For Investors in Switzerland. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets. The Fund seeks to gain at least 70% of its investment exposure to companies domiciled in, or exercising the main part of their business in, emerging markets. This is achieved by investing at least 70% of its total assets in equity securities (e.g. shares) and equity-related (E-R) securities and when determined appropriate, fixed income (FI) securities (such as bonds), money market instruments (MMIs) (i.e. debt securities with short-term maturities), deposits and cash. The E-R securities include financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may be investment grade (i.e. meet a specified level of credit worthiness), non-investment grade or unrated at the time of purchase.

RATINGS

CUMULATIVE & ANNUALISED PERFORMANCE

The figures shown relate to past performance. Past performance is not a reliable indicator of current or future results and should not be the sole factor of consideration when selecting a product or strategy.

Share Class and Benchmark performance displayed in USD, hedged fund benchmark performance is displayed in USD. Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation. **Source:** BlackRock

Key Risks: Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.

(Continued on page 2)

Key Risks Continued: Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund. Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment. The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events. Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
