

BRAX11

iShares IBrX-Índice Brasil (IBrX-100) Fundo de Índice

Factsheet as of 31-Mar-2024

iShares
by BLACKROCK®

The iShares IBrX-Índice Brasil (IBrX-100) Index Fund (the "Fund") is a type of fund internationally known as ETF (Exchange Traded Fund). With the same flexibility of a stock, as their quotas are purchased and sold during the opening of trading on the Stock Exchange through the broker dealer of your choice. The fund seeks to obtain returns on investments that generally correspond to the performance of the Brasil Index, before fees and expenses. The Brasil Index is a market index that measures the return on an investment in a theoretical portfolio calculated by the BM&FBOVESPA and comprised of 100 stocks selected among the most actively traded on BM&FBOVESPA.

GLOSSARY

Beta is a measure of the tendency of securities to move with the market as a whole. A beta of 1 indicates that the security's price will move with the market. A beta less than 1 indicates the security tends to be less volatile than the market, while a beta greater than 1 indicates the security is more volatile than the market.

The price to earnings ratio (P/E) is a fundamental measure used to determine if an investment is valued appropriately. Each holding's P/E is the latest closing price divided by the latest fiscal year's earnings per share. Negative P/E ratios are excluded from this calculation. For hedged funds, the underlying fund's value is shown.

The price to book (P/B) value ratio is a fundamental measure used to determine if an investment is valued appropriately. The book value of a company is a measure of how much a company's assets are worth assuming the company's debts are paid off. Each holding's P/B is the latest closing price divided by the latest fiscal year's book value per share. Negative book values are excluded from this calculation. For hedged funds, the underlying fund's value is shown.

Risk factors (i) The performance of each Fund may not reflect the performance of its index - the performance of each Fund may not fully reflect the performance of its index, since the implementation of the investment objective of each Fund is subject to a number of limitations. In addition, the risk of non-adherence to the index may be increased due to the greater flexibility in the management of the Fund's Portfolio, made possible by certain waivers of requirements granted by the CVM, Such as investment in shares in a different proportion to that of the index. (ii) There may be no net market for trading Shares - There is no way to ensure that an active trading market will be developed and the actual price levels by which the Fund Shares can be traded or batch sizes of this negotiation on BM & FBOVESPA. (iii) Shares may be traded on BM & FBOVESPA with goodwill or negative goodwill in relation to the equity value. (iv) Costs of acquisition and sale of shares - the acquisition and sale of shares involve costs. Due to such costs, negotiations may significantly reduce investment results. (v) Issuance and redemption - the issue and redemption of shares in each Fund only May be made to the Administrator through Authorized Agents in Minimum Lots of Quotas (currently 100,000 Quotas) or multiple integer thereof, Except in the event of liquidation of the Fund. Authorized Agents may join together two or more investigators to form a Minimum Lot of Shares, although these Shareholders cannot subscribe or redeem their Shares whenever they wish or when it is more favourable to do so. For further information on the risk factors involved in investing in the Fund, see the section "Risk Factors" on the Fund's website on the World Wide Web.

WHEN APPLYING RESOURCES, INVESTORS SHOULD READ THE FUND'S REGULATION CAREFULLY, PAYING SPECIAL ATTENTION TO SECTIONS RELATING TO THE FUND'S INVESTMENT OBJECTIVE AND POLICY, AS WELL AS RELATED RISK FACTORS, FEES, EXPENSES AND EXPENSES AS WELL AS OTHER INFORMATION CONTAINED ON THE FUND'S PAGE ON THE WORLD WIDE WEB.
