<sup>1</sup> Average annualized 30-day SEC yields are based on net investment income excluding distributed gains or losses for the period shown. Past performance is no guarantee of future results. Yields will fluctuate as market conditions change. <sup>2</sup> The 7-Day yield is computed in accordance with methods prescribed by the SEC. The 7-Day SEC yield excludes distributed capital gains/losses. <sup>3</sup> The fund's current yield more closely reflects the current earnings of the fund than the total net return quotations. <sup>4</sup> Weighted Average Maturity: Calculated by the final maturity for a security and the interest rate reset date held in the portfolio. This is a way to measure a fund's sensitivity to potential interest rate changes. <sup>5</sup> Weighted Average Life: Measurement of a fund's sensitivity to a deteriorating credit environment; potential credit spread changes or tightening liquidity conditions. The WAL calculation is based on a security's stated final maturity date or, when relevant, the date of the demand feature when the fund may receive payment of principal and interest.
