Important information

A moneymarket fund (MMF) is not a guaranteedinvestment vehicle. An investment in MMFs is different from an investment in deposits; the Principal invested in an MMF is capable of fluctuation and the risk of loss of the principal is to be borne by the investor.

The MMF does not rely on external support for guaranteeing the liquidity of the MMF or stabilising the NAV per share.

Risk Warnings

Investors should refer to the prospectus or offering documentation for the funds full list of risks

Capital at risk. The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

Past performance is not a reliable indicator of current or future results and should not be the sole factor of consideration when selecting a product or strategy.

Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Fluctuation may be particularly marked in the case of a higher volatility fund and the value of an investment may fall suddenly and substantially. Levels and basis of taxation may change from time to time.

20 Cash Management Information Guide | BlackRock Institutional Cash Series (ICS)

BlackRock ICS US Treasury Fund

Accumulating Share Class Risk, Concentration Risk, Counterparty Risk, Credit Risk, Short Term Money Market Funds

Description of Fund Risks

Accumulating Share Class Risk

On any day where the net return (i.e. return less costs and expenses) of the Fund is negative an Accumulating Share Class of the fund will see a decrease in the NAV per Share.

Concentration Risk

Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

Counterparty Risk

The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Credit Risk

The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Money Market Funds

Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund. Levels of credit risk are affected by longer weighted average maturity and weighted average life of the Fund.

Short Term Money Market Funds

Short Term Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund.
