## Investment Objective and Strategies

The investment objective of the Fund is to replicate the performance of the price of physical gold bullion, less the Fund's fees and expenses.

The investment strategy of the Fund is to invest in long-term holdings of unencumbered gold bullion, in 100 or 400 troy ounce international bar sizes and to not speculate with regard to short-term changes in gold bullion prices.

## Risk

Effective October 27, 2023, the risk rating for the Hedged Units was updated from "Medium to High" to "Medium". The risk rating for the Non-Hedged Units of the Fund did not change over the financial period. The risks of investing in the Fund are described in the prospectus.

## Results of Operations

The Fund's net asset value increased from \$932.6 million at December 31, 2022 to \$957.7 million at December 31, 2023. This change in net asset value represents a decrease of \$81.1 million due to net redemptions from the Fund and an increase of \$106.2 million due to investment operations.

For the year ended December 31, 2023, the Fund's Hedged Units returned 12.44% and the Fund's Non-hedged Units returned 10.13%. For the same period, the London Bullion Market Association Gold Price ("LBMA Gold Price") returned 13.76% in U.S. dollar terms and 10.71% in Canadian dollar or non-hedged terms. The main reasons for the difference in performance of -1.32% between the Fund's Hedged Units and the change in the LBMA Gold Price in U.S. dollar terms were management fees (-0.50%) and other miscellaneous factors (-0.82%). The main reasons for the difference in performance of -0.58% between the Fund's Non-hedged Units and the change in LBMA Gold Price in Canadian dollar terms were management fees (-0.50%) and other miscellaneous factors (-0.08%).

The Fund has a distribution policy that requires it to distribute sufficient net income and net realized capital gains so that it will not be liable to pay income tax under Part I of the *Income Tax Act* (Canada). Amounts included in the calculation of net income and net realized capital gains of the Fund for a taxation year, that must be distributed in accordance with the distribution policy, sometimes include amounts that have not actually been received by the Fund.

The Fund may borrow cash in accordance with the restrictions in National Instrument 81-102 – *Investment Funds*. For the year ended December 31, 2023, the Fund did not borrow any cash.

<sup>(a)</sup> This information is derived from the Fund's audited annual financial statements and is not a reconciliation of the beginning and ending net assets per unit. The net assets per unit presented in the financial statements is the same as the net asset value per unit calculated for Fund pricing purposes.

<sup>(b)</sup> Rounds to less than \$0.01.

<sup>(c)</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the year.

<sup>(d)</sup> Distributions were paid in cash or automatically reinvested in additional units of the Fund, or both.

<sup>(e)</sup> The tax characteristics of distributions are reported annually by the Fund to CDS Clearing and Depository Services Inc. ("CDS"). CDS makes this information available to brokers who provide it to unitholders through standard tax reporting.

<sup>(f)</sup> This information is provided as at December 31 of the years shown.

<sup>(g)</sup> Management expense ratio ("MER") is based on total fees and expenses (excluding commissions and other portfolio transaction costs) for the stated year, including the Fund's proportionate share of the MER, if any, of any underlying fund in which the Fund has invested, and is expressed as an annualized percentage of average daily net asset value during the year.

<sup>(h)</sup> The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily net asset value during the stated year. Where the Fund invests in any underlying fund, the TER includes the Fund's proportionate share of the commissions of any underlying fund in which the Fund has invested.

<sup>(i)</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

<sup>(j)</sup> Closing market price on the last trading day of the year as reported on the Exchange.

## Management Fees

The management fees are calculated based on 0.50% per annum of the average daily net asset value of the Fund. The fees are accrued daily and are paid monthly in arrears. For the year ended December 31, 2023, the Fund accrued \$4,909,026 (excluding GST and HST in the amount of \$522,266) in management fees. ## Past Performance

The following charts show past performance for each class of the Fund. The indicated rates of return (i) are the historical total returns including changes in net asset value per unit, and (ii) assume reinvestment of all distributions during the year in additional units at the net asset value per unit at the time of the distribution. The reinvestment of distributions increases returns. These returns do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. The benchmark for performance purposes is the London Bullion Market Association Gold Fix (London Gold Fix) prior to March 20, 2015 and the LBMA Gold Price thereafter. These returns do not indicate how each class of the Fund will perform in the future.
