

INVESTMENT OBJECTIVE

The fund seeks to track the investment results of an index composed of global equities in the healthcare sector.

The index, the S&P Global 1200 Healthcare Sector Index™, may include large-, mid- or small-capitalisation companies and components primarily include biotechnology, healthcare, medical equipment and pharmaceuticals companies.

WHY IXJ?

- 1 Exposure to pharmaceutical, biotechnology, and medical device companies
- 2 Targeted access to healthcare stocks from around the world in a single fund
- 3 Use to express a global sector view

GROWTH OF 10,000 SINCE INCEPTION

The chart reflects the performance of a hypothetical investment in the fund of \$AUD10,000 over a specified period in time. The performance of the hypothetical investment is based on the actual past performance of the fund over the specified period.

The performance figures represent past performance of the fund. Past performance is not a reliable indicator of future performance. Fund performance figures shown are calculated after fund management fees and expenses, and assume reinvestment of distributions. Unless otherwise stated, performance figures are in Australian dollars and performance for periods greater than one year is annualised. Performance is calculated to the last business day of the month. Investment return and principal value of an investment will fluctuate so that an investor's units, when sold or redeemed, may be worth more or less than the original cost. Current performance may be higher or lower than the performance shown. An iShares ETF is not actively managed. You cannot invest directly in an index.

ADDITIONAL INFORMATION 1. Exposure Breakdowns: Allocations are subject to change. Total allocation percentages may not equal 100% due to rounding or omission of holdings of less than 1%. Geographic exposure relates principally to the domicile of the issuers of the securities held in the product. **2. Price-Earnings (P/E) Ratio:** A fundamental measure used to determine if an investment is valued appropriately. Each holding's P/E is the latest closing price divided by the latest fiscal year's earnings per share. Negative P/E ratios are excluded from this calculation. **Price-Book (P/B) Ratio:** A fundamental measure used to determine if an investment is valued appropriately. The book value of a company is a measure of how much a company's assets are worth assuming the company's debts are paid off. Each holding's P/B is the latest closing price divided by the latest fiscal year's book value per share. Negative book values are excluded from this calculation. **Distribution Yield:** Calculated in AUD by dividing the total distributions paid over a 12 month rolling period by the Fund's closing share price as of the above date. An estimated USD/AUD exchange rate may be used for the last distribution paid during the 12 month rolling period.
