged funds, by changes in the variable rate paid by the fund for leverage. Current year distributions are not classified as "Income", "Short-Term Capital Gains", "Long Term Capital Gains", or "Return of Capital" until calendar year-end.

Investment return, price, yields and NAV will fluctuate with changes in market conditions. At the time of sale, your shares may have a market price that is above or below net asset value, and may be worth more or less than your original investment. Closed-end funds often trade at a discount to NAV but may trade at a premium.
