BlackRock Fixed Income GlobalAlpha Fund (Dublin)

Fund Feature	Incorporated Disclosure
Reason for investment	Provides exposure to a fixed income absolute return strategy that combines macro, relative value and opportunistic strategies.
Investment strategy	<p>Seeks to capture high breadth of relative value opportunities along with opportunistic macro dislocations both across and within global debt sectors. The investment strategy employs a combination of fundamental and quantitative fixed income long-short strategies in the global debt markets and invests opportunistically in special situation trades. A number of proprietary methods for analysing and assessing the relative value of fixed income securities across debt markets will also be used.</p> <p>The investment strategy may be implemented via an investment in the BlackRock Fixed Income GlobalAlpha Offshore Fund Ltd (FIGA Offshore). FIGA Offshore implements its strategy through a master-feeder fund structure, via an investment in BlackRock Fixed Income GlobalAlpha Master Fund Ltd (FIGA Master).</p>
Short selling	The fund and FIGA Master may engage in short selling.
What does the fund invest in	Given their broad investment remit, security exposures of the fund, FIGA Offshore and FIGA Master (collectively the Fixed Income Funds) include the full spectrum of global fixed income securities, including high yield, emerging markets, corporate and government issued securities. Exposures may also include cash, cash equivalents* and other short-term instruments.
Location and currency denomination of assets	Given their broad investment remit, assets of the Fixed Income Funds may be denominated in any global currency and may be located in any country around the world. Currency exposures may be hedged back to USD.
Diversification guidelines & asset allocation	The Fixed Income Funds do not have formal diversification or asset allocation guidelines. Consideration and monitoring of asset diversification does, however, form an integral part of the management of each fund's investment strategy.
Use of derivatives	Given their broad investment remit, the Fixed Income Fund may use the full spectrum of derivative instruments.
Leverage	While the Fixed Income Funds do not have an explicit maximum gross leverage limit, the gross leverage of the Fixed Income Funds is expected to range between 15 to 30 times NAV.
Liquidity	The Fixed Income Funds are generally open for investor transactions on the last business day of each month. Should the need arise and under normal market conditions, it is reasonably expected that the Fixed Income Funds will be able to realise at least 80% of their assets (at the value ascribed to those assets in calculating each fund's NAV) within 10 days.

BlackRock Systematic Style Factor Fund (Aust)

Fund Feature	Incorporated Disclosure
Reason for investment	Provides exposure to a market neutral style premia strategy that seeks to capture positive returns from a range of style factor strategies across global asset classes while maintaining low correlation to broad market factors.
Investment strategy	<p>Seeks to provide investment returns by implementing a factor based quantitative investment strategy which aims to achieve absolute returns with low correlation to market movements over the longer-term. Through the application of systematic trading strategies, as implemented via the BlackRock Group's style factor strategies, the investment strategy seeks to capture a positive return linked to the persistence of structural and behavioural market anomalies.</p> <p>Through diversification across styles, the investment strategy seeks to achieve consistent returns in major asset classes including but not limited to equities, bond, currencies and commodities. At the same time the investment strategy seeks to limit downside risk by dynamically managing overall exposure during market turmoil.</p> <p>The fund accesses its investment strategy through an investment in the BlackRock Strategic Funds – Style Advantage Fund (Style LUX).</p>
Short selling	Style LUX may engage in synthetic short selling.
What does the fund invest in	The fund invests substantially all of its assets in Style LUX. Investment exposures of Style LUX include the full spectrum of asset classes on a global basis (including both developed and emerging markets) including equities, debt securities (including high yield securities), derivatives, cash and cash equivalents*, money market securities and other assets (including commodities).
Location and currency denomination of assets	Assets of the fund are generally denominated in Australian dollars and located in Australia and Luxembourg. Assets of Style LUX may be denominated in any global currency and may be located in any country around the world. While the base currency of Style LUX is U.S. Dollars, the share class into which Style invests hedges its currency exposure back to Australian dollars.
Diversification guidelines & asset allocation	The fund is managed to be fully invested in Style LUX. Style LUX does not have formal diversification or asset allocation guidelines. Consideration and monitoring of asset diversification does, however, form an integral part of the management of the investment strategy, which is intended to be flexible and will follow a risk based methodology that ensures diversification across the various style factor strategies. Risk is allocated to style factor strategies in order to achieve a broadly equal contribution, though additionally, with subsequent tilts towards strategies that provide the most attractive risk and return characteristics as well as those that demonstrate better relative performance in periods of market stress.
Use of derivatives	Style LUX may use the full spectrum of derivatives, subject to any requirements stipulated by BlackRock Strategic Fund and Luxembourg Law.
Leverage	While there is no explicit maximum level of gross leverage that the fund and Style LUX may be exposed to, the gross level of leverage is expected to range between approximately 7 to 13 times NAV.
Liquidity	The fund and Style LUX are generally open for investor transactions each business day. Should the need arise and under normal market conditions, it is reasonably expected that the fund and Style LUX will be able to realise at least 80% of their assets (at the value ascribed to those assets in calculating the fund's NAV) within 10 days.

BlackRock Fixed Income Global Opportunities Fund (Aust)

Fund Feature	Incorporated Disclosure
Reason for investment	Provides exposure to a fixed income global opportunities strategy that may include traditional core bond strategies, core plus strategies and non-traditional strategies.
Investment strategy	<p>Seeks to provide investment returns by constructing an unconstrained, diversified portfolio of global fixed income securities denominated in various currencies, issued by governments, agencies and companies worldwide. The investment strategy may also gain limited exposure to global equity markets and active currency positions.</p> <p>The investment strategy combines top-down asset allocation from lead managers with bottom-up stock and instrument picking from global sector specialists using the full breadth of the BlackRock Group's fixed income platform. The investment approach represents collaboration between the portfolio management teams, who are responsible for setting the top-down asset allocation framework for portfolio construction and the sector specialists/traders, who are responsible for bottom-up idea generation, including research, analysis, security selection and execution. The fund accesses its investment strategy through an investment in the BlackRock Global Funds - Fixed Income Global Opportunities Fund (FIGO LUX).</p>
Short selling	FIGO LUX may engage in synthetic short selling.
What does the fund invest in	The fund invests substantially all of its assets in FIGO LUX. Investment exposures of FIGO LUX include the full spectrum of global fixed income securities (including non-investment grade and emerging markets). Exposures may also include global equity markets, active currency positions, cash and cash equivalents* and other short-term instruments.
Location and currency denomination of assets	Assets of the fund are generally denominated in Australian dollars and located in Australia and Luxembourg. Assets of FIGO LUX may be denominated in any global currency and may be located in any country around the world. While the base currency of FIGO LUX is U.S. Dollars, the share class into which the fund invests hedges its currency exposure back to Australian dollars.
Diversification guidelines & asset allocation	<p>The fund is managed to be fully invested in FIGO LUX. FIGO LUX invests in a diversified portfolio of global fixed income securities, subject to the following asset allocation ranges:</p> <p>Fixed Income: 70% – 100%</p> <p>Equities: 0% – 10%</p> <p>Additionally, FIGO LUX may invest up to 30% of its total assets in financial instruments of companies or issuers of any size in any sector of the economy globally. It is expected that these assets will be predominately debt or debt like instruments. Consideration and monitoring of asset diversification forms an integral part of the management of the investment strategy.</p>
Use of derivatives	FIGO LUX may use the full spectrum of derivatives, subject to any requirements stipulated by BlackRock Global Fund and Luxembourg Law.
Leverage	While there is no explicit maximum level of gross leverage that the fund and FIGO LUX may be exposed to, the gross level of leverage is expected to be approximately 5 times NAV.
Liquidity	The fund and FIGO LUX are generally open for investor transactions each business day. Should the need arise and under normal market conditions, it is reasonably expected that the fund will be able to realise at least 80% of its assets (at the value ascribed to those assets in calculating the fund's NAV) within 10 days.
