

BlackRock ICS US Treasury Fund - Core (Dis) Shares USD

BlackRock

Institutional Cash Series plc

December 2023 Minimum Disclosure Document

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Dec-2023. All other data as at 15-Jan-2024.

This document supplements the Key Investor Document (KIID) / Minimum Disclosure Document for South African Investors.

FUND OVERVIEW

The Fund aims to generate a moderate level of income on your investment consistent with maintaining capital and ensuring that its underlying assets can easily be bought or sold in the market (in normal market conditions). Money invested in the Fund is not protected or guaranteed. The Fund invests in a broad range of fixed income securities (such as bonds) and money market instruments (MMIs) (i.e. debt securities with short term maturities). It may also invest in deposits with credit institutions (e.g. banks). The Fund is actively managed. The investment manager has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The Secured Overnight Financing Rate (SOFR) should be used by investors to compare the performance of the Fund. The Fund is a "Short Term Public Debt Constant Net Asset Value Money Market Fund" as defined by the EU Money Market Funds Regulations. Details of the current credit ratings (if any) attributed to the Fund are available from www.blackrock.com/cash. At least 99.5% of the Fund's assets will be securities, instruments or obligations issued or guaranteed by the United States government or another sovereign government and reverse repurchase agreements referencing such assets. These assets shall always be denominated in US Dollars. They will be high quality (according to the Investment Manager's assessment of credit worthiness) at the time of purchase. The Fund will limit its investment to assets which have 397 days or less remaining until the full principal must be repaid. The weighted average maturity (i.e. the average length of time to the date when the principal of the asset is to be repaid in full (or, in respect of interest rate notes, the average length of time to the next interest rate reset to a money market rate) of all of the Fund's assets will be up to 60 days. The weighted average life (i.e. the average length of time to the date when the principal of the assets is to be repaid in full) of all of the Fund's assets will be up to 120 days. To calculate these averages, figures are adjusted to reflect the relative holdings of each of the Fund's assets. The Fund may also enter into reverse repurchase agreements on a short term basis. Through these, the Fund agrees to purchase government securities from certain eligible third parties for cash and that the seller can buy these back at an agreed time and price. The investments of this CNAV Fund are valued using the amortised cost method. The NAV may be rounded for dealing purposes. A comparative NAV is also calculated using either the mark-to-market (i.e. a valuation based on current market prices) or mark-to-model (i.e. a valuation based on a financial model) methods, to four decimal places daily. Recommendation: This Fund may not be suitable for investors who seek long-term capital growth. Your shares will be distributing shares (i.e. dividend income will be paid on the shares monthly). The share class seeks to maintain a stable net asset value per share however this is not guaranteed. Your shares will be denominated in US Dollar, the Fund's base currency. You can buy and sell your shares daily. The minimum initial investment for this share class is US\$1,000,000. For more information on the Fund, share/unit classes, valuation methodology, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com. Rated by S&P (AAAm), Moody's (Aaa-mf), and Fitch (AAAmmf). The Fund is rated by an external rating agency(ies). Such rating is solicited and financed by BlackRock.

Synthetic Risk & Reward Indicator (SRRI)

Lower Risk

Higher Risk

Potentially Lower Rewards

Potentially Higher Rewards

Key Risks: A Money Market Fund (MMF) is not a guaranteed investment vehicle. An investment in MMFs is different from an investment in deposits; the principal invested in an MMF is capable of fluctuation and the risk of loss of the principal is to be borne by the investor. The MMF does not rely on external support for guaranteeing the liquidity of the MMF or stabilising the NAV per share. This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free. The Fund is rated one due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses. Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability related or regulatory events. **Short Term Money Market Funds** do not generally experience extreme price variations. Changes in interest rates will impact the Fund. Particular risks not adequately captured by the risk indicator include: **Counterparty Risk:** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss. **Credit Risk:** The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. The Fund's distribution details are included in the ICS financial statements.

The Fund is labelled Other under the Sustainable Finance Disclosure Regulation (SFDR).

The Fund is actively managed. The investment manager has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The Secured Overnight Financing Rate (SOFR) should be used by investors to compare the performance of the Fund. On the 26 November 2021, the benchmark changed to Secured Overnight Financing Rate (SOFR). Prior to the change, the Fund benchmark was FTSE 1-Month T-Bill Index.

KEY FACTS

Umbrella : Institutional Cash Series plc

Fund Type : Constant NAV

Share Class Launch Date : 29-Sep-2008

Share Class Currency : USD

Total Fund Size (M) : 24,697.25 USD

Allocations are subject to change. Source: BlackRock

The Fund is rated by an external rating agency(ies). Such rating is solicited and financed by BlackRock

Sector exposure is calculated by aggregating the percent par of individual securities in the portfolio by security type. BlackRock uses a proprietary process to determine the security type of individual securities, by conducting a thorough analysis of the issuer/obligor, including but not limited to any support providers or enhancers. The values reported include cash, accrued income, and/or payables/receivables which may result in negative weightings from specific circumstances (including timing differences between trade and settle dates of securities purchased by the funds). Allocations are subject to change

Business Involvement

Business Involvement metrics can help investors gain a more comprehensive view of specific activities in which a fund may be exposed through its investments. Business Involvement metrics are not indicative of a fund's investment objective, and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

Business Involvement

MSCI - Controversial Weapons	0.00%	MSCI - UN Global Compact Violators	0.00%
MSCI - Nuclear Weapons	0.00%	MSCI - Thermal Coal	0.00%
MSCI - Civilian Firearms	0.00%	MSCI - Oil Sands	0.00%
MSCI - Tobacco	0.00%	Business Involvement Coverage	27.84%
Percentage of Fund not covered	72.16%		

BlackRock business involvement exposures as shown above for Thermal Coal and Oil Sands are calculated and reported for companies that generate more than 5% of revenue from thermal coal or oil sands as defined by MSCI ESG Research. For the exposure to companies that generate any revenue from thermal coal or oil sands (at a 0% revenue threshold), as defined by MSCI ESG Research, it is as follows: Thermal Coal 0.00% and for Oil Sands 0.00%. Business Involvement metrics are calculated by BlackRock using data from MSCI ESG Research which provides a profile of each company's specific business involvement. BlackRock leverages this data to provide a summed up view across holdings and translates it to a fund's market value exposure to the listed Business Involvement areas above. Business Involvement metrics are designed only to identify companies where MSCI has conducted research and identified as having involvement in the covered activity. As a result, it is possible there is additional involvement in these covered activities where MSCI does not have coverage. This information should not be used to produce comprehensive lists of companies without involvement. Business Involvement metrics are only displayed if at least 1% of the fund's gross weight includes securities covered by MSCI ESG Research.

Review the MSCI methodology behind the Business Involvement metrics: [Business Involvement Screening Research](#)

Certain information contained herein (the "Information") has been provided by MSCI ESG Research LLC, a RIA under the Investment Advisers Act of 1940, and may include data from its affiliates (including MSCI Inc. and its subsidiaries ("MSCI")), or third party suppliers (each an "Information Provider"), and it may not be reproduced or disseminated in whole or in part without prior written permission.
