

Sterling cash and short duration offering

December 2024

Capital at risk. The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

In the current market backdrop characterised by shifting interest rate dynamics and heightened market volatility, the need for investors to be thoughtful about their cash allocation is all the more important. Investors are increasingly seeking to put cash to work in various ways to meet differing liquidity, risk and return profiles.

At BlackRock, we offer investors with choice across a breadth of strategies in the cash continuum space, from money market funds for capital preservation, to short duration fixed income ETFs and active mutual funds for investors seeking to pick up additional yield with slightly higher risk.

Figure 1. Overview of cash and short duration offering

Overview of cash and short duration groups

A

Cash offering for clients whose primary objectives are preservation of capital and same day settlement or who typically invest in cash or money market instruments only. These products are typically utilised for day-to-day liquidity, operational cash, unencumbered cash or to diversify away from single counterparty exposures such as overnight exposures with a bank.

- Same day settlement
- AAA short-term money market fund (MMF) rating
- Invests in cash and cash equivalent instruments (with cash and cash equivalent reporting)

B

These products may appeal to clients comfortable relaxing capital preservation, and same day settlement requirements. The products invest in money market instruments and government/ corporate bonds. They allow investors to generally get a pick-up on their cash returns or use it for tactical allocation purposes.

- Duration tolerance: up to 0.5 year
- Spread duration tolerance: up to 1 year
- Can include cash and/or non- cash instruments (e.g. government or corporate bonds)

C

Higher yielding products for clients comfortable relaxing the maintenance of capital constraint who can tolerate higher risk. The products may be used to put cash to work, for tactical allocation purposes and also for longer term investment holdings.

- Duration tolerance: up to 4 years
- Spread duration tolerance: up to 4 years
- Typically non-cash instruments (e.g. government or corporate bonds)

Risk: There can be no guarantee that the investment strategy can be successful and the value of investments may go down as well as up.

Risk: BlackRock has not considered the suitability of any investment against your individual needs and risk tolerance. To ensure you understand whether our product is suitable, please read the Key Investor Information Document or Prospectus.

Risk: A MMF is not a guaranteed investment vehicle. An investment in MMFs is different from an investment in deposits; the principal invested in an MMF is capable of fluctuation and the risk of loss of the principal is to be borne by the investor. The MMF does not rely on external support for guaranteeing the liquidity of the MMF or stabilising the NAV per share. The BlackRock ICS Sterling Government Liquidity Fund is a Short-Term Public Debt Constant NAV (CNAV) fund. The BlackRock ICS Sterling Liquidity Fund is a Short-Term Low Volatility NAV (LVNAV) fund. The BlackRock ICS Sterling Liquid Environmentally Aware Fund (LEAF) is a Short-Term Variable NAV (Short-Term VNAV) fund. Risk Warnings

Capital at risk. The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

Past performance is not a reliable indicator of current or future results and should not be the sole factor of consideration when selecting a product or strategy.

Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Fluctuation may be particularly marked in the case of a higher volatility fund and the value of an investment may fall suddenly and substantially. Levels and basis of taxation may change from time to time.

BlackRock has not considered the suitability of this investment against your individual needs and risk tolerance. The data displayed provides summary information. Investment should be made on the basis of the relevant Prospectus which is available from the manager.

The products mentioned in this document are intended for information purposes only and do not constitute investment advice or an offer to sell or a solicitation of an offer to buy the securities described within. This document may not be distributed without authorisation from BlackRock.

Description of Fund Risks

Accumulating Share Class Risk

On any day where the net return (i.e. return less costs and expenses) of the Fund is negative an Accumulating Share Class of the fund will see a decrease in the NAV per Share.

Counterparty Risk

The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Credit Risk

The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

Credit Risk (Fixed Income)

Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.

Derivatives Risk

Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.

ESG screening risk

The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Investors should therefore make a personal ethical assessment of the benchmark index's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.

Liquidity Risk

The Fund's investments may have low liquidity which often causes the value of these investments to be less predictable. In extreme cases, the Fund may not be able to realise the investment at the latest market price or at a price considered fair.

Money Market Funds

Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund. Levels of credit risk are affected by longer weighted average maturity and weighted average life of the Fund.

Non-Investment Grade Risk

Non-investment grade fixed income securities are more sensitive to changes in interest rates and present greater 'Credit Risk' than higher rated fixed income securities.

Short Term Money Market Funds

Short Term Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund.

Credit Bail in Risk

The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. "bail-in") by relevant authorities to rescue the institution.

Counterparty and Credit Risk

Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Issuer. The insolvency of any institutions such as the custodian or sub-custodian providing services such as safekeeping of assets may expose the Issuer to financial loss.

Authorised Participant Concentration Risk

Only an Authorised Participant may request for a subscription or repurchase of Notes directly with the Issuer. As the Authorised Participants for a Series may be its only CFTA Counterparties, in the event that any CFTA Counterparty withdraws or is no longer willing to act as an Authorised Participant, until such CFTA Counterparty is replaced or a new Authorised Participant is brought on board, the Notes may trade at a discount to the Per Note Entitlement for the relevant Series

Defined Term Fund Risk

The Fund may be more concentrated in certain industries or sectors than a fund that tracks a broader index. The composition and risk and reward profile of the Fund will be different during its last year as the corporate bonds mature. The Fund may not be suitable for new investment in its final year or in the period approaching its final year.
