iShares® ETFs are managed by BlackRock Asset Management Canada Limited ("BlackRock Canada"). Commissions, trailing commissions, management fees and expenses all may be associated with investing in iShares Funds. Please read the relevant prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or operational charges or income taxes payable by any securityholder that would have reduced returns. The funds are not guaranteed, their values change frequently and past performance may not be repeated. Tax, investment and all other decisions should be made, as appropriate, only with guidance from a qualified professional.

The Hypothetical Growth of \$10,000 chart reflects a hypothetical \$10,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses, were deducted.

Unlike an actual performance record, hypothetical results do not represent actual performance and are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk. There are frequently differences, including material differences, between hypothetical performance results and the actual results subsequently achieved by any particular fund. Since trades have not actually been executed, hypothetical results cannot account for the impact of certain market risks such as lack of liquidity. There are numerous other factors related to the markets in general or the implementation of any specific investment strategy, which cannot be fully accounted for in the preparation of hypothetical results and all of which can adversely affect actual results.

Prior to July 1, 2012, the investment objective of CWO was to replicate, to the extent possible, the performance of the MSCI Emerging Markets Index. SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	BBB	MSCI ESG Quality Score (0-10)	5.62
MSCI ESG Quality Score - Peer Percentile	20.76 %	MSCI ESG % Coverage	99.65 %
Fund Lipper Global Classification	Equity Emerging Mkts Global	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	409.57
Funds in Peer Group	1,339		

All data is from MSCI ESG Fund Ratings as of **21 Mar 2024**, based on holdings as of **29 Feb 2024**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and money market funds) of the fund's gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities. If Sustainability Characteristics are not shown above, then MSCI Ratings are currently not available for this fund.

Sustainability Characteristics and Business Involvement metrics are updated monthly, subject to the availability of data. Sustainability Characteristics do not evaluate the ESG-related investment objectives of, or any ESG strategies used by, a fund and are not indicative of how well ESG factors are integrated by a fund. Providers other than MSCI ESG Research may also prepare ESG ratings or scores using their own methodologies, which may be different than the methodology used by MSCI ESG Research.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score and MSCI ESG Quality Score – Peer Percentile metrics are displayed for funds with at least 65% coverage (or 50% for bond funds and money market funds).

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.
