### BlackRock ICS Sterling Government Liquidity Fund

A sub-fund of Institutional Cash Series plc

Class Premier Accumulating GBP

ISIN: IE00B43PVC83

Manager: BlackRock Asset Management Ireland Limited

## Objectives and Investment Policy

- ▶ The Fund aims to generate a moderate level of income on your investment consistent with maintaining capital and ensuring that its underlying assets can easily be bought or sold in the market (in normal market conditions). Money invested in the Fund is not protected or guaranteed.
- ▶ The Fund invests in a broad range of government fixed income securities (such as bonds) and money market instruments (MMIs) (i.e. debt securities with short term maturities) reverse repurchase agreements and in cash.
- ▶ The Fund is actively managed. The investment manager has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The Sterling Overnight Index Average Rate (SONIA) should be used by investors to compare the performance of the Fund.
- ▶ The Fund is a "Short Term Public Debt Constant Net Asset Value Money Market Fund" as defined by the EU Money Market Funds Regulations. Details of the current credit ratings (if any) attributed to the Fund are available from [www.blackrock.com/cash](http://www.blackrock.com/cash).
- ▶ At least 99.5% of the Fund's assets will be securities, instruments or obligations issued or guaranteed by the UK government or another sovereign government and reverse repurchase agreements referencing such assets and in cash. These assets shall always be denominated in Sterling.
- ▶ The Fund will limit its investment to assets which have 397 days or less remaining until the full principal must be repaid. The weighted average maturity (i.e. the average length of time to the date when the principal of the asset is to be repaid in full (or, in respect of interest rate notes, the average length of time to the next interest rate reset to a money market rate) of all of the Fund's assets will be up to 60 days. The weighted average life (i.e. the average length of time to the date when the principal of the assets is to be repaid in full) of all of the Fund's assets will be up to 120 days. To calculate these averages, figures are adjusted to reflect the relative holdings of each of the Fund's assets.
- ▶ The Fund may also enter into reverse repurchase agreements on a short term basis. Through these, the Fund agrees to purchase government securities from certain eligible third parties for cash and that the seller can buy these back at an agreed time and price.
- ▶ The investments of this CNAV Fund are valued using the amortised cost method. The NAV may be rounded for dealing purposes. A comparative NAV is also calculated using either the mark-to-market (i.e. a valuation based on current market prices) or mark-to-model (i.e. a valuation based on a financial model) methods, to four decimal places daily.
- ▶ Recommendation: This Fund may not be suitable for investors who seek long-term capital growth.
- ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is £500,000,000.

For more information on the Fund, share/unit classes, valuation methodology, risks and charges, please see the Fund's prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com).

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated one due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- Short Term Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund.
- On any day where the net return (i.e. return less costs and expenses) of the Fund is negative an Accumulating Share Class of the fund will see a decrease in the NAV per Share.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

The ongoing charge figure shown here is estimated and based on the expected annualised charges. This figure may vary from year to year. It excludes portfolio trade-related costs and any entry/exit charge paid to an underlying collective investment scheme (if any).

One-off charges taken before or after you invest

Exit Charge	None

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.10%

Charges taken from the Fund under certain conditions	
Performance Fee	None

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2010. The share class was launched in 2013.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†1 Sterling Overnight Index Average Rate (SONIA) (GBP)

Prior to 26.11.2021, the Fund used a different benchmark which is reflected in the benchmark data.
