A money market fund (MMF) is not a guaranteed investment vehicle. An investment in MMFs is different from an investment in deposits; the principal invested in an MMF is capable of fluctuation and the risk of loss of the principal is to be borne by the investor. An MMF does not rely on external support for guaranteeing the liquidity of the MMF or stabilising the NAV per share. The credit ratings were solicited and financed by BlackRock.

Further information about the funds, including the methods used by the MMF to value the assets of the MMF and calculate the NAV, are available at [www.blackrock.com/cash](http://www.blackrock.com/cash)
