What this Rating means

The **'Recommended Index'** rating indicates that Lonsec has strong conviction the financial product can generate risk adjusted returns in line with relevant objectives. The financial product is considered an appropriate entry point to this asset class or strategy.

Strengths

- BlackRock is a leading global manager of passive strategies, allowing investors to enjoy the benefits of their scale, experience, and resources.
- The Fund provides investors with an efficient means of holding a portfolio of Australian investment grade corporate bonds.
- The Fund suits investors looking to secure a more frequent income stream given its distribution policy is to pay distributions quarterly.
- The Fund is attractive from a management fee perspective when compared to its relevant ETF peer group.

Weaknesses

- The Underlying Index methodology and constituent details are the property of Bloomberg and are not readily available to non-subscribers.

Fund Risk Characteristics

	LOW	MODERATE	HIGH
BUSINESS SUSTAINABILITY RISK	●		
CAPITAL VOLATILITY		●	
SECURITY CONCENTRATION RISK		●	
SECURITY LIQUIDITY RISK		●	
CREDIT RISK		●

What is this Fund?

- iShares by BlackRock ('the Manager') has adopted a passive investment strategy in managing the iShares Core Corporate Bond ETF ('ICOR' or 'the Fund'). The Fund provides investors with exposure to the Bloomberg AusBond Credit 0+ Yr Index ('the Underlying Index') which is an Australian fixed income credit beta index. The Fund is an efficient means of gaining exposure to a diversified portfolio of Australian investment grade corporate bonds. The Underlying Index has been developed by Bloomberg ('the Index Provider').
- The Fund incorporates BlackRock's baseline screens which apply exclusionary screens to the Fund which exclude issuers involved in Controversial Weapons, Fossil Fuels, Tobacco, Civilian Weapons industries, or that have been deemed to be UN Compact Violators. Lonsec also notes that the Australian corporate bond market does not have a large representation of these industries outside of Fossil Fuels.
- The Fund's PDS, dated 25 October 2023, disclosed Annual Fees and Costs ('AFC') totaling 0.15%p.a. This value comprises management fee and costs of 0.15% p.a. Lonsec notes this fee structure is low when considering the broader passive international fixed income universe and is the lowest among its competitive peers.

Using this Fund

This is General Advice only and should be read in conjunction with the Disclaimer, Disclosure and Warning on the final page.

- Lonsec notes that the Manager has produced a Target Market Determination ('TMD') which forms part of the Responsible Entity's Design and Distribution Obligations for the Fund. Lonsec has collected the TMD that has been provided by the Manager and notes that this should be referred to for further details on the Target Market Summary, Description of the Target Market, and Review Triggers.
- The Fund is a 'long only', fixed income product and will generally sit within the defensive component of a balanced portfolio.
- Fixed income funds are useful for investors seeking yields greater than cash or cash equivalents and those prepared to accept a low to moderate level of asset price volatility.
- Global and Australian fixed income funds typically perform better during periods of declining or stable interest rates and contracting or stable credit spreads.

Suggested Lonsec risk profile suitability

SECURE	DEFENSIVE	CONSERVATIVE	BALANCED	GROWTH	HIGH GROWTH

For guidance on appropriate asset allocations and risk profiles, refer to the latest Lonsec Strategic Asset Allocation Review and Risk Profile Definitions on our website.

Changes Since Previous Lonsec Review

- In October 2023, the Fund's Net Transaction Cost reduced from 0.01% p.a. to 0% p.a. As a result, the Fund's AFC is now 0.15% p.a.
- Lonsec notes there have been no significant changes to the investment team, investment process, or risk management process since the last review.

Lonsec Opinion of this Fund

People and resources

- BlackRock is a global leader in ETFs with over 1,100 iShares ETFs listed globally. Further, BlackRock also had US\$5.95 trillion of funds under management ('FUM') invested across its suite of ETF and Index strategies as at September 2023. These funds are managed and brought to market by BlackRock, the largest asset management firm globally. BlackRock has significant scale and resources for effectively managing and structuring ETFs both in Australia and abroad and has a proven track record of successfully running index strategies.
- As the Fund aims to closely match the performance of its Underlying Index, there is considerable emphasis placed on process and automation which requires less investment staff than an actively managed process. The Fund is implemented by BlackRock's Australian Fixed Income portfolio team led by Craig Vardy, Head of Australian Fixed Income. The Fund also benefits from members of BlackRock's research team who are primarily dedicated to ongoing quantitative research, which focuses on the index methodology, the projection of index changes, and value-added trading strategies. Further, Lonsec notes that the portfolio construction is reasonably formulaic with stringent rules designed to ensure high credit quality and liquidity.
- Lonsec considers the team to be suitably experienced for this somewhat specialised style of management. Lonsec considers Vardy to be highly experienced and knowledgeable. The team currently has eight members (including Vardy) and is organised into four streams: Portfolio Management, Credit Research, Investment, and Product Strategy, and Risk Management. The Portfolio Management team consists of four additional Portfolio Managers alongside Vardy.
- The Manager utilises BlackRock's Risk and Quantitative Analysis ('RQA') team for ongoing risk monitoring and reporting for the Fund. RQA is a separate unit with its own reporting lines. Lonsec considers RQA to have access to sophisticated risk monitoring tools which aid in providing the Fund with an effective risk management framework. The team also regularly meets with members of the RQA, with this interaction playing more of a risk reporting than a compliance role. RQA members do not have the power to veto investment decisions for the Fund.

ISSUE DATE 21-12-2023

- These teams are further supported by the wider operational staff across BlackRock as well as in-house credit research analysts and traders. The team continues to collaborate globally and utilise BlackRock's global presence. Lonsec believes this adds to both efficiency and scalability.
- The Underlying Index provider is Bloomberg, which is a globally significant and deeply experienced index provider. The Bloomberg AusBond Indices and Bloomberg NZBond Indices are generally considered the leading benchmarks for the fixed interest markets of Australia and New Zealand. Bloomberg has an extensive history of compiling data across global financial markets.

Investment approach

- Lonsec considers the Underlying Index to be broadly representative of the Australian investment grade corporate bond market and an effective way to gain exposure to securities issued by corporations including Australian banks, offshore banks, other lending institutions, and property trusts as well as having a more negligible exposure to government-related agencies. The Fund invests in securities rated BBB- or higher by tier-one rating agencies. Lonsec believes the screening process and methodology used to derive the Underlying Index is logical, with implementation provided by an experienced third-party index provider in Bloomberg.
- As at November 2023 the Fund held 279 securities with key characteristics closely matching that of the Underlying Index. The Fund currently has a low sample size, due to the smaller level of FUM. Lonsec notes that such a 'sampling approach' is commonly adopted for similar passive fixed income funds. While Lonsec considers that the 'full replication' approach could better match the risk and return characteristics of the Underlying Index at the margins, Lonsec concedes that such an approach is not optimal from a cost-benefit perspective for most fixed income indices due to a lack of liquidity in some securities. Given this, Lonsec considers a sampling approach to be the most effective means of hedging a Fund's exposure to the risk profile of the Underlying Index while also minimising trading costs. However, Lonsec expects the sample size to increase over time as the Fund builds its size.
- Lonsec considers BlackRock's Aladdin risk management system to be impressive and notes that it allows stress testing for funds to be conducted in addition to the daily monitoring of the standard risk metrics for the Fund.
- Lonsec highlights that the Underlying Index will be more susceptible to changes in yield in a rising rate environment. The predominantly moderate to lower investment grade holdings position the Underlying Index to have a heightened yield to maturity. This is also in part, due to the Underlying Index comprising fixed rate bonds, as opposed to floating rate.

ESG Integration

- Lonsec's ESG integration assessment considers the rigour and structure of the ESG process for the Fund and how well it integrates into the investment process and the Manager's overall policy and reporting framework. The assessment is not intended to assess the underlying holdings of the Fund's

portfolio or the Manager's adherence to any form of impact, green/sustainable, or ethical standards.

- ESG integration for index tracking portfolios is largely limited to stewardship and engagement activities unless ESG considerations are clearly incorporated within the index. As such, for non-ESG driven indices, the ESG score provided by Lonsec is primarily an assessment of the overall ESG adoption, commitment, and policy framework implemented at the Manager level. Further, Lonsec notes that simple sector exclusions do not constitute the incorporation of ESG.
- At the corporate level Lonsec views the Manager's overall ESG policy framework and disclosure as ahead of peers. The Manager has an articulated commitment to the integration of ESG within their investment process with clear public positioning and evidence of a strong policy framework. The updated ESG policy and stewardship principles are freely available on the firm's website. The proxy voting policy and reporting on voting outcomes is stronger than peers with particular credit paid to the disclosure of voting rationale for controversial votes. The level of disclosure with respect to the Manager's engagement policies and outcomes is considered ahead of peers, particularly the firm's stewardship policies. Reporting on engagement outcomes is publicly available and the Manager is transparent about the engagement priorities, which focus on disclosure and climate change related issues.
- While the Underlying Index does not apply any filters, the Fund applies an overlay of basic filters. There is no integration of ESG factors within the index construction.

Overall

- Lonsec has maintained the Fund's 'Recommended^{Index}' rating. Lonsec considers BlackRock to be a very experienced and highly skilled passive manager with deep expertise in running similar fixed income strategies. The Fund represents a highly efficient, liquid, and cost-effective means for investors to gain passive exposure to the Australian corporate bond market, while the management fee is among the lowest relative to peers.
- Lonsec notes that the Fund does not have a substantial track record and is still smaller in size than most of its ETF peers.

People and Resources

BlackRock Inc. is a global asset management business with products that span active, enhanced, and index strategies across markets and asset classes. As at September 2023, BlackRock Inc. managed approximately US\$9.1 trillion. Products are offered in various structures including separate accounts, mutual funds, other pooled investment vehicles, and iShares ETFs. BlackRock Inc is publicly listed on the New York Stock Exchange (NYSE) and the Company has a majority of independent directors. BlackRock Investment Management (Australia) Limited ('BlackRock') is a wholly owned subsidiary of BlackRock Inc. BlackRock is the Investment Manager and Responsible Entity of the Funds. As at September 2023, BlackRock Australia had FUM of \$207.48 billion.

Size and experience

NAME	POSITION	EXPERIENCE INDUSTRY / FIRM
CRAIG VARDY	HEAD OF AUSTRALIAN FIXED INCOME	36 / 31
CAMERON GARLICK	PORTFOLIO MANAGER	32 / 22
PAVEL POSPISIL	PORTFOLIO MANAGER	22 / 20
MICHAEL PRLJACA	PORTFOLIO MANAGER	20 / 17
DMITRI LEVACHOV	PORTFOLIO MANAGER	15 / 10

As the Fund aims to closely match the performance of its Underlying Index, a considerable emphasis is placed on process and automation which requires fewer staff to maintain the portfolio than a comparable actively managed process. Notwithstanding, the portfolio management team is at a reasonable size and can leverage resources from the wider organisation in the form of credit research, risk management and investment, and product strategy.

The BlackRock Australian Fixed Income team is based in Sydney and has remained relatively stable in recent years. Craig Vardy continues to oversee the investment team for all domestic strategies. The BlackRock Australian Fixed Income team also has support in the form of a dedicated credit research analyst.

Investment Approach

Overview

BlackRock employs a passive investment strategy designed to closely track the performance of the Underlying Index before fees and expenses. The Manager uses 'stratified sampling' to achieve the risk/return characteristics of the Underlying Index. Stratified sampling is an indexing strategy involving investing in a representative sample of securities that collectively have an investment profile similar to the Underlying Index. The securities selected are expected to have aggregate investment characteristics such as duration, maturity, credit ratings, yield, and liquidity similar to the Underlying Index.

Lonsec believes that stratified sampling is the most appropriate investment strategy to track the performance of the Underlying Index as it factors in liquidity, transaction cost impact, and overall risk. Stratified sampling involves choosing a subset of index eligible securities to create a portfolio that behaves like an index. In many cases, holding every security in an index is not cost-effective as illiquid or thinly traded securities incur higher transaction costs and wider bid / ask spreads. Investing in a subset of securities that combine with matching the overall risk profile of an index, saving a fund from incurring unnecessary trading costs which can detract from total returns. A stratified sampling approach is usually accomplished by dividing the index into strata or "cells" along some of the more common fixed income security attributes such as maturity, sector, and credit quality. Securities are then chosen that have similar risk and return characteristics that replicate each of the cells and in units consistent with index exposures.

BlackRock receives price feeds, adjustments, and index constituent information from Bloomberg daily.

BlackRock will also seek to utilise an internal crossing network where possible which is derived from its large

asset base and diverse client roster. This capacity may serve to reduce the level of market executed trading and avoid brokerage costs and bid/offer spreads.

Underlying index

Lonsec notes that the Underlying Index seeks to measure the performance of the Australian investment grade corporate bond market.

Bloomberg selects debt securities that form the Underlying Index based on the following eligibility criteria:

- Have a minimum credit rating of investment grade (BBB- or above);
- If any debt securities fall below that minimum quality threshold, then these must be removed from the Underlying Index at the next rebalance date;
- Must be issued by corporate entities and denominated in Australian dollars;
- Must have at least 1 month to maturity and be governed by the law of an Australian State or Territory or the Commonwealth of Australia; and
- Must be issued in a minimum issue size of \$100 million.

The Index Provider has deemed that certain debt securities are not suitable and will be permanently excluded from the Underlying Index. These include:

- Convertible notes, zero coupon notes, private placements, collateralised debt obligations, collateralised bond obligations and collateralised fund obligations, synthetic securitisations, hybrid capital securities, and perpetual securities.

Credit quality ratings on securities are received from S&P, Moody's, and Fitch and converted to the equivalent S&P major rating category. This breakdown is provided by BlackRock and takes the median rating of the three agencies. When all three agencies rate a security, the lower two ratings are adopted whereas if only two agencies rate a security, then the lowest single rating is adopted.

The securities are weighted based on their gross market capitalisation and these proportions are rebalanced monthly.

BlackRock Baseline Screens

The Manager has developed a set of exclusionary screens to address investors' increasing desire to avoid exposure to certain companies or sectors that pose reputation risk or are not aligned with the Manager's beliefs and values. Screens applied excludes issuers involved in Controversial Weapons, Fossil Fuels, Tobacco, or Civilian Weapons industries or that have been deemed to be UN Compact Violators.

Once the constituents of the Underlying Index are established, the Manager would then incorporate these baseline screens into the Underlying Index as a separate investment process. As at November 2023, these baseline screens excluded 10 issuers from the Underlying Index, which account for less than 1.69% of the benchmark NAV. Lonsec notes this additional step is unlike the investment methodology of most passive ETFs. The Manager will review these baseline screens on an annual basis.

INDEX METRIC	DATA
INDEX PROVIDER / OWNER	BLOOMBERG
RESPONSIBILITY FOR INDEX CALCULATION	BLOOMBERG
MINIMUM ISSUE SIZE	\$100M
MATURITY	MINIMUM ONE MONTH
COUPON	FIXED COUPON ONLY WITH NO DEFERRAL OPTION
MINIMUM RATINGS	INVESTMENT GRADE ONLY (=>BBB-/BAA3)

Transparency

Lonsec notes that bond indices tend to be both less transparent and accessible to end-investors when compared with equity market indices, as are unlisted funds relative to their ETF counterparts.

Liquidity

The Fund offers investors liquidity via the ASX which is supported by dedicated market makers that are obligated to provide continuous liquidity to the market by maintaining pre-agreed spreads and volumes on the ASX.

The Fund's holdings are predominantly investment grade Australian corporate bonds. Investors should be aware that during normal market conditions there should be reasonable liquidity for these securities. However, during periods of heightened volatility and market dislocation, liquidity has the potential to deteriorate significantly.

Fees and Indirect Costs

Lonsec considers that Fund's AFC to be at the lower end when compared to Lonsec's peer group of Australian corporate credit ETFs.

Lonsec notes that the Fund's average bid / ask spread of 0.28% p.a. over the past 12 months to September 2023 is moderate relative to its closest ETF peers. The bid / ask spread for an ETF represents the average daily spread over a one-year period but may not reflect the actual spread incurred.

Fee comparison

FUND NAME	AFC (% P.A.)	AVERAGE BID/ASK SPREAD (%) P.A.)
ISHARES CORE CORPORATE BOND ETF (ICOR)	0.15	0.18
ISHARES YIELD PLUS ETF (IYLD)	0.12	0.28
VANGUARD AUSTRALIAN CORPORATE FIXED INTEREST INDEX ETF (VACF)	0.2	0.12
VANECK AUSTRALIAN CORPORATE BOND PLUS ETF (PLUS)	0.32	0.2
BETASHARES AUSTRALIAN INVESTMENT GRADE CORPORATE BOND ETF (CRED)	0.25	0.17

Source: ASX daily average bid / ask spreads over the 12 months to September 2023.

Performance

The Fund commenced in May 2020 and is still establishing a long-term track record. However, over the two-year period to October 2023, the Fund's excess returns (after fees) and tracking error were -0.38% and 0.14% respectively.

On an absolute basis, the Fund's total return (after fees) over the one-year period was 3.33% as at October 2023. Lonsec prefers to observe a Fund's performance over an investment cycle before drawing any meaningful observations on fund performance.

Risks

An investment in the Fund carries a number of standard investment risks associated with investment markets. These include economic, political, legal, tax, and regulatory risks. These and other risks are outlined in the relevant Product Disclosure Statement and should be read in full and understood by investors. Lonsec considers the major risks to be:

Tracking error risk

BlackRock seeks to minimise the tracking error against the index the Fund aims to track. There is no guarantee that this objective will be met.

Performance risk

The value of, and returns from, an investment in the Fund will depend upon the performance of the Underlying Index. There is no guarantee the value of an investment in the Fund will increase.

Interest rate risk

Changes in interest rates may have a direct impact (positive or negative) on the Fund's returns.

Credit risk

Investors are exposed to the creditworthiness of the institutions the Fund invests in.

Market-making risk

The Fund takes on counterparty risk with regard to its market-making activities. Counterparties may default on their contractual obligations, potentially exposing investors to some financial losses.
