For the year ended December 31, 2018

Investment Objective and Strategies

The investment objective of the Fund is to provide long-term capital growth by replicating, to the extent possible, the performance of the S&P/TSX Capped Materials Index (the "Index"), net of expenses. Under normal market conditions, the Fund will primarily invest in equity securities issued by Canadian issuers participating in the materials sector. The Index is comprised of constituents of the S&P/TSX Composite Index in Global Industry Classification Standard Sector 15 – Materials. Individual constituents are capped at 25% weight.

The investment strategy of the Fund is to invest primarily in and hold the securities of the constituent issuers included in the Index in substantially the same proportion as they are reflected in the Index.

Risk

The risks of investing in the Fund are described in the prospectus. There have been no changes to the Fund over the financial period that materially affected the risk level of the Fund.

Results of Operations

The Fund's net asset value decreased from \$135.5 million at December 31, 2017 to \$104.4 million at December 31, 2018. This change in net asset value represents a decrease of \$17.9 million due to net redemptions from the Fund and a decrease of \$13.2 million due to investment operations less distributions paid.

For the year ended December 31, 2018, the Fund returned -9.84% versus the Index return of -9.29%. The main reasons for the difference in performance of -0.55% between the Fund and the Index were management fees of -0.55%.

The Fund has a distribution policy that requires it to distribute sufficient net income and net realized capital gains so that it will not be liable to pay income tax under Part I of the *Income Tax Act* (Canada). Amounts included in the calculation of net income and net realized capital gains of the Fund for a taxation year, that must be distributed in accordance with the distribution policy, sometimes include amounts that have not actually been received by the Fund.

The Fund may borrow cash in accordance with the restrictions in National Instrument 81-102 – *Investment Funds*, and, in accordance with the terms of exemptive relief, as a temporary measure to fund the portion of any distributions payable to unitholders that represents amounts that have not yet been received by the Fund. Pursuant to such relief, the borrowing may not be for a period longer than 45 days, and the Fund is limited to borrowing up to the amount of the distribution that is payable to, but has not yet been received, by the Fund and, in any event, not more than 5% of the net assets of the Fund. For the year ended December 31, 2018, the Fund did not borrow any cash.

BTC and BRAL are entitled to receive a portion of the total securities lending income earned from counterparties for their role as lending agents.

The standing instruction requires BlackRock Canada to comply with its current policy and procedures regarding securities lending and to report periodically to the IRC.

The recommendation requires BlackRock Canada to comply with its current policy and procedures regarding the selection of an affiliated sub-advisor and to report periodically to the IRC.

¹ This information is derived from the Fund's audited annual financial statements and is not a reconciliation of the beginning and ending net assets per unit. The net assets per unit presented in the financial statements is the same as the net asset value per unit calculated for Fund pricing purposes.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the year.

³ Rounded to less than \$0.01.

⁴ Distributions were paid in cash or automatically reinvested in additional units of the Fund, or both.

⁵ The tax characteristics of distributions are reported annually by the Fund to CDS Clearing and Depository Services Inc. ("CDS"). CDS makes this information available to brokers who provide it to unitholders through standard tax reporting.

⁶ This information is provided as at December 31 of the years shown.

⁷ Management expense ratio ("MER") is based on total fees and expenses (excluding commissions and other portfolio transaction costs) for the stated year, including the Fund's proportionate share of the MER, if any, of any underlying fund in which the Fund has invested, and is expressed as an annualized percentage of average daily net asset value during the year.

⁸ The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily net asset value during the stated year. Where the Fund invests in any underlying fund, the TER includes the Fund's proportionate share of the commissions of any underlying fund in which the Fund has invested.

⁹ Rounded to less than 0.01%.

¹⁰ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio manager trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

¹¹ Closing market price on the last trading day of the year as reported on the Exchange.

The indicated rates of return (a) are the historical total returns including changes in net asset value per unit, and (b) assume reinvestment of all distributions during the period in additional units at the net asset value per unit at the time of the distribution. The reinvestment of distributions increases returns. These returns do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. These returns do not indicate how the Fund will perform in the future.

The bar chart below shows the Fund's annual performance for each of the years shown and illustrates how its performance has changed from year to year.
