1895 FONDS FGR

BACKGROUND

1895 Fonds FGR (the "Entity") is a Dutch collective investment scheme registered on 19 November 2019. The Entity is authorised in the Netherlands by the Netherlands Authority for the Financial Markets (the "AFM") established under the laws of the Netherlands as an Undertaking for Collective Investment in Transferable Securities (UCITS) for the purposes of the provisions of the European Communities Undertakings for Collective Investment in Transferable Securities Regulations (the "UCITS Regulations").

The Entity is an investment fund within the meaning of article 1:1 of the Act on Financial Supervision (Wet op het financieel toezicht) (the "AFS"). The Entity is structured as an umbrella fund which means that it consists of various sub-funds. The term Fund shall be deemed to mean either the Entity or the applicable sub-funds of the Entity. Each Fund is a fund for joint account (fonds voor gemene rekening) and not a legal entity which means that each Fund is a contractual arrangement between BlackRock Asset Management Ireland Limited (the "Manager") and the applicable legal titleholder of the Fund.

The assets of each Fund will be invested in accordance with the investment objectives and policies applicable to that Fund.

Further details, including the investment objectives and minimum subscription requirements, are set out in the Entity's prospectus.

Changes to the Entity during the financial year

On 22 January 2025, 1895 Euro Short Duration Obligaties Fonds sub-fund was launched.

On 10 March 2025, 1895 Speciale Projecten Obligaties Fonds sub-fund was launched.

On 10 March 2025, an updated prospectus was issued for the inclusion of the two Funds 1895 Euro Short Duration Obligaties Fonds and 1895 Speciale Projecten Obligaties Fonds, the exclusion of BNY Mellon Investment Management EMEA Limited as a Sub-Investment Manager in 1895 Aandelen Thematic Opportunities Fonds and the change in benchmarks in 1895 Euro Obligaties Index Fonds, 1895 Wereld Bedrijfsobligaties Fonds and 1895 Wereld Investment Grade Obligaties Fonds.

On 31 July 2025, an addendum to the prospectus was issued for the change of Sub-Investment Managers in 1895 Aandelen Thematic Opportunities Fonds with the resignation of Impax Asset Management Ltd and appointment of Robeco Institutional Asset Management B.V., JPMorgan Asset Management (UK) Limited and BlackRock Financial Management, Inc.

1895 FONDS FGR

INVESTMENT MANAGER'S REPORT

Investment objective

1895 Wereld Aandelen Enhanced Index Fonds

The Fund's investment objective is to seek to provide Unitholders with a total return, taking into account both capital and income returns, which reflects the return of the MSCI All Country World Index EUR (the "Benchmark Index") and to seek to invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing. The Fund seeks to achieve its investment objective by investing in a portfolio of equity securities and equity-related securities that as far as possible and practical consists of the component securities of the Benchmark Index.

1895 Wereld Multifactor Aandelen Fonds

The Fund's investment objective is to seek to provide a total return over a period of at least 5 years whilst also seeking to outperform the MSCI All Country World Index EUR (the "Performance Index") and to seek to invest in a manner consistent with the principles of ESG investing. The Fund seeks to achieve its investment objective by investing at least 80% of its total assets in equity securities and equity-related investments of companies worldwide. The Fund may also invest in other asset classes to seek to achieve its investment objective and/or for liquidity purposes. These other asset classes include fixed income securities, money market instruments, collective investment schemes, cash, or assets that can be turned into cash quickly.

1895 Euro Obligaties Index Fonds

The Fund's investment objective is to seek to provide Unitholders with a total return, taking into account both capital and income returns, which reflects the return of the Bloomberg Euro Aggregate 500MM+ Bond Index (the "Benchmark Index") and to seek to invest in a manner consistent with the principles of ESG investing. The Fund seeks to achieve its investment objective by allocating to Sustainable Investments, including but not limited to "green bonds", "sustainable bonds" and "social bonds" (each as defined by its corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively) and the investment policy of the Fund is to invest in the fixed income securities that predominantly make up the Fund's Benchmark Index. The Fund intends to use optimisation techniques in order to achieve a similar return to the Benchmark Index and it is therefore not expected that the Fund will hold each and every underlying constituent of the Benchmark Index at all times, or hold them in the same proportion as their weightings in the Benchmark Index.

1895 Wereld Bedrijfsobligaties Fonds

The Fund's investment objective is to seek to provide a total return over a period of at least 5 years whilst also seeking to outperform composite benchmark the Bloomberg Global Aggregate Corporate Index (EUR Hedged) (the "Performance Index") and seeks to invest in a manner consistent with the principles of ESG investing. The Fund seeks to achieve its investment objective by allocating to Sustainable Investments, including but not limited to "green bonds", "sustainable bonds" and "social bonds" (each as defined by its corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively) and the Fund will invest at least 80% of its total assets in fixed-income securities and fixed-income related securities of issuers worldwide. The Fund's investments will normally be listed or traded on Regulated Markets. The Fund may also invest in other fixed income securities (such as bonds issued by governments and government agencies and supranational bonds domiciled globally).

1895 Wereld Investment Grade Obligaties Fonds

The Fund's investment objective is to seek to provide a total return over a period of at least 5 years whilst also seeking to outperform a composite benchmark Bloomberg Global Aggregate ex Corporate Index (EUR Hedged) (the "Performance Index") and seeks to invest in a manner consistent with the principles of ESG investing. The Fund seeks to achieve its investment objective by allocating to Sustainable Investments, including but not limited to "green bonds", "sustainable bonds" and "social bonds" (each as defined by its corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively) and the Fund will allocating to Sustainable Investments, including but not limited to "green bonds", "sustainable bonds" and "social bonds" (each as defined by its corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively) and the Fund will invest at least 80% of its total assets in fixed-income securities and fixed-income related securities of issuers worldwide. The Fund's investments will normally be listed or traded on Regulated Markets. The Fund may also invest in other fixed income securities (such as bonds issued by governments and government agencies and supranational bonds domiciled globally).

1895 Aandelen Macro Opportunities Fonds

The Fund's investment objective is to seek to provide a total return over a period of at least 5 years whilst also seeking to outperform the MSCI All Country World Index EUR Unhedged (the "Performance Index") and seeks to invest in a manner consistent with the principles of ESG investing. The Fund seeks to achieve its investment objective by investing at least 80% of its total assets in equity securities and equity related investments of companies worldwide. The Fund may also invest in other asset classes to seek to achieve its investment objective and/or for liquidity purposes. These other asset classes include money market instruments, collective investment schemes, cash, or assets that can be turned into cash quickly.

1895 Aandelen Thematic Opportunities Fonds

The Fund's investment objective is to seek to provide a total return over a period of at least 5 years whilst also seeking to outperform the MSCI All Country World Index EUR Unhedged (the "Performance Index") and seeks to invest in a manner consistent with the principles of ESG investing. The Fund seeks to achieve its investment objective by investing at least 80% of its total assets in equity securities and equity related investments of companies worldwide. The Fund may also invest in other asset classes to seek to achieve its investment objective and/or for liquidity purposes. These other asset classes include money market instruments, collective investment schemes, cash, or assets that can be turned into cash quickly.

1895 FONDS FGR

INVESTMENT MANAGER'S REPORT (CONTINUED)

Investment objective (continued)

1895 Obligaties Opportunities Fonds

The Fund's investment objective is to seek to provide a total return over a period of at least 5 years whilst also seeking to achieve a return target exceeding the Euro Short Term Rate (the "€STR") by 3% (gross of fees) and seeks to invest in a manner consistent with the principles of ESG investing. The Fund seeks to achieve its investment objective by allocating to Sustainable Investments, including but not limited to "green bonds", "sustainable bonds" and "social bonds" (each as defined by its corresponding proprietary methodology which is guided by the International Capital Markets Association Green Bond, Sustainable Bond and Social Bond Principles, respectively) and the Fund will invest at least 80% of its total assets in fixed-income securities (i.e. bonds) and fixed-income related securities of issuers worldwide. The Fund's investments will normally be listed or traded on Regulated Markets. The Fund will invest in the full range of fixed income securities which may include investments with a relatively low credit rating or which are unrated.

1895 Euro Short Duration Obligaties Fonds

The Fund's investment objective is to seek to provide a total return over a period of at least 5 years whilst also seeking to outperform the composite benchmark comprising 30% ICE BofA ESTR Overnight Rate Index in EUR + 70% Bloomberg Barclays Euro Aggregate 1-3 Years, 500 MM Minimum Index in EUR ("Benchmark Index") and to invest in a manner consistent with the principles of ESG investing. The Fund seeks to achieve its investment objective by allocating to Sustainable Investments and will invest at least 80% of its total assets in fixed income securities (i.e. bonds) with short-term maturities issued by government and government agencies, companies and supranationals domiciled in countries inside or outside of the Eurozone as well as fixed-income related securities. The Fund's investments will normally be listed or traded on regulated markets.

1895 Speciale Projecten Obligaties Fonds

The Funds investment objective is to seek to provide a total return over a period of at least 5 years whilst also seeking to outperform the composite benchmark comprising 50% Bloomberg Global Aggregate Corporate Green Social Sustainability Bond Index - EUR Hedged + 50% Bloomberg Global Aggregate Ex-Corporate Green Social Sustainability Bond Index - EUR Hedged ("Benchmark Index") and to invest in a manner consistent with the principles of ESG investing. The Fund seeks to achieve its investment objective by allocating to Sustainable Investments, including but not limited to "green bonds", "sustainable bonds" and "social bonds" and the Fund will invest at least 80% of its total assets in fixed-income securities and fixed-income related securities of issuers worldwide. The Fund's investments will normally be listed or traded on regulated markets.

Investment management approach and environmental, social and governance ("ESG") policy

The following table outlines the investment management approach adopted for each Fund. It also identifies which Funds promote environmental or social characteristics ("Article 8 Funds") under the EU Sustainable Finance Disclosure Regulation ("SFDR"). Further detail around how Article 8 Funds have achieved these characteristics and objectives is included in the SFDR disclosures supplementary section to the Annual Report.

Fund Name	Benchmark index/Performance index	Investment management approach	SFDR criteria
1895 Wereld Aandelen Enhanced Index Fonds	MSCI All Country World Index	Index tracking - non-replicating	Article 8
1895 Wereld Multifactor Aandelen Fonds	MSCI All Country World Index	Active	Article 8

1895 Euro Short Duration Obligaties Fonds ¹	30% ICE BofA ESTR Overnight Rate Index in EUR + 70% Bloomberg Barclays Euro Aggregate 1-3 Years, 500 MM Minimum Index in EUR	Active	Article 8
1895 Speciale Projecten Obligaties Fonds ²	50% Bloomberg Global Aggregate Corporate Green Social Sustainability Bond Index - EUR Hedged + 50% Bloomberg Global Aggregate Ex-Corporate Green Social Sustainability Bond Index - EUR Hedged	Active	Article 8

¹ The Fund launched on 22 January 2025.

² The Fund launched on 10 March 2025.

1895 FONDS FGR

INVESTMENT MANAGER'S REPORT (CONTINUED)

Investment objective (continued)

Investment management approach and environmental, social and governance ("ESG") policy (continued)

Further information on the index investment strategies used is detailed below:

- For non-replicating funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The objective is to generate a return which is as close as practicable to the total return of the benchmark index net of transaction costs and gross of fees and other cost.

Performance summary, tracking difference and tracking error

The following tables compare the realised Fund performance against the relevant benchmark index/performance index for the 12 month year ended 31 October 2025. It also discloses the anticipated tracking error of the index tracking Funds (disclosed in the prospectus on an ex-ante basis) against the actual realised tracking error of the Funds as at 31 October 2025.

Further information on these performance indexes and calculation methodologies used is detailed below:

- The Fund's returns, net of fees and expenses charged directly within the relevant share class for the financial year under review is shown below. The calculation methodology is based on industry standards.
- The Fund returns are based on the net asset value ("NAV") calculated in accordance with the prospectus for the financial year under review with any dividends reinvested. Returns of less than 0.005% are rounded down to zero.
- Tracking difference measures the difference in returns between a Fund and its benchmark index.
- Each Fund's Ongoing Charges Figure ("OCF") is accrued on a daily basis throughout the financial year, which can impact the measurement of a tracking error in a positive or negative manner depending on the performance in the market and the OCF rate applied. The impact on performance measurement depends on the timing of market performance relative to the Fund's performance period. It can exceed the headline OCF in a positive market and be lower than the OCF in a negative market. The OCF expresses the sum of all fees, operating costs and expenses, with the exception of direct trading costs and performance fees, charged to each Fund's assets as a percentage of the average Fund assets based on a twelve-month period ended 31 October 2025.
- Anticipated tracking error is based on the expected volatility of differences between the returns of a Fund and the returns of its benchmark index.
- Realised tracking error is the annualised standard deviation of the difference in monthly returns between a Fund and its benchmark index. Tracking error shows the consistency of the returns relative to the benchmark index over a defined period of time. The realised tracking error is annualised and calculated using data from the preceding 36 month observation period. Where a Fund has not been trading for 36 months, the annualised tracking error since inception has been presented.

The table and the relevant footnotes also indicate the primary drivers impacting tracking difference gross of the OCF and where the realised tracking error is greater than the anticipated tracking error. Primary drivers impacting tracking difference include investment techniques. Investment techniques include cash management, trading costs from rebalancing, currency hedging, futures held and sampling techniques. Net income difference and tax may also impact tracking difference and tracking error due to withholding tax suffered by the Fund on any income received from its investments. The level and quantum of tracking difference/tracking error arising due to withholding taxes depends on various factors such as any reclaims filed on behalf of the Fund with various tax authorities, any benefits obtained by the Fund under a tax treaty. Importantly, these impacts can be either positive or negative depending on the underlying circumstances.

Index tracking funds

Fund Name	Fund return %	Benchmark index %	OCF %	Tracking difference gross of OCF %	Anticipated tracking error %	Realised tracking error %	Other tracking difference and tracking error drivers
1895 Wereld Aandelen Enhanced Index Fonds - Class D	15.25	15.36	0.05	(0.06)	Up to 1%	0.58	a, b
1895 Euro Obligaties Index Fonds - Class D	2.63	2.70	0.06	(0.01)	Up to 1%	0.17	a, b

^a The tracking difference was driven by additional ESG related requirements of the Fund relative to the benchmark.

^b The tracking difference was also driven by timing differences between the Fund and the benchmark.

Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The performance figures do not consider charges and fees that may be levied at the time of subscription or redemption of units. Levels and bases of taxation may change from time to time. Subscriptions may be made only on the basis of the current prospectus, of which the most recent annual report and audited financial statements and interim report and unaudited financial statements as well as the key information documents ("PRIIP KIIDs") form an integral part, copies of which are available from Investor Services, (see prospectus for details on how to locate your local Investor Services team), the Transfer Agent, the Manager or any of the Representatives or the Distributors.

Global economic overview

Global equities, as represented by the MSCI All Country World Index, returned 22.64% (in USD terms) during the twelve months ended 31 October 2025. Equities gained amid declining inflation (the rate of increase in the prices of goods and services), easing monetary policy from the world's largest central banks and strong corporate performance, especially in the technology sector. However, geopolitical tensions, including conflict in the Middle East and Europe as well as the introduction of protectionist trade policies in the US, raised the prospect of disruption to the global economy.

The US economy remained resilient for much of the twelve-month period, outperforming other developed nations in 2024 due to strong consumer spending. While figures for the first quarter of 2025 indicated a downturn caused by a surge in imports ahead of the expected introduction of tariffs, there was a recovery in the second quarter of the year. However, data for the third quarter of 2025 was delayed due to a US government shutdown that began in October 2025. In Japan, gross domestic product ("GDP") contracted at the start of 2025 but rose more quickly than expected in the second quarter of 2025. UK economic output was broadly flat in the second half of 2024 but rose in the first half of 2025. Eurozone GDP growth accelerated at the start of 2025 before slowing between April and September 2025.

Major emerging market economies continued to grow. Although the ongoing impact of the recent period of high interest rates presented economic challenges, the resilience of the US economy provided support. China's announcement of a new round of stimulus measures in late 2024 was received positively by investors, and Chinese GDP grew more quickly than expected in the first half of 2025 despite concerns about the impact of US tariffs. However, there were signs of slowing growth in the third quarter of 2025. The Indian economy expanded at a robust pace, recording strong growth in both the last quarter of 2024 and the first half of 2025. Growth in Brazil accelerated in early 2025, driven by rising household demand and farm output but slowed somewhat between April and June 2025.

Most of the world's largest central banks continued to loosen monetary policy in response to moderating inflation. Having reduced interest rates for the first time in over four years in September 2024, the US Federal Reserve ("the Fed") made further cuts in late 2024 and again in September and October 2025. The Bank of England ("BoE") and the European Central Bank ("ECB") continued their programmes of rate cuts over the twelve months. In a notable shift, the Bank of Japan ("BoJ") responded to rising domestic inflation by increasing interest rates twice in 2024, before doing so again at the start of 2025.

Global equity performance was positive overall during the twelve-month period, as the ongoing strength of the world economy averted concerns about a possible recession. In the US, there were concerns at the start of 2025 that the new Trump administration's introduction of tariffs on major trading partners could lead to higher inflation and slower global growth. However, America's willingness to strike a series of trade agreements helped to calm investors' fears. Major technology stocks continued to advance on hopes that artificial intelligence ("AI") would deliver significant productivity gains, but there were concerns about the scale of the infrastructure investment needed to support AI platforms.

1895 FONDS FGR

INVESTMENT MANAGER'S REPORT (CONTINUED)

Global economic overview (continued)

Globally, bonds and equities that factor in companies' environmental, social and governance ("ESG") characteristics faced regulatory concerns and shifting investor sentiment. ESG funds experienced positive inflows overall in 2024, but the picture in 2025 was more mixed, with significant outflows in both the first and third quarters of 2025.

Yields (which move inversely to bond prices) on the 10-year US Treasury, a benchmark lending rate for the global bond market, finished the twelve-month period lower. Yields rose in early 2025 due to concerns that President Donald Trump's economic policies could lead to higher inflation and increased government borrowing, but they declined towards the end of the twelve months as the Fed reduced interest rates. In the UK, gilt yields ended higher, rising sharply at the start of 2025 and remaining elevated on expectations of increased taxes and state spending. Eurozone bond yields ended higher overall, with a sharp but short lived increase in March 2025 following the German government's announcement of plans to increase borrowing to fund higher defence and infrastructure spending. Yields in Japan rose as investors anticipated further interest rate increases.

Global corporate bonds posted solid gains overall as markets reassessed credit in light of declining inflation and interest rates, while continued resilience in the global economy alleviated credit concerns among issuers of high-yield bonds.

Equities in emerging markets also gained, benefiting from the relatively stable global economic environment and the easing of monetary policy. Emerging market bonds posted positive returns as investors reacted to less restrictive monetary policy in developed economies.

Commodities markets were disrupted by rising geopolitical tensions and concerns about the impacts of US tariffs. Brent crude oil prices declined as global oil production increased, with the US and Canada making particularly large contributions to overall output. Prices fell sharply in early 2025 on fears of disruption to global trade, although attacks on Iran by the US and Israel in June 2025 caused a brief spike. Natural gas prices rose sharply at the start of 2025 as cold weather returned and investors braced for the impact of tariffs on US imports. Gold prices rose to record highs amid geopolitical concerns and fears that American trade policy could lead to ongoing volatility in equity and bond markets.

In foreign exchange markets, the US dollar's performance against other major global currencies was mixed. It fell against the euro and sterling but rose against the Japanese yen, and remained unchanged versus the Chinese yuan.

Entity performance review and activity

1895 Wereld Multifactor Aandelen Fonds

Over the financial year to 31 October 2025, the Fund's performance return was 14.67% and the active return was (0.69%), underperforming its Performance Index which returned 15.36% (active return is the difference between the Fund's return and the Performance Index).

Over the financial year, market attention was largely focused on the beginning of the second presidential term of President Donald Trump and the subsequent tariff announcements, which dominated the first part of the year and led to a sharp increase in economic and political uncertainty. While these measures remain in place, their overall impact has been partially mitigated by new trade agreements with regions such as Japan and the European Union. Discussions between the United States ("U.S.") and China were only moderately productive, contributing to heightened market volatility.

Another major theme during the financial year was the continuation of the Artificial Intelligence ("A.I.") trend, which drove strong performance in technology-related stocks (with the Nasdaq 100 up 30.95%) and saw the emergence of notable non-U.S. competitors, such as DeepSeek.

In this context, growth stocks outperformed, delivering double-digit returns (with the MSCI ACWI Growth Index up 22.51% in EUR), while value stocks lagged. Large-cap stocks outperformed small caps, the momentum factor also rallied (MSCI Momentum Index up 15.65% in Euro), and quality stocks delivered positive but relatively modest returns.

The Fund's slight underperformance was primarily due to its underexposure to large-cap and growth stocks, as well as to the momentum factor. These effects were partially offset by positive contributions from exposures to the value and quality factors. From a regional perspective, security selection within U.S. Technology detracted from performance but was partly offset by positive contributions from U.S. Financials.

During the financial year, the following were the largest contributors to and detractors from the Fund's return relative to the Performance Index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Financials [#]	1.74%	Information Technology ^o	(1.93%)
Materials ^o	0.41%	Communication Services [#]	(0.68%)
Utilities [#]	0.35%	Consumer Discretionary ^o	(0.66%)
Derivatives & Cash ^{#1}	0.32%	Consumer Staples [#]	(0.16%)
Real Estate ^o	0.04%	Health Care ^o	(0.08%)

[#] Overweight position - held more exposure than the Performance Index.

^o Underweight position - held less exposure than the Performance Index.

¹ Includes securities which do not fall within any of the sectors.

1895 FONDS FGR

INVESTMENT MANAGER'S REPORT (CONTINUED)

Entity performance review and activity (continued)

1895 Wereld Multifactor Aandelen Fonds (continued)

From a sector perspective, the Fund was negatively impacted by security selection within information technology, particularly in the software & services segment. Within communication services, media & entertainment was the main detractor, also largely due to security selection effects. In contrast, financials contributed positively, driven by an underweight position in financial services combined with favourable security selection.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the Performance Index) and underweight (held less exposure than the Performance Index), as at 31 October 2025 and 31 October 2024:

Largest overweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
Financials	1.68%	Financials	1.77%
Materials	1.23%	Industrials	0.94%
Information Technology	1.06%	Information Technology	0.72%
		Utilities	0.45%

Largest underweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
Consumer Discretionary	(1.79%)	Consumer Staples	(1.67%)
Consumer Staples	(1.61%)	Communication Services	(1.02%)
Energy	(1.60%)	Consumer Discretionary	(0.75%)
		Real Estate	(0.69%)
		Health Care	(0.45%)

Where the Fund was underweighted to a sector, the return from such sector will have an opposite effect on the Fund's active return. This may result in a sector being listed as a contributor/detractor but not listed on the Fund's condensed schedule of investment.

1895 Wereld Bedrijfsobligaties Fonds

Over the financial year to 31 October 2025, the Fund's performance return was 4.90% and the active return was 0.22%, outperforming its Performance Index which returned 4.68% (active return is the difference between the Fund's return and the Performance Index).

Over the financial year to 31 October 2025, global markets navigated a complex landscape of shifting monetary policy, fiscal challenges, trade tensions and geopolitical risks. Early in the period, volatility was fuelled by uncertainty around President Trump's agenda, tariffs announcements, and United States ("U.S.") growth prospects, while discussions on Artificial Intelligence ("A.I.") and defence spending themes gained traction. Fixed income markets saw sharp yield swings and the extra return investors expect for holding longer-term bonds (called term premium) increased. The European Central Bank ("ECB") delivered several rates cut in 2024 before pausing, while the Federal Reserve made its first cut in late 2025. Short-term bond yields stayed steady while longer-term bonds were much more volatile with investment-grade ("IG") corporate bonds offering limited extra yield because spreads were at multi-decade lows. The limited potential for strong returns reinforced investor preference for European IG corporate bonds over U.S. ones, reflecting regional differences in market conditions. In contrast, global high yield bonds offered more attractive total income potential despite experiencing similarly tight spread levels.

During the financial year, the following were the largest contributors to and detractors from the Fund's return relative to the Performance Index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Financial Institutions #	0.82%	Others *	(0.28%)
Industrial ^o	0.17%	Cash Securities #	(0.28%)
Agency #	0.15%	FX ^o	(0.26%)

Overweight position - held more exposure than the Performance Index.

^o Underweight position - held less exposure than the Performance Index.

*Includes residual contributions which do not fall within any of the Barclays' sectors, such as certain fixed income instruments

Over the financial year, the Fund's underweight positions across most industrial sectors including consumer cyclicals, communications, and energy, contributed to returns as did overweight to financials through bank and insurance debt. Overweight in government-related agency debt further added to performance. Conversely, cash securities and foreign exchange ("FX") detracted from returns.

1895 FONDS FGR

INVESTMENT MANAGER'S REPORT (CONTINUED)

Entity performance review and activity (continued)

1895 Wereld Bedrijfsobligaties Fonds (continued)

The following table details the significant active positions, where the Fund was overweight (held more exposure than the Performance Index) and underweight (held less exposure than the Performance Index), as at 31 October 2025 and 31 October 2024:

Largest overweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
Financial Institutions	9.40%	Financial Institutions	7.25%
Agency	3.08%	Agency	2.81%
Cash Securities	1.89%	Cash Securities	1.37%
Government	1.80%	Government	0.98%

Note: The Sovereign and Treasuries buckets have been netted under the Government bucket.

Largest underweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
Industrial	(12.82%)	Industrial	(8.38%)
Utility	(3.19%)	Utility	(3.14%)

Where the Fund was underweight to a sector, the return from such sector will have an opposite effect on the Fund's active return. This may result in a sector being listed as a contributor/detractor but not listed on the Fund's condensed schedule of investment.

Over the financial year, the largest overweight positions increased modestly, with financial institutions rising from 7.25% to 9.40%. Agency rose to 3.08%, while cash securities and government debt grew to 1.89% and 1.80%, respectively. On the other hand, industrials and utilities remain the largest underweight, with industrials moving from (8.38%) to (12.82%) and utilities from (3.14%) to (3.19%).

The Green bond strategy was removed from the Fund in March 2025 due to the launch of a dedicated Green, Social and Sustainable Bond Fund (1895 Speciale Projecten Obligaties Fonds) under the 1895 fund umbrella.

1895 Wereld Investment Grade Obligaties Fonds

Over the financial year to 31 October 2025, the Fund's performance return was 2.61% and the active return was 0.12%, outperforming its Performance Index which returned 2.49% (active return is the difference between the Fund's return and the Performance Index).

Over the financial year to 31 October 2025, global government bond markets saw shifting dynamics driven by macroeconomic, trade, and fiscal factors. Long-term United States ("U.S.") Treasuries faced headwinds as investors demanded higher yields to compensate for persistent budget deficits, sticky inflation, and heightened bond market volatility. U.S. tariff measures boosted demand for short-term inflation-linked bonds over Developed Market ("DM") government bonds. UK Gilts were consistently favored, while European market saw yield recalibration - France's political gridlock and Germany's looser fiscal stance pushed French 10-year yields above Spain's by the widest margin since the Euro's inception, signaling increased perceived risk in French debt.

During the financial year, the following were the largest contributors to and detractors from the Fund's return relative to the Performance Index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Government ^o	0.74%	FX ^o	(1.07%)
Financial Institutions #	0.32%	Others *	(0.22%)
Securitized #	0.27%	Cash Securities #	(0.15%)
Agency ^o	0.22%		

Overweight position - held more exposure than the Performance Index.

^o Underweight position - held less exposure than the Performance Index.

*Includes residual contributions which do not fall within any of the Barclays' sectors, such as certain fixed income instruments

Note: The Sovereign and Treasuries buckets have been netted under the Government bucket.

During the financial year, the Fund's underweight in government debt, particularly treasuries, was a major contributor to performance. Additional gains came from overweight allocations to financial institutions. Overweight in securitized assets added further value, especially through asset backed securities ("ABS"), as did underweight positions in agency debt. Conversely, foreign exchange ("FX") detracted from returns.

1895 Wereld Investment Grade Obligaties Fonds (continued)

The following table details the significant active positions, where the Fund was overweight (held more exposure than the Performance Index) and underweight (held less exposure than the Performance Index), as at 31 October 2025 and 31 October 2024:

Largest overweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
Securitized	10.76%	Securitized	6.59%
Cash Securities	5.12%	Cash Securities	3.61%
Financial Institutions	1.04%	Financial Institutions	0.48%
Local Authorities	0.67%	Government	0.46%
		Municipals	0.09%

Largest underweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
Government	(13.02%)	Government	(7.84%)
Agency	(3.42%)	Agency	(1.90%)
Supranational	(0.63%)	Supranational	(0.89%)
FX	(0.62%)	FX	(0.38%)
		Local Authorities	(0.27%)

Note: The Sovereign and Treasuries buckets have been netted under the Government bucket.

Where the Fund was underweight to a sector, the return from such sector will have an opposite effect on the Fund's active return. This may result in a sector being listed as a contributor/detractor but not listed on the Fund's condensed schedule of investment.

Over the financial year, the largest overweight positions increased notably, with securitized rising from 6.59% to 10.76%. Cash securities rose to 5.12%, while financial institutions' allocation grew to 1.04%, compared to 0.48% a year earlier. The initial underweight in local authorities was reduced and an overweight position was initiated. Municipals remained overweight, albeit to a lesser extent.

On the other hand, underweight positions deepened, particularly in government debt securities, which widened from (7.84%) to (13.02%). Agency also saw a larger underweight, moving from (1.90%) to (3.42%). Supranational and foreign exchange ("FX") remained underweight, with only minor adjustments.

The Green bond strategy was removed from the Fund in March 2025 due to the launch of a dedicated Green, Social and Sustainable Bond Fund (1895 Speciale Projecten Obligaties Fonds) under the 1895 fund umbrella.

1895 Aandelen Macro Opportunities Fonds

Over the financial year to 31 October 2025, the Fund's performance return was 12.23% and the active return was (3.13%), underperforming its Performance Index which returned 15.36% (active return is the difference between the Fund's return and the Performance Index).

The beginning of the financial year was marked by the election of President Donald Trump in November and his inauguration in January 2025. Following this event, investors' attention focused on two main themes.

The first was trade policy, as tariff announcements led to a sharp increase in economic and political uncertainty. While these measures remain in place, their overall impact has been partially mitigated by new trade agreements with regions such as Japan and the European Union. Discussions between the United States ("U.S.") and China were only moderately productive, contributing to heightened market volatility.

The second major theme was the continuation of the Artificial Intelligence ("A.I.") trend, which drove strong performance in technology-related stocks (with the Nasdaq 100 up 30.95%) and saw the emergence of significant non-U.S. competitors, such as DeepSeek. While the first half of the financial year was challenging for U.S. equities but favourable for Europe, the A.I. momentum and improving trade outlook supported markets in the second half, leading to broad-based, double-digit gains. In local currency terms, the MSCI USA rose 22%, MSCI Europe ex-UK 15.28%, MSCI Japan 27.07%, and MSCI China 33.92%.

In this context, the Fund underperformed its Performance Index, primarily due to its underweight position in U.S. equities, especially in the software & services and semi-conductors industries. The underweight in U.S. health care helped partially offset the underperformance, while positioning in Canada, United Kingdom, Ireland and China detracted. Asian markets contributed positively, with South Korea being the largest contributor, followed by Taiwan. Japanese and Hong Kong equities were also additive over the financial year. From a factor perspective, the Fund was affected by its underweight in large-cap stocks, overweight in momentum, and benefitted from its underweight in the quality factor.

1895 FONDS FGR

INVESTMENT MANAGER'S REPORT (CONTINUED)

Entity performance review and activity (continued)

1895 Aandelen Macro Opportunities Fonds (continued)

During the financial year, the following were the largest contributors to and detractors from the Fund's return relative to the Performance Index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
South Korea #	0.81%	United States Ø	(2.99%)
Taiwan #	0.65%	Canada Ø	(1.74%)
Denmark Ø	0.16%	United Kingdom #	(0.24%)
Japan #	0.13%	Ireland #	(0.20%)
Hong Kong #	0.11%	China #	(0.18%)

Overweight position - held more exposure than the Performance Index.

Ø Underweight position - held less exposure than the Performance Index.

The underweight position in U.S. equities was the main detractor from active performance, particularly due to underexposure to A.I.-related stocks such as NVIDIA, Microsoft, Palantir, and Apple. Conversely, the overweight position in South Korea helped mitigate the drawdown, supported by an overweight in the technology sector.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the Performance Index) and underweight (held less exposure than the Performance Index), as at 31 October 2025 and 31 October 2024:

Largest overweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
China	1.51%	Japan	4.48%
Korea	1.43%	India	1.96%
Taiwan	1.26%	China	1.76%
		Taiwan (Republic of China)	1.55%
		Indonesia	0.57%

Largest underweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
United States	(3.88%)	United States	(7.70%)
Canada	(1.72%)	Canada	(1.52%)
Australia	(1.06%)	Australia	(1.05%)
		Switzerland	(0.87%)
		Saudi Arabia	(0.33%)

Where the Fund was underweight to a country, the return from such country will have an opposite effect on the Fund's active return. This may result in a country being listed as a contributor/detractor but not listed on the Fund's condensed schedule of investment.

Over the financial year, the Fund gradually reduced its allocation to the cyclical sleeve while increasing exposure to European equities. In addition, starting at the end of June 2025, it raised its allocation to growth stocks and reduced exposure to quality stocks.

1895 Aandelen Thematic Opportunities Fonds

Over the financial year to 31 October 2025, the Fund's performance return was 4.82% and the active return was (10.54%), underperforming its Performance Index which returned 15.36% (active return is the difference between the Fund's return and the Performance Index).

Over the year, the Fund transitioned to a core-and-satellite approach, allowing managers to invest across multiple themes from July onwards while retaining some theme-specific satellite managers. Performance was impacted by an underweight to the United States ("U.S."), which continued to rise, with returns concentrated in information technology where security selection detracted. The underweight in financials (now reduced) and in certain "Magnificent 7" names (a group of seven large, influential technology companies: Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia, and Tesla, considered to be the dominant forces in the market due to their large market capitalizations and significant influence on major indices) within communication services and consumer discretionary also weighed on results. The Fund faced challenges from President Trump's tariffs and policy uncertainty, affecting investments in the healthy living and sustainable energy sector, while investment in robotics was flat. Healthy living was further pressured by concerns around GLP-1 drugs (a class of medications used to treat type 2 diabetes that have recently gained significant traction due to their effectiveness in promoting weight loss) and concentration in U.S. stocks. Although regional positioning was also negative, allocation within regions detracted notably due to security selection.

Performance attribution section

During the financial year, the following were the largest contributors to and detractors from the Fund's return relative to the Performance Index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Utilities ^o	0.22%	Information Technology [#]	(2.78%)
Real Estate ^o	0.10%	Financials ^o	(2.49%)
Energy ^o	0.05%	Communication Services [#]	(1.26%)
		Consumer Discretionary [#]	(1.18%)
		Health Care [#]	(1.00%)

[#] Overweight position - held more exposure than the Performance Index.

^o Underweight position - held less exposure than the Performance Index.

The main detractors were driven by security selection within information technology, as well as the historical positioning in financials (which has since been reduced), and was largely impacted by the underweight to some of the "Magnificent 7" names. Given concerns surrounding the health care sector - names driven by concerns around GLP-1 drugs, names within the healthy living theme detracted from performance as well. The Fund's main contributors were driven by their underweight to the Performance Index (i.e. energy, real estate and utilities).

The following table details the significant active positions, where the Fund was overweight (held more exposure than the Performance Index) and underweight (held less exposure than the Performance Index), as at 31 October 2025 and 31 October 2024:

Largest overweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
Information Technology	5.65%	Industrials	13.65%
Industrials	4.53%	Materials	5.67%
Health Care	1.33%	Health Care	4.36%
Cash & FX	1.11%	Derivatives & Cash ¹	3.47%
Communication Services	0.21%	Information Technology	2.77%

¹ Includes securities which do not fall within any of the sectors.

Largest underweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
Financials	(5.28%)	Financials	(15.90%)
Energy	(2.71%)	Communication Services	(7.21%)
Consumer Staples	(2.47%)	Energy	(4.06%)
Real Estate	(1.39%)	Real Estate	(2.19%)
Materials	(0.64%)	Consumer Discretionary	(1.39%)

Where the Fund was underweight to a sector, the return from such sector will have an opposite effect on the Fund's active return. This may result in a sector being listed as a contributor/detractor but not listed on the Fund's condensed schedule of investment.

1895 Obligaties Opportunities Fonds

Over the financial year to 31 October 2025, the Fund's performance return was 8.82% and the active return was 3.42%, outperforming its benchmark index which returned 5.40% (active return is the difference between the Fund's return and the benchmark index).

Throughout the financial year, global fixed income markets were influenced by monetary easing, global trade tensions and geopolitical risk. Early in the period, volatility was fuelled by uncertainty around President Trump's agenda, tariffs announcements, and United States ("U.S.") growth prospects, while discussions on Artificial Intelligence ("A.I.") and defence spending themes gained traction. Responding to accommodative central bank policy, falling rates in the middle section and the short end of the yield curve boosted the returns of treasuries and sovereign bonds. Spreads generally tightened for European and U.S. credit as well as emerging market debt, both in terms of local and hard currency, reflecting improving sentiment and rate-cut expectations, thereby further boosting the fund's performance.

1895 FONDS FGR

INVESTMENT MANAGER'S REPORT (CONTINUED)

Entity performance review and activity (continued)

1895 Obligatias Opportunities Fonds (continued)

During the financial year, the following were the largest contributors to and detractors from the Fund's return relative to the Performance Index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Government [#]	2.64%	Derivatives ^o	(0.55%)
Financial Institutions [#]	2.18%		
Technology [#]	0.46%		
Consumer Cyclical [#]	0.33%		
Agency [#]	0.29%		

[#] Overweight position - held more exposure than the Performance Index.

^o Underweight position - held less exposure than the Performance Index.

Note: The Sovereign and Treasuries buckets have been netted under the Government bucket.

The Fund's overweight positions in treasuries and sovereign securities, particularly in Argentina and South Africa, added to returns over the financial year, as did overweights in financial institutions as well as corporates in industrial sectors such as technology, consumer cyclicals and communications. Overweights in agency securities further added to returns. A slight underweight in credit default swaps detracted from active performance.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the Performance Index) and underweight (held less exposure than the Performance Index), as at 31 October 2025 and 31 October 2024:

Largest overweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
Government	38.22%	Corporates	62.29%
Financial Institutions	22.28%	Government	33.79%
Agency	4.87%		

Largest underweight positions			
31 October 2025		31 October 2024	
Sector	Weighting	Sector	Weighting
Derivatives	(0.18%)	Derivatives	(0.30%)
		FX	(0.19%)

Where the Fund was underweight to a sector, the return from such sector will have an opposite effect on the Fund's active return. This may result in a sector being listed as a contributor/detractor but not listed on the Fund's condensed schedule of investment.

Over the financial year, the Fund's general asset allocation was changed by adding positions in emerging market local currency debt funded through a reduction in high yield debt. Furthermore, allocations to green bonds and convertible bonds were reduced with the proceeds being invested into emerging market debt and high yield credit.

1895 Euro Short Duration Obligatias Fonds

Over the financial period from 22 January 2025 (Inception Date) to 31 October 2025, the Fund's performance return was 2.46% and the active return was 0.16%, outperforming its Performance Index which returned 2.30% (active return is the difference between the Fund's return and the Performance Index).

Short-term European government bonds began 2025 as a preferred alternative to United States ("U.S.") credit, offering competitive yields before fiscal expansion in defense and infrastructure spending lifted yields and signaled the European Central Bank's ("ECB") approach to the end of its rate-cut cycle. Peripheral sovereigns such as Spain, Greece and Italy offered attractive yields at points, though spreads later adjusted as growth and political stability effects faded. In parallel, short-term European investment-grade corporate bonds benefited from relatively wider spreads than U.S. credit, stable inflation expectations, and resilient corporate fundamentals. Cooling inflation and growth uncertainty reinforced their appeal as a source of quality income, with bank debt supported by strong earnings and insulation from tariff impacts. These segments offered investors a balanced mix of yield, spread advantage, and defensive positioning in a shifting monetary and fiscal environment.

1895 FONDS FGR

INVESTMENT MANAGER'S REPORT (CONTINUED)

Entity performance review and activity (continued)

1895 Euro Short Duration Obligaties Fonds (continued)

During the financial period 22 January 2025 (Inception Date) to 31 October 2025, the following were the largest contributors to and detractors from the Fund's return relative to the Performance Index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Financial Institutions #	0.63%	Cash Securities ^o	(0.67%)
Government #	0.22%	Securitized ^o	(0.17%)
Agency #	0.14%	Local Authorities #	(0.01%)
Industrial #	0.05%		

Overweight position - held more exposure than the Performance Index.

^o Underweight position - held less exposure than the Performance Index.

Note: The Sovereign and Treasuries buckets have been netted under the Government bucket.

The Fund's overweight allocations to financial institutions, especially bank debt, contributed positively to performance, as did overweight exposure to government-related agency debt. Overweight to government debt was also additive. Additional gains came from overweight allocations to industrials, particularly in consumer non-cyclicals, communication and transportation. Conversely, cash securities detracted from performance, as did the lack of exposure in securitized assets.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the Performance Index) and underweight (held less exposure than the Performance Index), as at 31 October 2025 and 30 April 2025:

Largest overweight positions			
31 October 2025		30 April 2025	
Sector	Weighting	Sector	Weighting
Financial Institutions	25.09%	Financial Institutions	24.73%
Agency	8.10%	Agency	6.54%
Government	5.66%	Government	4.40%
Industrial	1.47%	Industrial	2.29%

Largest underweight positions			
31 October 2025		30 April 2025	
Sector	Weighting	Sector	Weighting
Cash Securities	(33.12%)	Securitized	(6.76%)
Securitized	(6.73%)	Supranational	(0.46%)
Supranational	(0.76%)		

Note: The Sovereign and Treasuries buckets have been netted under the Government bucket.

Where the Fund was underweight to a sector, the return from such sector will have an opposite effect on the Fund's active return. This may result in a sector being listed as a contributor/detractor but not listed on the Fund's condensed schedule of investment.

Over the financial period, financial institutions remained the largest overweight and increased slightly from 24.73% to 25.09%. This reflects the fact that the BlackRock money market strategy invests in cash type instruments - like commercial papers and certificate of deposits - which are classified as financial institutions, while the strategy has a cash benchmark. Agency exposures rose meaningfully from 6.54% to 8.10%, and government debt allocations increased from 4.40% to 5.66%. Conversely, industrials were reduced from 2.29% to 1.47%. Cash securities became the most significant underweight at (33.12%). Securitized and supranational remained key underweight, with only minor adjustments.

1895 Speciale Projecten Obligaties Fonds

Over the financial period from 10 March 2025 (Inception Date) to 31 October 2025, the Fund's performance return was 3.13% and the active return was (0.10%), underperforming its Performance Index which returned 3.23% (active return is the difference between the Fund's return and the Performance Index).

1895 FONDS FGR

INVESTMENT MANAGER'S REPORT (CONTINUED)

Entity performance review and activity (continued)

1895 Speciale Projecten Obligaties Fonds (continued)

Over the past eight months, global fixed income markets were shaped by shifting monetary policy, geopolitical tensions, and trade policy changes. Long-term United States ("U.S.") Treasuries faced persistent headwinds from budget deficits, sticky inflation, and tariff-driven price pressures, while short-term inflation-linked bonds and UK Gilts were consistently favoured in developed markets. In Europe, yield differentials widened as political gridlock in France and looser fiscal policy in Germany contrasted with stronger fundamentals in Spain and Greece. Investment-grade ("IG") corporate spreads remained historically tight, limiting relative appeal versus sovereign debt and high yield bonds, with investors showing a preference for European IG corporates over U.S. counterparts. Within the sustainable universe, green bonds - though not marked by major market-moving events in the period - remained a core allocation for investors seeking Environmental, Social, and Governance ("ESG") integration.

During the financial period 10 March 2025 (Inception Date) to 31 October 2025, the following were the largest contributors to and detractors from the Fund's return relative to the Performance Index:

Largest contributors		Largest detractors	
Sector	Effect on Fund return	Sector	Effect on Fund return
Financial Institutions ^o	0.69%	FX ^o	(0.52%)
Agency [#]	0.14%	Cash Securities [#]	(0.24%)
Utility ^o	0.10%	Government [#]	(0.19%)
Industrial ^o	0.06%	Derivatives [#]	(0.12%)
		Securitized ^o	(0.07%)

[#] Overweight position - held more exposure than the Performance Index.

^o Underweight position - held less exposure than the Performance Index.

Note: The Sovereign and Treasuries buckets have been netted under the Government bucket.

Over the financial period, performance was supported by underweight allocations in financial institutions, notably in other financials and bank debt. Overweight exposures in government-related agency debt positively added to returns, as did an overall underweight in the utility sector. The Fund's underweight positions in Industrials added further value, particularly through energy. Conversely, foreign exchange ("FX"), cash securities, government debt, derivatives, and securitized assets all detracted from returns.

The following table details the significant active positions, where the Fund was overweight (held more exposure than the Performance Index) and underweight (held less exposure than the Performance Index), as at 31 October 2025 and 30 April 2025:

Largest overweight positions			
31 October 2025		30 April 2025	
Sector	Weighting	Sector	Weighting
Agency	2.31%	Supranational	2.40%
Supranational	2.28%	Agency	2.38%
Cash Securities	1.89%	Local Authorities	1.17%
Local Authorities	0.94%	Cash Securities	1.17%

Largest underweight positions			
31 October 2025		30 April 2025	
Sector	Weighting	Sector	Weighting
Financial Institutions	(3.15%)	Securitized	(3.20%)
Securitized	(2.97%)	Financial Institutions	(2.78%)
Utility	(0.67%)	Utility	(1.96%)
FX	(0.37%)	Industrial	(0.18%)

Where the Fund was underweight to a sector, the return from such sector will have an opposite effect on the Fund's active return. This may result in a sector being listed as a contributor/detractor but not listed on the Fund's condensed schedule of investment.

Over the financial period, the Fund's overweight in government-related agency debt and supranational remained prominent, though slightly reduced. Allocation to cash securities increased meaningfully. Local authorities, on the other hand, saw a modest reduction. Financial institutions moved deeper into underweight territory and securitized continued as the second largest underweight. Utilities increased, reducing the prior underweight, while industrial continued to be underweight.

MANAGER'S REPORT

The Manager presents their report and audited financial statements for the financial year ended 31 October 2025.

Principal Activities

1895 Fonds FGR (the "Entity") is a Dutch collective investment scheme registered on 19 November 2019. The Entity is structured as an umbrella fund which means that it consists of various Funds. The assets of each Fund will be invested in accordance with the investment objectives and policies applicable to that Fund.

As at 31 October 2025, the Entity consisted of ten Funds. A review of the performance of each Fund for the year is included in the Investment Manager's Report.

A copy of the prospectus, annual report and half yearly report in respect of 1895 Fonds FGR shall be available, on an ongoing basis, at the following website:

<https://www.blackrock.com/nl/particuliere-beleggers/produkten/blackrock-1895-funds>

Results and dividends

The results and dividends for the financial year of the Entity are set out in the statement of comprehensive income. Details of the financial situation of the Funds at the year end are set out in the statement of financial position.

Review of business and future developments

The specific investment objectives and policies of each Fund are formulated by the Directors of the Manager at the time of the creation of the Fund. Investors in a Fund are expected to be informed investors who have taken professional advice, are able to bear capital and income risk, and should view investment in a Fund as a medium to long term investment. A description of the Fund, its performance review and a market review can be found in the Background section and the Investment Manager's report. The performance review encompasses tracking error and tracking difference disclosures which are key metrics as to how well the Fund has been managed against their benchmark indices.

Risk management objectives and policies

The financial instruments and risks facing the Entity are set out in the notes to the financial statements.

Main Risks*	Risk Appetite	Impact during the year	Risk Management/Internal Control
Market Risk			
1895 Wereld Aandelen Enhanced Index Fonds	Medium	Results of operations for the year are disclosed in the Statement of Comprehensive Income.	Actively monitored as part of the risk management and compliance framework and items of escalation reported as necessary.

*A definition of the above risks are included within note 3. The risk management framework is also disclosed within note 3.1. The Value at Risk (VaR) as disclosed in note 3.2 encapsulates adverse risk scenarios for the Funds.

1895 FONDS FGR

MANAGER'S REPORT (CONTINUED)

Subsequent events after the financial year end

The significant events which have occurred since the statement of financial position date are set out in the notes to the audited financial statements.

Administrative Organisation and Internal Controls

The Manager has documented the administrative organisation and internal controls in accordance with the Act on Financial Supervision (Wetop het financieel toezicht) (the "AFS") and the Decree on Conduct of Business of Financial Institutions AFS (Besluit Gedragstoezicht financiële ondernemingen Wft) ("BGfo"). During the year we have reviewed the various aspects of the Entity's operations. Our work did not find anything that would lead us to conclude that the administrative organisation and the system of internal controls as referenced in article 121 of the BGfo do not satisfy the requirements as laid down in the BGfo and related regulations. Furthermore, we did not find that the administrative organisation and internal controls are ineffective or that they do not operate in accordance with their description.

Based on the above, we declare as Manager of the Entity, that we are in possession of a description of the administrative organisation and internal controls in accordance with article 121 of the BGfo which fulfils the requirements of the BGfo. We also state with a reasonable degree of certainty that the administrative organisation and the system of internal controls were effective and operated in accordance with their description during the year.

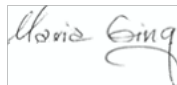

Report on remuneration

Disclosures in respect of the remuneration policies of the BlackRock group ("BlackRock"), as they apply to BlackRock Asset Management Ireland Limited (the "Manager") are included in the Report on Remuneration in the additional information and regulatory disclosures (unaudited). There have been no significant changes to the remuneration policies between the date of the Report on Remuneration (31 December 2024) and 31 October 2025.

On behalf of the Manager

DEPOSITARY'S REPORT TO THE UNITHOLDERS

Considering that

- The Bank of New York Mellon SA/NV, Amsterdam branch ("the depositary") is appointed to act as depositary of 1895 Wereld Aandelen Enhanced Index Fonds, 1895 Wereld Multifactor Aandelen Fonds, 1895 Euro Obligaties Index Fonds, 1895 Wereld Bedrijfsobligaties Fonds, 1895 Wereld Investment Grade Obligaties Fonds, 1895 Aandelen Macro Opportunities Fonds, 1895 Aandelen Thematic Opportunities Fonds, 1895 Obligaties Opportunities Fonds, 1895 Euro Short Duration Obligaties Fonds and 1895 Speciale Projecten Obligaties Fonds ("the funds") in accordance with Chapter 4 of the Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 (the "UCITS Directive");
- Such appointment and the mutual rights and obligations of the fund manager and the depositary of the fund have been agreed upon in the depositary agreement dated 8 November 2019 between such parties, including the schedules to that agreement (the "depositary agreement");
- The depositary issues this statement exclusively to the fund manager in relation to the activities of the fund manager and relates to the year ended 31 October 2025, ("the year").

Responsibilities of the depositary

The depositary acts as a depositary within the meaning of the UCITS Directive and provides its services in accordance with the UCITS Directive, the EU implementing regulation, applicable Dutch laws and regulations and the guidelines issued by the European Securities and Markets Authority and the Dutch Financial Markets Authority (the "regulations"). The responsibilities of the depositary have been described in the depositary agreement and include, in addition to the safekeeping, recordkeeping and ownership verification tasks, the following monitoring and oversight activities (which the depositary inherently performs):

- Monitoring of cash flows, including the identification of significant and inconsistent cash flows and the reconciliation of cash flows with the fund administration;
- Ensure that the sale, issue, repurchase, redemption and cancellation of units effected on behalf of a common fund or by a management company are carried out in accordance with the applicable national law and the fund rules;
- Ensure that the value of units is calculated in accordance with the applicable national law and the fund rules;
- Carry out the instructions of the management company, unless they conflict with the applicable national law or the fund rules;
- Ensure that in transactions involving a common fund's assets any consideration is remitted to it within the usual time limits;
- Ensure that a common fund's income is applied in accordance with the applicable national law and the fund rules.

Statement of the Depositary

The depositary has carried out such activities during the year as considered necessary to fulfil its responsibilities as depositary of the fund. The depositary is of the opinion that, based on the information made available and the explanations provided by the fund manager, in all material respects, the fund manager has carried out its activities which are in scope of the monitoring and oversight duties of the depositary, in accordance with the regulations and the fund documentation.

Miscellaneous

This statement does not create, and is not intended to create, any right for a person or an entity who are not a party to the depositary agreement.

Amsterdam, 20 January 2026

1011 101, head of Netherlands Trust and Depositary
The Bank of New York Mellon SA/NV, Amsterdam Branch

1895 FONDS FGR

OTHER INFORMATION PURSUANT TO PART 9 OF BOOK 2 OF THE DUTCH CIVIL CODE

Appropriation of results

As described in the Entity's prospectus, the terms and conditions empowers the Manager to declare dividends in respect of any Units out of net income (including dividend and interest income) and the excess of realised and unrealised capital gains over realised and unrealised losses in respect of investments of the Fund.

The Manager intends to declare dividends on the Units of the Distributing Unit Classes of the relevant Sub-Funds out of net income (including dividend and interest income). The Manager will distribute capital gains if so required by applicable Dutch law and practice.

Any dividend which is unclaimed for six years or more from the date of its declaration shall, at the discretion of the Manager, be forfeited and shall become the property of the relevant Fund.

Distributing Unit Classes distribute semi-annually. Semi-annual dividends will normally be declared in November and May and/or such other times as the Manager deems appropriate with a view to the same being paid in December and June. Dividends will be paid by way of electronic transfer to the bank account detailed on the Application Form or as subsequently notified to the Manager in writing.

Unitholders will receive dividends in proportion to the number of Units held by them in the relevant Unit Class.

Directors' interests

In accordance with article 122 paragraph 2 of the Decree on Conduct of Business of Financial Institutions AFS (Besluit Gedragstoezicht financiële ondernemingen Wft), the Entity is required to list the total holdings in securities held by the Directors of the Manager in investments which are also held by the Funds as of the year end.

Independent auditor's report

To: the unitholders and the manager of the Sub-Funds of 1895 Fonds FGR

Report on the audit of the financial statements for the financial year ended 31 October 2025 included in the annual report

Our opinion

We have audited the financial statements for the financial year ended 31 October 2025 of the Sub-Funds of 1895 Fonds FGR established under the laws of The Netherlands (hereinafter: the Sub-Funds):

- 1895 Wereld Aandelen Enhanced Index Fonds
- 1895 Wereld Multifactor Aandelen Fonds
- 1895 Euro Obligaties Index Fonds
- 1895 Wereld Bedrijfsobligaties Fonds
- 1895 Wereld Investment Grade Obligaties Fonds
- 1895 Aandelen Macro Opportunities Fonds
- 1895 Aandelen Thematic Opportunities Fonds
- 1895 Obligaties Opportunities Fonds
- 1895 Euro Short Duration Obligaties Fonds
- 1895 Speciale Projecten Obligaties Fonds

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Sub-Funds as at 31 October 2025 and of the result and the cash flows of the Sub-Funds for the financial year ended 31 October 2025 in accordance with IFRS Accounting Standards as adopted by the European Union (IFRS Accounting Standards) and with Part 9 of Book 2 of the Dutch Civil Code.

The financial statements comprise:

- The statement of financial position as at 31 October 2025
- The following statements for the financial year ended 31 October 2025: the statements of comprehensive income, changes in net assets attributable to redeemable unitholders and cash flows
- The notes comprising a summary of the significant accounting policies and other explanatory information

Basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. Our responsibilities under those standards are further described in the Our responsibilities for the audit of the financial statements section of our report.

We are independent of the Sub-Funds in accordance with the Wet toezicht accountantsorganisaties (Wta, Audit firms supervision act), the Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence regulations in the Netherlands. Furthermore we have complied with the Verordening gedrags- en beroepsregels accountants (VGBA, Dutch Code of Ethics for professional accountants).

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information in support of our opinion

We designed our audit procedures in the context of our audit of the financial statements as a whole and in forming our opinion thereon. The following information in support of our opinion and any findings were addressed in this context, and we do not provide a separate opinion or conclusion on these matters.

Our focus on fraud and non-compliance with laws and regulations

Our responsibility

Although we are not responsible for preventing fraud or non-compliance and we cannot be expected to detect non-compliance with all laws and regulations, it is our responsibility to obtain reasonable assurance that the financial statements, taken as a whole, are free from material misstatement, whether caused by fraud or error.

Our audit response related to fraud risks

We identified and assessed the risks of material misstatements of the financial statements due to fraud. During our audit we obtained an understanding of the Sub-Funds and their environment and the components of the system of internal control, including the risk assessment process and the manager's process for responding to the risks of fraud and monitoring the system of internal controls, as well as the outcomes. We refer to the Risk management objectives and policies section of the manager's report, in which the manager has included its (fraud) risk assessment.

We evaluated the design and relevant aspects of the system of internal control and in particular the fraud risk assessment as well as the code of conduct. We evaluated the design and the implementation of internal controls designed to mitigate fraud risks.

As part of our process of identifying fraud risks, we evaluated fraud risk factors with respect to financial reporting fraud, misappropriation of assets and bribery and corruption. We evaluated whether these factors indicate that a risk of material misstatement due to fraud is present.

We incorporated elements of unpredictability in our audit. We also considered the outcome of our other audit procedures and evaluated whether any findings were indicative of fraud or non-compliance.

We addressed the risks related to management override of controls, as this risk is present in all entities. For these risks we have performed procedures among other things to evaluate key accounting estimates for management bias that may represent a risk of material misstatement due to fraud, in particular relating to important judgment areas and significant accounting estimates as disclosed in Note 2.4 to the financial statements. We have also used data analysis to identify and address high-risk entries and evaluated the business rationale (or the lack thereof) of significant extraordinary transactions, including those with related parties.

Specifically for the risk related to overstatement of the management fee charged by the manager, we recalculated the management fee charged to the Sub-Funds with the stipulations as defined in the prospectus and the contracts with the Investment manager and Sub-Investment managers.

We did not identify a risk of fraud in revenue recognition, other than the risks related to management override of controls.

We considered available information and made enquiries of relevant executives, legal department, and the compliance officer.

Our audit response related to risks of non-compliance with laws and regulations

We performed appropriate audit procedures regarding compliance with the provisions of those laws and regulations that have a direct effect on the determination of material amounts and disclosures in the financial statements. Furthermore, we assessed factors related to the risks of non-compliance with laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general industry experience, through discussions with the manager, reading minutes, inspection of reports and performing substantive tests of details of classes of transactions, account balances or disclosures.

We remained alert to any indication of (suspected) non-compliance throughout the audit.

Finally, we obtained written representations that all known instances of non-compliance with laws and regulations have been disclosed to us.

Our audit response related to going concern

As disclosed in section Statement of Compliance to the financial statements, the financial statements have been prepared on a going concern basis. When preparing the financial statements, the manager made a specific assessment of the Sub-Funds' ability to continue as a going concern and to continue their operations for the foreseeable future.

We discussed and evaluated the specific assessment with the manager exercising professional judgment and maintaining professional skepticism.

We considered whether the manager's going concern assessment, based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, contains all relevant events or conditions that may cast significant doubt on the Sub-Funds' ability to continue as a going concern.

Based on our procedures performed, we did not identify material uncertainties about going concern.

Our conclusions are based on the audit evidence obtained up to the date of our auditor's report.

However, future events or conditions may cause the Sub-Funds to cease to continue as a going concern.

Report on other information included in the annual report

The annual report contains other information in addition to the financial statements and our auditor's report thereon.

Based on the following procedures performed, we conclude that the other information:

- Is consistent with the financial statements and does not contain material misstatements
- Contains the information as required by Part 9 of Book 2 of the Dutch Civil Code for the management report and the other information as required by Part 9 of Book 2 of the Dutch Civil Code

We have read the other information. Based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, we have considered whether the other information contains material misstatements. By performing these procedures, we comply with the requirements of Part 9 of Book 2 of the Dutch Civil Code and the Dutch Standard 720. The scope of the procedures performed is substantially less than the scope of those performed in our audit of the financial statements.

The manager is responsible for the preparation of the other information, including the management report in accordance with Part 9 of Book 2 of the Dutch Civil Code and other information required by Part 9 of Book 2 of the Dutch Civil Code.

Description of responsibilities regarding the financial statements

Responsibilities of the manager for the financial statements

The manager is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards and Part 9 of Book 2 of the Dutch Civil Code.

Furthermore, the manager is responsible for such internal control as the manager determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

As part of the preparation of the financial statements, the manager is responsible for assessing the Sub-Funds' ability to continue as a going concern. Based on the financial reporting framework mentioned, the manager should prepare the financial statements using the going concern basis of accounting unless the manager either intends to liquidate the Sub-Funds or to cease operations or has no realistic alternative but to do so. The manager should disclose events and circumstances that may cast significant doubt on the Sub-Funds' ability to continue as a going concern in the financial statements.

Our responsibilities for the audit of the financial statements

Our objective is to plan and perform the audit engagement in a manner that allows us to obtain sufficient and appropriate audit evidence for our opinion.

Our audit has been performed with a high, but not absolute, level of assurance, which means we may not detect all material errors and fraud during our audit.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. The materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

We have exercised professional judgment and have maintained professional skepticism throughout the audit, in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. The Information in support of our opinion section above includes an informative summary of our responsibilities and the work performed as the basis for our opinion. Our audit included among others:

- Identifying and assessing the risks of material misstatement of the financial statements, whether due to fraud or error, designing and performing audit procedures responsive to those risks, and obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion.
The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control
- Obtaining an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Sub-Funds' internal control
- Evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the manager
- Evaluating the overall presentation, structure and content of the financial statements, including the disclosures
- Evaluating whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation

Communication

We communicate with the manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant findings in internal control that we identify during our audit.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS

1. General information

1895 Fonds FGR (the "Entity") is a Dutch collective investment scheme registered on 19 November 2019. The Entity is authorised in The Netherlands by the Netherlands Authority for the Financial Markets (the "AFM") established under the laws of the Netherlands as an Undertaking for Collective Investment in Transferable Securities (UCITS) for the purposes of the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities Regulations (the "UCITS Regulations")).

2. Material accounting policies

2.1 Basis of preparation

Statement of Compliance

These financial statements have been prepared in accordance with Part 9 of Book 2 of the Dutch Civil Code, using article 362-8 to apply International Financial Reporting Standards as adopted by the European Union (IFRS Accounting Standards), and the Act on Financial Supervision (*Wet op het financieel toezicht*) (the "AFS"). The Manager's Report is prepared in accordance with Part 9 of Book 2 of the Dutch Civil Code and the AFS. The financial statements are prepared on a going concern basis under the historical cost convention as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) held at fair value through profit or loss.

All amounts have been rounded to the nearest thousand, unless otherwise indicated. Amounts which are less than 500 in each Fund's base currency have been rounded down to zero.

Standards and amendments to existing standards effective 1 November 2024

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the Entity.

New standards, amendments and interpretations effective after 1 November 2024 and have not been early adopted

A number of new standards and amendments to standards are effective for annual periods beginning after 1 November 2024 and earlier application is permitted; however, the Entity has not early adopted the new or amended standards in preparing these financial statements.

- *Amendments to IFRS Accounting Standard 9 and IFRS Accounting Standard 7 - Classification and Measurement of Financial Instruments*

These amendments:

- clarify the requirements for the timing of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system;
- clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion;
- add new disclosures for certain instruments with contractual terms that can change cash flows (such as some instruments with features linked to the achievement of environment, social and governance (ESG) targets); and
- make updates to the disclosures for equity instruments designated at Fair Value through Other Comprehensive Income (FVOCI).

The amendments apply for annual reporting periods beginning on or after 1 January 2026. The Entity intends to adopt these amendments, if applicable, when they become effective. The Entity is currently evaluating the impact, if any, that this amendment will have on its financial Statements.

- *IFRS Accounting Standard 18 - Presentation and Disclosure in Financial Statements.*

This is the new standard on presentation and disclosure in financial statements, with a focus on updates to the statement of profit or loss. The key new concepts introduced in IFRS Accounting Standard 18 relate to:

- the structure of the statement of profit or loss;
- required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management defined performance measures); and
- enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general.

The new standard applies for annual reporting periods beginning on or after 1 January 2027. The Entity intends to adopt this new standard, if applicable, when they become effective. The Entity is currently evaluating the impact, if any, that this amendment will have on its financial statements.

The following new and amended standards and interpretations are not expected to have a significant impact on the Entity's financial statements.

- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture - (Amendments to IFRS Accounting Standard 10 and IAS 28) (Available for optional adoption)
- Lack of Exchangeability (Amendments to IAS 21 (1 January 2025))

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2. Material accounting policies (continued)

2.1 Basis of preparation (continued)

Statement of Compliance (continued)

There are no other standards, amendments and interpretations issued that are not yet effective that would be expected to have a significant impact on the Entity.

2.2 Financial instruments

2.2.1 Classification

The Entity classifies its investments in debt instruments, equity instruments and derivatives as financial assets or financial liabilities at fair value through profit or loss. These financial assets and financial liabilities are classified as held for trading or designated at fair value through profit or loss at inception. All the derivative investments are held for trading purposes. All other financial assets and financial liabilities including cash and cash equivalents, receivables and payables are classified at amortised cost using the effective interest method.

2.2.2 Recognition and derecognition

The Entity recognises a financial asset or a financial liability when it becomes a party to the contractual provisions of the instrument. Purchases and sales of investments are recognised on the day the trade takes place.

Realised gains and losses on disposals of financial instruments are calculated using the average cost method. For instruments held long, they represent the difference between the initial carrying amount and disposal amount. For instruments held short, they represent the difference between the proceeds received and the opening value. For derivative contracts, they represent the cash payments or receipts made on derivative contracts (excluding those on collateral or margin accounts for such instruments).

Financial assets are derecognised when the rights to receive cash flows from the asset have expired or the risks and rewards of ownership have all been substantially transferred. Financial liabilities are derecognised when the obligation under the liability is discharged, cancelled or expired.

2.2.3 Measurement

All financial instruments are initially recognised at fair value.

Financial assets and financial liabilities at fair value through profit or loss are subsequently measured at fair value. Transaction costs on purchases or sales of investments and gains and losses arising from changes in the fair value of financial assets or financial liabilities at fair value through profit or loss are presented in the statement of comprehensive income within 'Net gains/(losses) on financial instruments', in the period in which they arise.

Financial assets and financial liabilities, other than those classified as at fair value through profit or loss, are subsequently measured at amortised cost.

2.2.4 Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The estimation of fair value, after initial recognition, is determined as follows:

- Investments in debt and equity instruments and exchange traded derivatives which are quoted, listed, traded or dealt on a market or exchange are valued based on quoted market prices which, for the purposes of the financial statements is in line with the valuation methodology prescribed in the Entity's Prospectus. Depending on the nature of the underlying investment, the value taken could be either at the closing price, closing mid-market price or bid price on the relevant market.
- Investments in centrally cleared and over-the-counter ("OTC") derivatives are valued using valuation techniques.

In the case of an investment which is not quoted, listed or dealt on a recognised market, or in respect of which a listed, traded or dealt price or quotation is not available at the time of valuation, the fair value of such investment shall be estimated with care and in good faith by a competent professional person, body, firm or corporation (appointed for such purpose by the Directors in consultation with the Investment Manager and approved for the purpose by the Depositary), and such fair value shall be determined using valuation techniques. The Entity uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date.

Valuation techniques used for non-standardised financial instruments such as OTC derivatives include those detailed in the fair value hierarchy note, and those used by market participants making the maximum use of market inputs and relying as little as possible on Entity-specific inputs.

2.2.5 Financial derivative and other specific instruments

2.2.5.1 Futures contracts

A futures contract is a contract, traded on an exchange, to buy or sell a certain underlying instrument at a certain date in the future, at a specified price.

Initial margin deposits are made to relevant brokers upon entering into futures contracts and are included in margin cash.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2. Material accounting policies (continued)

2.2 Financial instruments (continued)

2.2.5 Financial derivative and other specific instruments (continued)

2.2.5.2 Forward currency contracts

A forward currency contract is an agreement, in the OTC market, between two parties to buy or sell a certain underlying currency at a certain date in the future, at a specified price.

2.2.5.3 Swaps

A swap is an individually negotiated agreement, in the OTC market, between two parties to swap one stream of payments for another. They may be entered into as a bilateral contract ("OTC swaps") or centrally cleared ("centrally cleared swaps").

Upon entering into a centrally cleared swap, the Fund is required to deposit initial margin with the broker in the form of cash of an amount that varies depending on the size and risk profile of the underlying swap contract.

2.2.5.4 Options

Options are financial instruments that convey the right, but not the obligation, to engage in a future transaction on an underlying security, or in a futures contract.

When a Fund purchases an option, an amount equal to the premium paid is recorded as an investment and is subsequently adjusted to the current fair value of the option purchased. The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the underlying securities or foreign currency purchased.

When a Fund writes an option, an amount equal to the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current fair value of the option written, based on the bid/ask price in the case of exchange traded-options or, in the case of options traded in the OTC market, the last ask price. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased.

2.2.6 Cash and cash equivalents

Cash in the statement of financial position includes cash deposits held on call with banks. Cash equivalents include short-term liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, with original maturities of three months or less.

2.2.7 Collateral and margin cash

Cash collateral provided by a Fund is identified as an asset on the statement of financial position as 'Cash collateral' and is not included as a component of cash and cash equivalents. Cash collateral is held by Barclays, BNP Paribas, Citigroup, Goldman Sachs, and J.P. Morgan as at 31 October 2025 (31 October 2024: Bank of America Merrill Lynch, Barclays, BNP Paribas, Citigroup, Goldman Sachs, HSBC, J.P. Morgan, Morgan Stanley, State Street and UBS). For collateral other than cash provided by a Fund, if the party to whom the collateral was provided has the right by contract to sell or re-pledge the collateral, a Fund classifies that asset on its statement of financial position separately from other assets and identifies the asset as a pledged investment. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the notes to the financial statements.

Cash balances held as margin with relevant brokers relating to investments in derivatives at the reporting date are identified on the statement of financial position as Margin cash.

Cash collateral provided to a Fund by counterparties is identified on the statement of financial position as 'Cash collateral payable' and is held with Bank of America Merrill Lynch, Citigroup, Goldman Sachs, HSBC, and Morgan Stanley as at 31 October 2025 (31 October 2024: Bank of America Merrill Lynch, BNP Paribas, BNY Mellon, Citigroup, HSBC, Morgan Stanley, UBS and Westpac Banking Corporation). A Fund may reinvest this cash collateral and the assets purchased are included as 'Cash equivalents' on the statement of financial position.

2.2.8 Redeemable units

Each Fund classifies redeemable units issued as financial liabilities or equity in accordance with the substance of the contractual terms of the instruments. Redeemable units are measured at the present value of redemption amounts. The Entity is contractually obliged to redeem units in accordance with the prospectus.

In accordance with IAS 32.16A, "Financial Instruments: Presentation", such units have been classified as liability at the value of the redemption amount in the statement of changes in net assets attributable to redeemable unitholders.

The redeemable units are accounted for on the day the trade takes place. Subscriptions and redemptions of redeemable units are accounted for on the day the trade transaction takes place. Units are subscribed and redeemed based upon the NAV per unit as of the latest valuation point, in accordance with the Prospectus.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2. Material accounting policies (continued)

2.2 Financial instruments (continued)

2.2.8 Redeemable units (continued)

Where duties and charges are applied in the context of a subscription or redemption, they will have an impact on the value of an investment of a subscribing or redeeming investor and as a result are reflected as part of the issue of redeemable units or the redemption of redeemable units in the statement of changes in net assets attributable to redeemable unitholders. Any potential duties and charges are at the discretion of the Directors.

2.3 Foreign currency

2.3.1 Functional and presentation currency

Foreign currency items included in each Fund's financial statements are measured in each Fund's functional currency which is shown for each Fund in the headings of the financial statements.

The Directors consider that these currencies most accurately represent the economic effects of the underlying transactions, events and conditions of each Fund. Each Fund's presentation currency is the same as the functional currency.

2.3.2 Transactions and balances

Transactions in foreign currencies are translated into the functional currency of each Fund at the foreign currency exchange rate in effect at the date of the transaction.

Foreign currency assets and liabilities, including investments, are translated at the exchange rate prevailing at the reporting date.

The foreign exchange gain or loss based on the translation of the investments, as well as the gain or loss arising on the translation of other assets and liabilities, is included in the statement of comprehensive income.

2.4 Critical accounting estimates and judgements

The preparation of the financial statements in conformity with IFRS Accounting Standards requires the use of certain critical accounting estimates. It also requires the Directors to exercise their judgement in the process of applying the Entity's accounting policies. Changes in assumptions may have a significant impact on the financial statements in the period the assumptions changed. The Directors believe that the underlying assumptions are appropriate and that the Entity's financial statements, therefore, present the Entity's financial position and its results fairly. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future years if the revision affects both current and future years. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed below.

2.4.1 Assumptions and estimation uncertainties

2.4.1.1 Fair value of OTC derivative financial instruments

OTC financial derivative instruments ("FDIs") are valued using valuation techniques, as detailed in the fair value hierarchy note to the financial statements. Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed and compared to the price provided by an independent pricing service provider, where available.

2.4.1.2 Fair value of financial instruments not quoted in an active market

The fair value of such instruments not quoted in an active market may be determined by the Entity using reputable pricing sources or indicative prices from bond/debt market makers. The Entity exercises judgement and makes estimates on the quantity and quality of pricing sources used. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding.

2.4.1.3 Fair value of financial instruments with significant unobservable inputs

The fair value of such instruments is determined using valuation techniques including inputs not based on market data and where significant entity determined adjustments or assumptions are applied, as detailed in the fair value hierarchy note to the financial statements.

Details of the valuation technique and the unobservable inputs used in the valuation of equity and bond securities are set out in the fair value hierarchy note to the financial statements.

2.4.2 Judgements

2.4.2.1 Assessment as investment entities

The Directors are of the opinion that the Entity meets the definition of an investment fund. The following conditions exist:

- a) The Entity has obtained funds for the purpose of providing investors with investment management services; and
- b) The investments held by the Entity are measured and evaluated on a fair value basis and information about those investments are provided to unitholders on a fair value basis through the Entity.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2. Material accounting policies (continued)

2.5 Dividend income

Dividend income is recognised in the statement of comprehensive income when a Fund's right to receive the payment is established. For quoted equity securities, this is usually the ex-dividend date. For unquoted equity securities, this is usually the date on which the unitholders approve the payment of a dividend. Dividend income is shown gross of any non-recoverable withholding taxes, which are presented separately in the statement of comprehensive income. CIS income is recognised when the distributions are declared by the underlying CIS.

2.6 Interest income and interest expense

Interest income and interest expense for all interest-bearing financial instruments are recognised in the statement of comprehensive income using the effective interest method.

2.7 Fees and expenses

Expenses are recognised in the statement of comprehensive income on an accruals basis except for transaction charges relating to the acquisition and realisation of investments which are charged for as incurred and presented within 'Net gains/(losses) on financial instruments', in the period in which they arise.

2.8 Distributions

Distributions are recognised in the statement of comprehensive income as finance costs where units in the Fund do not meet the conditions to be classified as equity and as a result are classified as financial liabilities.

The Directors may declare distributions on the units of the class in respect of each financial period. Distributions may be paid out of a Fund's net income.

2.9 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. There were no amounts eligible for offsetting at 31 October 2025 or 31 October 2024.

2.10 Allocation of results for the financial year

Distributions declared and paid during the financial year are disclosed in note 9 of the financial statements. The results for the financial year are disclosed in the statement of comprehensive income and are included in the net assets attributable to redeemable unitholders.

2.11 Taxation

2.11.1 Current tax

Current tax is recognised for the amount of income tax payable in respect of the overseas taxable profit for the current or past reporting periods using the tax rates and laws that have been enacted or substantively enacted by the reporting date.

3. Financial risks

The Fund's investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which it invests. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the prospectus for a more detailed discussion of the risks inherent in investing in each Fund.

3.1 Risk management framework

The Directors have delegated the day-to-day administration of the investment programme to the Investment Manager. The Investment Manager is also responsible for ensuring that the Entity is managed within the terms of its investment guidelines and limits set out in the prospectus. The Directors reserve to themselves the investment performance, product risk monitoring and oversight and the responsibility for the monitoring and oversight of regulatory and operational risk for the Entity. The Directors have appointed a risk manager who has responsibility for the daily risk management process with assistance from key risk management personnel of the Investment Manager, including members of the BlackRock Risk and Quantitative Analysis Group ("RQA Group") which is a centralised group which performs an independent risk management function.

The RQA Group independently identifies, measures and monitors investment risk, including climate-related risk. The RQA Group tracks the actual risk management practices being deployed across each Fund. By breaking down the components of the process, the RQA Group has the ability to determine if the appropriate risk management processes are in place across each Fund. This captures the risk management tools employed, how the levels of risk are controlled, ensuring risk/return is considered in portfolio construction and reviewing outcomes.

3.2 Market risk

Market risk arises mainly from uncertainty about future values of financial instruments influenced by currency, interest rate and price movements. It represents the potential loss each Fund may suffer through holding market positions in the face of market movements.

The Funds are exposed to market risk by virtue of their investment in debt instruments, equity instruments and derivatives. A key metric used by the RQA Group to measure market risk is Value-at-Risk ("VaR") which encompasses currency, interest rate and price risk. VaR is a statistical risk measure that estimates the potential portfolio loss from adverse market movements in an ordinary market environment. VaR analysis reflects the interdependencies between risk variables, unlike a traditional sensitivity analysis.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. Financial risks (continued)

3.2 Market risk (continued)

The VaR calculations are based on an adjusted historical simulation model with a confidence level of 99%, a holding period of one day and a historical observation period of not less than one year (250 days). A VaR number is defined at a specified probability and a specified time horizon. A 99% one day VaR means that the expectation is that 99% of the time over a one-day period the Fund will lose no more than this number in percentage terms. Therefore, higher VaR numbers indicate higher risk. The one-day VaR has a multi-year year look back period which encompasses market volatility caused by political, social and economic events which feed into the model. Significant market disruptions, such as those caused by pandemics, natural or environmental disasters, war, acts of terrorism, or other events, may adversely affect the Fund's VaR.

It is noted that the use of VaR methodology has limitations, namely that the use of historical market data as a basis for estimating future events does not encompass all possible scenarios, particularly those that are of an extreme nature and that the use of a specified confidence level (e.g. 99%) does not take into account losses that occur beyond this level. There is some probability that the loss could be greater than the VaR amounts. These limitations and the nature of the VaR measure mean that the Fund can neither guarantee that losses will not exceed the VaR amounts indicated, nor that losses in excess of the VaR amounts will not occur more frequently.

The one-day VaR based on 99% confidence level is outlined in the table below:

Fund name	31 October 2025 %	31 October 2024 %
1895 Wereld Aandelen Enhanced Index Fonds	2.36%	3.04%
1895 Wereld Multifactor Aandelen Fonds	2.38%	3.04%
1895 Euro Obligaties Index Fonds	0.45%	0.66%
1895 Wereld Bedrijfsobligaties Fonds	0.54%	0.65%
1895 Wereld Investment Grade Obligaties Fonds	0.43%	0.54%
1895 Aandelen Macro Opportunities Fonds	2.37%	2.74%
1895 Aandelen Thematic Opportunities Fonds	2.43%	2.84%
1895 Obligaties Opportunities Fonds	0.57%	0.67%
1895 Euro Short Duration Obligaties Fonds	0.10%	-
1895 Speciale Projecten Obligaties Fonds	0.38%	-

3.2.1 Market risk arising from foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Exposure to foreign currency risk

Each Fund may invest in financial instruments denominated in currencies other than its functional currency. Consequently, each Fund is exposed, directly and/or indirectly, to risks that the exchange rate of its functional currency relative to other currencies may change in a manner which has an adverse effect on the value of the portion of each Fund's assets which are denominated in currencies other than their own currency.

The details of the open forward currency contracts in place to hedge foreign currency risk at the financial year end date are disclosed in note 19.

The following tables set out each Funds exposure to foreign currency risk and the net exposure to foreign currencies as at 31 October 2025 and 31 October 2024.

As at 31 October 2025	Financial assets	Financial liabilities

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. Financial risks (continued)

3.2 Market risk (continued)

3.2.1 Market risk arising from foreign currency risk (continued)

Management of direct and indirect foreign currency risk

Some Funds may engage in foreign currency hedging to minimise the effect of currency movements between the currencies of the investments held by the Fund and Euro.

The Investment Manager monitors foreign currency risk exposure against pre-determined tolerances and determines when a currency hedge should be reset and the gain or loss arising from such hedge reinvested or settled, while taking into consideration the frequency and associated transaction and reinvestment costs of resetting the currency hedge.

3.2.2 Market risk arising from interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Exposure to interest rate risk

Some Funds are exposed to interest rate risk through their cash and cash equivalent holdings including margin cash held with brokers and through their investments in interest bearing financial instruments which are disclosed in note 19.

1895 Wereld Bedrijfsobligaties Fonds and 1895 Wereld Investment Grade Obligaties Fonds also have indirect exposure to interest rate risk through their investments into interest rate financial derivative instruments ("FDIs"), whereby the value of an underlying asset may fluctuate as a result of a change in interest rates.

Management of direct and indirect interest rate risk

Interest rate risk exposure is managed at the underlying FDI level, by constantly monitoring the position for deviations outside of a pre-determined tolerance level and, when necessary, rebalancing back to the original desired parameters.

The Entity classifies its investments in debt instruments, equity instruments and derivatives as financial assets or financial liabilities at fair value through profit or loss. These financial assets and financial liabilities are classified as held for trading or designated by the Directors at fair value through profit or loss at inception. All the derivative investments are held for trading purposes. All other financial assets and financial liabilities including cash, receivables and payables are classified at amortised cost using the effective interest method.

3.2.3 Market risk arising from price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, such as the COVID-19 pandemic, recessions, climate change or other events could have a significant impact on the Funds and the market price of their investments.

Exposure to price risk

Each Fund is exposed to price risk arising from its investments in financial instruments. The exposure of each Fund to price risk is the fair value of the investments held as shown in note 19.

Management of price risk

By diversifying the portfolio, where this is appropriate and consistent with each Fund's objectives, the risk that a price change of a particular investment will have a material impact on the NAV of each Fund is minimised.

There is a risk that the valuation of each Fund may not fairly reflect the value of the investments held at a specific time due to events outside the control of the Directors, which could result in significant losses or inaccurate pricing for each Fund. To mitigate this risk the Directors may temporarily suspend the determination of the NAV of any Fund until a fair or reasonable valuation of the investments held can be determined.

The price risk inherent in the CIS holdings is monitored by the Investment Manager, at the CIS level, by understanding the investment objectives of the underlying funds as well as their internal control policies and regular risk and performance reporting. The investments into other CIS include an investment into a related party fund. Such CIS are subject to the same control procedures the Investment Manager employs for each/the Fund.

3.3 Liquidity risk

Liquidity risk is the risk that each Fund will encounter difficulties in meeting obligations associated with financial liabilities.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. Financial risks (continued)

3.3 Liquidity risk (continued)

Exposure to liquidity risk

Each Fund's principal liquidity risks arise from the ability of investors to effect redemption requests and the liquidity of the underlying investments each Fund has invested in. Each Fund's unitholders may redeem their units on the close of any daily dealing deadline for cash equal to a proportionate share of each Fund's NAV, excluding any duties and charges where applicable. Each Fund is therefore potentially exposed to the liquidity risk of meeting the unitholders' redemptions and may need to sell assets at prevailing market prices to meet liquidity demands.

Each Fund may invest in collective investment scheme ("CIS") which can impose notice periods or other restrictions on redemptions and this may increase the liquidity risk of each Fund. Each Fund is also exposed to liquidity risk associated with daily margin calls on FDIs.

The Funds entered into a credit facility with JPMorgan Chase Bank N.A.. This credit facility is available to the Funds for temporary funding purpose, including without limitation, the fund of investor redemptions.

All of the Entity's financial liabilities, based on contractual maturities, fall due within three months.

Management of liquidity risk

Liquidity risk is minimised by holding sufficient liquid investments which can be readily realised to meet liquidity demands. Asset disposals may also be required to meet redemption requests. However, timely sale of trading positions can be impaired by many factors including trading volume and increased price volatility. As a result, each Fund may experience difficulties in disposing of assets to satisfy liquidity demands.

Each Fund's liquidity risk is managed by the Investment Manager in accordance with established policies and procedures in place. The portfolio managers review daily forward-looking cash reports which project cash obligations. These reports allow them to manage their cash Obligations. If redemption requests from all holders of units in a Fund exceed more than 10% of the NAV of each Fund on any particular dealing day, the Directors shall be entitled, at their discretion, to refuse to redeem such excess numbers of units in issue from each Fund. The units which are not redeemed at any given dealing day shall be redeemed on each subsequent dealing day on a pro-rata basis in priority/are not treated in priority to any requests received thereafter.

None of the assets of the Funds are subject to special liquidity arrangements.

3.4 Counterparty credit risk

Counterparty credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Exposure to counterparty credit risk

Each Fund is exposed to counterparty credit risk from the parties with which it trades and will bear the risk of settlement default.

Each Fund has limited direct counterparty credit risk.

Each Fund's exposure is limited to the contracts in which it currently has a financial asset position reduced by any collateral received from the counterparty, or to counterparties who have received collateral from each Fund. The carrying value of financial assets together with cash held with counterparties best represents each Fund's gross maximum exposure to counterparty credit risk at the reporting date, before including the effect of any International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement, and netting, which would reduce the overall counterparty credit risk exposure. Each Fund only transacts with counterparties that are regulated entities subject to prudential supervision, or with high credit-ratings assigned by international credit-rating agencies. Cash held as security by the counterparty to FDI contracts is subject to the credit risk of the counterparty.

All transactions in listed securities are settled/paid for upon delivery of securities, using approved brokers. Risk relating to unsettled transactions is considered low due to the short settlement period involved and the high credit quality of the brokers used.

Management of counterparty credit risk

Counterparty credit risk is monitored and managed by BlackRock's RQA Counterparty & Concentration Risk Team. The team is headed by BlackRock's Chief Counterparty Credit Officer who reports to the Global Head of RQA. Credit authority resides with the Chief Counterparty Credit Officer and selected team members to whom specific credit authority has been delegated. As such, counterparty approvals may be granted by the Chief Counterparty Credit Officer, or by identified RQA Credit Risk Officers who have been formally delegated authority by the Chief Counterparty Credit Officer.

The BlackRock RQA Counterparty & Concentration Risk Team completes a formal review of each new counterparty, monitors and reviews all approved counterparties on an ongoing basis and maintains an active oversight of counterparty exposures and the collateral management process.

There were no past due or indication of impaired balances in relation to transactions with counterparties as at 31 October 2025 and 31 October 2024.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3. Financial risks (continued)

3.4 Counterparty credit risk (continued)

3.4.1 FDIs

Each Fund's holdings in exchange traded, centrally cleared and OTC FDIs expose a Fund to counterparty credit risk.

3.4.1.1 Exchange traded and centrally cleared FDIs

The exposure is limited by trading contracts through a clearing house. Each Fund's exposure to credit risk on contracts in which it currently has a gain position is reduced by such gains received in cash from the counterparty under the daily mark-to-market mechanism on exchange traded contracts and centrally cleared swaps (variation margin). Each Fund's exposure to credit risk on contracts in which it currently has a loss position is equal to the amount of margin posted to the counterparty which has not been transferred to the exchange under the daily mark-to-market mechanism.

3.4.1.2 OTC FDIs

The risk in relation to OTC FDIs arises from the failure of the counterparty to perform according to the terms of the contract as these FDI transactions are traded bilaterally except those cleared centrally.

All OTC FDI transactions are entered into by each Fund under an ISDA Master Agreement or similar agreement. An ISDA Master Agreement is a bilateral agreement between each Fund and a counterparty that governs OTC FDI transactions entered into by the parties. The parties' exposures under the ISDA Master Agreement are netted and collateralised together, therefore, any collateral disclosures provided are in respect of all OTC FDI transactions entered into by each Fund under the ISDA Master Agreement. All cash collateral received/posted by each Fund under the ISDA Master Agreement is transferred bilaterally under a title transfer arrangement.

Each legal title-holder of a Fund is the legal owner of inbound collateral and can sell the assets and withhold the cash in the case of default. If the counterparty fulfils its obligations in relation to the investment, each Fund will return an equal amount of cash to the counterparty on maturity or sale of the investment. When each Fund return securities collateral to the counterparty, it must be of the same type, nominal value, description and amount as the securities that were transferred to each Fund. Trading in OTC FDIs which have not been collateralised give rise to counterparty exposure.

Each Fund's maximum exposure to counterparty credit risk from holding forward currency contracts will be equal to the notional amount of the currency contract and any net unrealised gains as disclosed in note 19.

Forward currency contracts do not require variation margins and the counterparty credit risk is monitored through the BlackRock RQA Counterparty Team who monitor the creditworthiness of the counterparty.

Each Fund has the right to reinvest cash collateral received. Inbound cash collateral received by each Fund is reflected on the statement of financial position as cash collateral payable.

3.4.2 Depositary

The majority of the investments are held by the Depositary at the financial year end. Investments are segregated from the assets of the Depositary, with ownership rights remaining with each Fund. Bankruptcy or insolvency of the Depositary may cause the Funds' rights with respect to its investments held by the Depositary to be delayed or limited. The maximum exposure to this risk is the amount of long investments disclosed in note 19, plus any unsettled trades. Substantially all of the cash of each Fund is held with the Depositary.

To mitigate each Fund's exposure to the Depositary, the Investment Manager employs specific procedures to ensure that the Depositary is a reputable institution and that the counterparty credit risk is acceptable to each Fund. Each Fund only transacts with Depositary's that are regulated entities subject to prudential supervision, or with "high credit ratings" assigned by international credit rating agencies.

The long-term credit rating of the parent company of the Depositary as at 31 October 2025 is AA- (31 October 2024: AA-) (Standard & Poor's rating).

In order to further mitigate each Fund's counterparty credit risk exposure to the Depositary, each Fund may enter into additional arrangements such as the placing of residual cash in a money market fund.

3.4.3 Issuer credit risk relating to debt instruments

Issuer credit risk is the default risk of one of the issuers of any debt instruments held by each Fund. Debt instruments involve credit risk to the issuer which may be evidenced by the issuer's credit rating.

Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated. Four of the Funds invest into sovereign debt and corporate debt which expose them to the default risk of the issuer with regards to interest or principal payments.

The credit rating for all debt securities held was investment grade. To manage this risk, the Investment Manager, where appropriate and consistent with each Fund's objectives, invests in a wide range of debt instruments. The ratings of debt instruments are continually monitored by the BlackRock Portfolio Management Group ("PMG") and for non-rated or securities with subordinated or lower credit ratings, additional specific procedures are employed to ensure the associated credit risk is acceptable to each Fund.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

4. Global exposure

The Directors are required by regulation to employ a risk management process, which enables them to accurately monitor and manage the global exposure from FDIs which each Fund gains as a result of its strategy ("global exposure").

The Directors use one of two methodologies, the "commitment approach" or the "value-at-risk approach" ("VaR"), in order to measure the global exposure of each Fund and manage the potential loss to them due to market risk.

Commitment approach

The commitment approach is a methodology that aggregates the underlying market or notional value of FDI to determine the global exposure of each Fund to FDI.

Pursuant to the relevant regulations, global exposure for a Fund utilising the commitment approach must not exceed 100% of the Fund's NAV.

VaR approach

Please refer to note 3.2 for further details on the measure of VaR.

The Directors use Relative VaR to monitor and manage the global exposure of some of the Funds and Absolute VaR for others as set out below. For Relative VaR, the VaR of the respective Fund's portfolio will not exceed twice the VaR of the reference portfolio. For Absolute VaR, the monthly VaR will not exceed 20% of the Fund's NAV. Where a VaR calculation is performed using a horizon other than the one-month regulatory limit, this 20% limit shall be rescaled to reflect the appropriate risk horizon period as directed by the relevant regulatory guidelines. Utilisation refers to the level of risk taken in this context.

The tables below detail the highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the respective Relative/Absolute VaR regulatory limit.

As at 31 October 2025					
Fund	Global exposure approach	Reference portfolio	Highest utilisation of the VaR limit %	Lowest utilisation of the VaR limit %	Average utilisation of the VaR limit %
1895 Wereld Bedrijfsobligaties Fonds	Relative VaR	Bloomberg Global Aggregate ex Corporate Index (EUR Hedged) (75%) / Bloomberg MSCI Global Green Bond Ex Corporate Index (EUR Hedged) (25%)	52.57%	48.70%	50.93%
1895 Wereld Investment Grade Obligaties Fonds	Relative VaR	Bloomberg Global Aggregate ex Corporate Index (EUR Hedged) (75%) / Bloomberg MSCI Global Green Bond Ex Corporate Index (EUR Hedged) (25%)	57.86%	49.80%	54.29%
1895 Obligaties Opportunities Fonds	Absolute VaR	Euro Short Term Rate	21.70%	10.92%	14.12%

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

4. Global exposure (continued)

VaR approach (continued)

As at 31 October 2024					
Fund	Global exposure approach	Reference portfolio	Highest utilisation of the VaR limit %	Lowest utilisation of the VaR limit %	Average utilisation of the VaR limit %
1895 Wereld Bedrijfsobligaties Fonds	Relative VaR	Bloomberg Global Aggregate ex Corporate Index (EUR Hedged) (75%) / Bloomberg MSCI Global Green Bond Ex Corporate Index (EUR Hedged) (25%)	52.34%	50.28%	51.38%
1895 Wereld Investment Grade Obligaties Fonds	Relative VaR	Bloomberg Global Aggregate ex Corporate Index (EUR Hedged) (75%) / Bloomberg MSCI Global Green Bond Ex Corporate Index (EUR Hedged) (25%)	57.33%	49.18%	53.62%
1895 Obligaties Opportunities Fonds	Absolute VaR	Euro Short Term Rate	18.12%	11.63%	14.99%

Leverage

The use of FDIs may expose a Fund to a higher degree of risk. In particular, FDI contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on FDIs than on standard bonds or equities. Leveraged FDI positions can therefore increase a Fund's volatility.

Pursuant to its regulatory obligations, the Directors are required to express the level of leverage employed in a Fund where VaR is being used to measure global exposure. For the purposes of this disclosure, leverage is the investment exposure gained through the use of FDIs. It is calculated using the sum of the notional values of all the FDI held by the relevant Fund, without netting, and is expressed as a percentage of the NAV.

Disclosed in the table below is the level of leverage employed by each relevant Fund during the financial years ended 31 October 2025 and 31 October 2024.

Fund	% Average leverage employed 31 October 2025	% Average leverage employed 31 October 2024
1895 Wereld Bedrijfsobligaties Fonds	99.20%	95.08%
1895 Wereld Investment Grade Obligaties Fonds	149.21%	107.21%
1895 Obligaties Opportunities Fonds	171.70%	125.89%

5. Fair value hierarchy

Each Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the Fund can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant Entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5. Fair value hierarchy (continued)

Specific valuation techniques used to value financial instruments classified as level 2 and level 3 include:

- (i) for debt and equity instruments, the use of quoted market prices or dealer quotes for similar instruments;
- (ii) for foreign equities, using independent fair value adjustment factors to reflect the difference between the last market close and the valuation point of each Fund;
- (iii) for defaulted debt instruments, the use of recent transactions and defaulted equity instruments for which market data is unavailable;
- (iv) for interest rate swaps, the present value of the estimated future cash flows based on observable yield curves;
- (v) for foreign currency forwards, present value of future cash flows based on the forward exchange rates at the statement of financial position date;
- (vi) for foreign currency options, option pricing models; and
- (vii) for other financial instruments, discounted cash flow analysis.

All of the resulting fair value estimates are included in level 2 except for unlisted equity securities, where the fair values have been determined based on present values and the discount rates used were either not market observable or adjusted for counterparty or own credit risk, are included in level 3.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability. Transfers between levels of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period.

The determination of what constitutes 'observable' inputs requires significant judgement. The Directors consider observable inputs to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following table presents an analysis of each Fund's financial assets and financial liabilities measured at fair value as at 31 October 2025 and 31 October 2024:

31 October 2025 1895 Wereld Aandelen Enhanced Index Fonds	Level 1 EUR '000	Level 2 EUR '000	Level 3 EUR '000	Total EUR '000

¹The Fund launched during the financial year hence no comparative data is available.

The Manager is entitled to charge a fee calculated as a percentage per annum of the NAV of each Fund or relevant unit class as set out in the "Table of Fees and Expenses". The Manager will be responsible for discharging, from this fee, all fees (including reasonable out of pocket expenses) of the Investment Manager. The fee will be accrued on a daily basis and will be paid monthly in arrears. The Investment Manager will arrange for the fees and expenses of any Sub-Investment Manager to be paid out of the Manager's fees or the Investment Manager's fees.

Any amounts in excess of the maximum fee rate are waived.

¹The Fund launched during the financial year hence no comparative data is available.

Administration fees

The Administrator is entitled to charge a pro rata scaled fee paid out of the property of each Fund calculated as a percentage per annum of the NAV of the Fund in line with the following thresholds:

- 0.00828% of NAV up to EUR5billion ("bn") assets under management ("AUM");
- 0.00736% of NAV from EUR5bn up to EUR10bn AUM;
- 0.00644% of NAV from EUR10bn up to EUR50bn AUM; and
- 0.00552% of NAV over EUR50bn AUM.

Depository fees

The Depository is entitled to charge a pro rata scaled fee paid out of the property of each Fund calculated as a percentage per annum of the NAV of the Fund in line with the following thresholds:

- 0.005% of NAV up to EUR10bn AUM;
- 0.004% of NAV from EUR10bn up to EUR50bn AUM; and
- 0.0035% of NAV over EUR50bn AUM.

The Depository is entitled to increase such fee in respect of certain Unit Classes. Unitholders will be notified in writing in advance of any proposed increase of such fees.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

7. Operating expenses (continued)

Depository fees (continued)

The Depository is also entitled to receive payment out of the property of the Fund and any relevant Sub-Fund for custody services consisting of:

- a fixed fee for each transaction of between €1.50 to €76 depending on the type, size and geographical location of the assets held by the Depository ("Custody Transaction Fees"); and
- a variable safekeeping charge of between 0.0006% to 0.36% depending on the size and geographical location of the assets held by the Depository ("Custody Safekeeping Fees").

Ongoing Charges Figure

The ongoing charges figure ("OCF") is calculated as the total of all expenses (excluding bank interest, negative yield expense on financial assets and expense reimbursements), divided by the average net assets value (total sum of available NAVs divided by number of NAVs) of the Fund, expressed as a percentage. All data is annualised.

The OCFs for the financial year ended 31 October 2025 and for the financial year ended 31 October 2024 are as follows:

Fund name	Unit class	31 October 2025 OCF	31 October 2024 OCF
1895 Wereld Aandelen Enhanced Index Fonds	Class D	0.0500%	0.0571%

9. Distributions to redeemable unitholders

The Funds may declare and pay dividends on any distributing class of units in a Fund. In accordance with the prospectus, any dividend which has remained unclaimed for six years from the date of its declaration shall be forfeited and cease to remain owing by a Fund to investors and become the property of the relevant Fund.

Distributions declared during the financial year were as follows:

10. Taxation

The Entity is an open-ended umbrella fund for joint account (fonds voor gemene rekening) within the meaning of article 2(3) of the Corporate Income Tax Act 1969 (Wet vennootschapsbelasting 1969) and has the status of a Fiscal Investment Institution (FII) within the meaning of article 28 of the Corporate Income Tax Act 1969. As such, the Funds are subject to a Dutch corporate income tax rate of 0%. To qualify for and to maintain FII status, the Funds must, amongst other requirements, distribute their net income as dividends to their investors within eight months following the end of the financial year.

If certain conditions are met, the Funds may opt to form a reinvestment reserve. In that case, the positive or negative balance of the Funds' unrealised capital gains on securities are added to, or charged against this reserve. The amounts added to, or charged against, the reinvestment reserve do not form part of the income of the Funds that need to be distributed within eight months following the end of the financial year. Any unrealised capital gains will not form part of distributable income.

Dividend distributions made by Netherlands resident entities to the Funds may be subject to the 15% Dutch dividend withholding tax. In addition, withholding tax may be withheld on proceeds derived by the Funds from foreign investments, both on dividends as well as on interest payments made to the Funds.

Under the Dutch Dividend Withholding Tax Act 1965 (Wet op de dividendbelasting 1965), dividends distributed by the Funds are in principle subject to a 15% dividend withholding tax. The Funds are required to remit to the Dutch tax authorities the 15% dividend withholding tax that they have withheld on dividend payments. However, insofar as the FGR qualifies as a FII; the Funds are entitled to the so-called tax rebate (afdrachtsvermindering) of article 11a Dividend Withholding Tax Act 1965. As a result of the tax rebate the amount of dividend withholding tax that the Funds are required to remit to the Dutch tax authorities is reduced, if the Funds themselves have received dividends and interest that have been subject to a Dutch or foreign withholding tax.

The Sub-Manager fees are paid from the accrued Management fees on the funds on receipt of authorised instruction from BlackRock.

Fees paid to the Manager and Investment Manager during the financial year, the nature of these transactions and the balances outstanding at the financial year end are disclosed in note 7 and in note 12 respectively.

The Directors as at 31 October 2025 are presented in the table below:

Director	Employee of the BlackRock Group	Director of BlackRock affiliates and/or other funds managed by BlackRock
Rosemary Quinlan (Chair)	No	No
Patrick Boylan	Yes	Yes
Maria Ging	Yes	No
Michael Hodson	No	No
Enda McMahon	Yes	Yes
Justin Mealy	Yes	No
Adele Spillane	No	No
Catherine Woods	No	No

The Directors who are also employees of the BlackRock Group are not entitled to receive Directors' fees.

Holdings in other funds managed by BlackRock/BlackRock affiliates

Investments in funds managed by BlackRock, Inc. and investments that are BlackRock affiliates are listed below. For underlying funds which are subject to investment management or performance fees, these have been rebated back to the Fund.

1895 FONDS FGR

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

16. Related party transactions (continued)

Holdings in other funds managed by BlackRock/BlackRock affiliates (continued)

The Entity invested in the following funds which are also managed by BlackRock Asset Management Ireland Limited. Further information on the fees charged from investing in these underlying funds is presented in the table below. These disclosed fees are the maximum charges capped as per the prospectus of the underlying funds and actual fees charged may be lower:

Investments	Fee paid by Fund
Investment Company - UCITS authorised in Ireland by CBI	
BlackRock ICS Euro Liquid Environmentally Aware Fund - Agency (Acc T0) Shares	Annual expense capped at 0.03% of NAV ¹
BlackRock ICS Sterling Liquid Environmentally Aware Fund - Agency (Dis) Shares	Annual expense capped at 0.03% of NAV ¹
BlackRock ICS US Dollar Liquid Environmentally Aware Fund - Agency (Dis) Shares	Annual expense capped at 0.03% of NAV ¹

¹The Manager of these investments will be responsible for discharging from its fee the annual expenses of the Funds. Where actual fees and costs incurred exceed the amount paid to the Manager, the excess will be discharged by the Manager from its own assets.

The terms and returns received by the related parties in making the investments were no more favourable than those received by other investors investing into the same unit classes.

The following tables detail the transactions with entities considered related parties at 31 October 2025.

*Other reimbursement is less than EUR 500 therefore rounded down to zero.

¹The Fund launched during the financial year hence no comparative data is available.

No provisions have been recognised by the Funds against amounts due from related parties at the financial year end date (31 October 2024: Nil).

No amounts have been written off during the financial year in respect of amounts due to or from related parties (31 October 2024: Nil).

No commitments secured or unsecured or guarantees have been entered into with related parties during the financial year (31 October 2024: Nil).

17. Commitments and contingent liabilities

Each Fund classifies redeemable units issued as financial liabilities or equity in accordance with the substance of the contractual terms of the instruments. Redeemable units are measured at the present value of redemption amounts. The Entity is contractually obliged to redeem units in accordance with the prospectus. There were no significant commitments or contingent liabilities as at 31 October 2025 and 31 October 2024.

18. Statutory information

The following fees were included within audit fees for the financial years ended 31 October 2025 and 31 October 2024:

	31 October 2025 EUR'000	31 October 2024 EUR'000
Audit fee (including expenses) relating to the audit of the annual financial statements (inclusive of VAT)	173	125
Non-audit fees relating to the prospectus (inclusive of VAT)	11	15

There were no other assurance, tax, advisory or non-audit fees other than the audit fees disclosed above paid to EY Accountants B.V., in the Netherlands as the Statutory Auditor of the Entity as no other services were provided.

²The Fund launched on 10 March 2025.

The gains and losses amounts above include transaction costs incurred to acquire and dispose of investments which are disclosed separately from gains and losses on investments in the statement of comprehensive income.

21. Portfolio Turnover Rate

Transaction costs are incurred when a Funds deals in securities and issues and redeems units. The portfolio turnover rate (PTR) reflects the volume of trading by a Fund other than investing in/disposing of securities due to subscriptions in/redemptions by the Fund. It is calculated using a prescribed formula: ((purchases of securities plus sales of securities) minus (subscriptions of units plus redemptions of units)) divided by average net asset value (total sum of available NAVs divided by number of NAVs).

22. Credit Facility

The Funds entered into a credit facility with JPMorgan Chase Bank, N.A. ("JPMorgan") whereby JPMorgan, together with other syndicated lenders, made a portion of a USD 450 million credit facility available to the Funds. The portion of the USD 450 million credit facility will be allocated to the Funds based on the credit facility agreement dated 19 April 2025. This credit facility will be utilised by the Funds for temporary funding purposes, including, without limitation, the funding of investor redemptions. Any interest and commitment fees in relation to drawdowns from such credit facility are paid out of the assets of each Fund. Any new Funds will not automatically be subject to a credit line and will therefore be required to be added by way of a joinder process. This process includes, inter alia, any necessary due diligence being carried out by the lenders in order to approve the addition of the new Funds. During this period, such Funds will not be subject to, or able to draw down on, any credit line. Furthermore, there is no guarantee that the addition of any new Funds will be approved by the lenders, or that credit will be available to a Fund since the credit line is subject to availability (on an equitable allocation basis) between the Funds and other BlackRock Funds participating in the credit agreement. As such, certain Funds may not be subject to the credit line and will not incur any fees with respect to same. The credit facility was not utilised during the financial year.

A loan commitment fee is charged on a daily basis in relation to this credit facility which is included in the condensed statement of comprehensive income under caption "Operating expenses". The loan commitment fee is charged at 0.10% on the outstanding balance. There was no credit administration fee charged during the financial year.

23. Soft commissions

There were no soft commission arrangements entered into by the Investment Manager on behalf of the Funds during the financial years ended 31 October 2025 and 31 October 2024.

24. Prior period restatement

The statement of comprehensive income and the statement of changes in net assets attributable to redeemable unitholders have been restated for the financial year ended 31 October 2024 due to a correction of a prior period misstatement in relation to the presentation of finance costs. In the prior year, the distributions to redeemable unitholders were excluded from the calculation of the increase/(decrease) in net assets attributable to redeemable unitholders, rather it was separately presented as an additional change in net assets attributable to redeemable unitholders. In accordance with IAS 32.16A, financial instruments such as redeemable units meet the definition of a financial liability and its related distributions meet the definition of finance costs. The prior year comparative statements have therefore been restated to reclassify such distributions to be included to the total finance costs and accounted as part of the increase/(decrease) in net assets attributable to redeemable unitholders.

The following table presents the impact of the restatement to the statement of comprehensive income and the statement of changes in net assets attributable to redeemable unitholders.

On 18 December 2025, Patrick Boylan resigned as an executive Director of the Manager.

Effective 31 December 2025, the Secretary of the Manager, Apex Group Corporate Administration Services Ireland Limited, merged into Apex IFS Limited as part of an intra-group restructuring and was subsequently renamed Apex IFS Limited.

Other than the above, there have been no events subsequent to the financial year end, which, in the opinion of the Directors, may have had an impact on the financial statements for the financial year ended 31 October 2025.

26. Approval date

The financial statements were approved by the Directors on 20 January 2026.

1895 FONDS FGR

REPORT ON REMUNERATION (UNAUDITED)

The below disclosures are made in respect of the remuneration policies of the BlackRock group ("BlackRock"), as they apply to BlackRock Asset Management Ireland Limited (the "ManCo"). The disclosures are made in accordance with the Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities ("UCITS"), as amended, including in particular by Directive 2014/91/EU of the European Parliament and of the council of 23 July 2014, (the "Directive"), and the "Guidelines on sound remuneration policies under the UCITS Directive and AIFMD" issued by the European Securities and Markets Authority.

BlackRock's UCITS Remuneration Policy (the "UCITS Remuneration Policy") will apply to the EEA entities within the BlackRock group authorised as a ManCo of UCITS funds in accordance with the Directive, and will ensure compliance with the requirements of Article 14b of the Directive, and to UK entities within the BlackRock group authorised by the FCA as a ManCo of a UK UCITS fund.

The ManCo has adopted the UCITS Remuneration Policy, a summary of which is set out below.

Remuneration Governance

BlackRock's remuneration governance in EMEA operates as a tiered structure which includes: (a) the Management Development and Compensation Committee ("MDCC") (which is the global, independent remuneration committee for BlackRock, Inc. and (b) the ManCo's board of directors (the "ManCo's Board"). These bodies are responsible for the determination of BlackRock's remuneration policies which includes reviewing the remuneration policy on a regular basis and being responsible for its implementation.

The implementation of the remuneration policy is annually subject to central and independent review for compliance with policies and procedures for remuneration adopted by the MDCC and by the ManCo's Board. The most recent review found no material issues. The remuneration disclosure is produced and owned by the MDCC and the ManCo's Board.

No material changes were made to the remuneration policy in 2024.

(a) MDCC

The MDCC's purposes include:

- providing oversight of:
 - BlackRock's executive compensation programmes;
 - BlackRock's employee benefit plans; and
 - such other compensation plans as may be established by BlackRock from time to time for which the MDCC is deemed as administrator;
- reviewing and discussing the compensation discussion and analysis included in the BlackRock, Inc. annual proxy statement with management and approving the MDCC's report for inclusion in the proxy statement;
- reviewing, assessing and making reports and recommendations to the BlackRock, Inc. Board of Directors (the 'BlackRock, Inc. Board') as appropriate on BlackRock's talent development and succession planning, with the emphasis on performance and succession at the highest management levels; and
- supporting the boards of the Company's EMEA regulated entities in meeting their remuneration-related obligations by overseeing the design and implementation of EMEA remuneration policy in accordance with applicable regulations.

The MDCC directly retains its own independent compensation consultant, Semler Brossy Consulting Group LLC, who has no relationship with BlackRock, Inc. or the BlackRock, Inc. Board that would interfere with its ability to provide independent advice to the MDCC on compensation matters.

The BlackRock, Inc. Board has determined that all of the members of the MDCC are "independent" within the meaning of the listing standards of the New York Stock Exchange (NYSE), which requires each meet a "non-employee director" standard.

The MDCC held 8 meetings during 2024. The MDCC charter is available on BlackRock, Inc.'s website (www.blackrock.com).

Through its regular reviews, the MDCC continues to be satisfied with the principles of BlackRock's compensation policy and approach.

(b) The ManCo's Board

The ManCo's Board in its supervisory function has the task of supervising, approving and providing oversight of the UCITS Remuneration Policy as it applies to the ManCo and its Identified Staff (as defined below). The responsibilities of the supervisory function include:

- approve, maintain and oversee the implementation of the UCITS Remuneration Policy;
- determine and oversee the remuneration of the members of the management body, provided that insofar the relevant ManCo does not have a separate supervisory function, the remuneration of the member of the management body is determined by the MDCC;
- approve any subsequent material exemptions or changes to the UCITS Remuneration Policy and carefully consider and monitor their effects;
- take into account the inputs provided by all competent corporate functions (i.e., risk management, compliance, human resources, strategic planning, etc.) in the design and oversight of the UCITS Remuneration Policy.

1895 FONDS FGR

REPORT ON REMUNERATION (UNAUDITED) (CONTINUED)

Decision-making process

Remuneration decisions for employees are made once annually in January following the end of the performance year. This timing allows full-year financial results to be considered along with other non-financial goals and objectives. Although the framework for remuneration decision-making is tied to financial performance, significant discretion is used to determine individual variable remuneration based on achievement of strategic and operating results and other considerations such as management and leadership capabilities.

No set formulas are established and no fixed benchmarks are used in determining annual incentive awards. In determining specific individual remuneration amounts, a number of factors are considered including non-financial goals and objectives and overall financial and investment performance (including, where relevant, good outcomes for retail customers). These results are viewed in the aggregate without any specific weighting, and there is no direct correlation between any particular performance measure and the resulting annual incentive award. The variable remuneration awarded to any individual(s) for a particular performance year may also be zero.

Annual incentive awards are paid from a bonus pool.

The size of the projected bonus pool, including cash and equity awards, is reviewed throughout the year by the MDCC and the final total bonus pool is approved after year-end. As part of this review, the MDCC receives actual and projected financial information over the course of the year as well as final year-end information. The financial information that the MDCC receives and considers includes the current year projected income statement and other financial measures compared with prior year results and the current year budget. The MDCC additionally reviews other metrics of BlackRock's financial performance (e.g., net inflows of AUM and investment performance) as well as information regarding market conditions and competitive compensation levels.

The MDCC regularly considers management's recommendation as to the percentage of pre-incentive operating income that will be accrued and reflected as a compensation expense throughout the year for the cash portion of the total annual bonus pool (the "accrual rate"). The accrual rate of the cash portion of the total annual bonus pool may be modified by the MDCC during the year based on its review of the financial information described above. The MDCC does not apply any particular weighting or formula to the information it considers when determining the size of the total bonus pool or the accruals made for the cash portion of the total bonus pool.

Following the end of the performance year, the MDCC approves the final bonus pool amount.

As part of the year-end review process the Enterprise Risk and Regulatory Compliance departments report to the MDCC on any activities, incidents or events that warrant consideration in making compensation decisions.

Individuals are not involved in setting their own remuneration.

Control functions

Each of the control functions (Enterprise Risk, Legal & Compliance, Finance, Human Resources and Internal Audit) has its own organisational structure which is independent of the business units and therefore staff members in control functions are remunerated independently of the businesses they oversee. The head of each control function is either a member of the Global Executive Committee ("GEC"), the global management committee, or has a reporting obligation to the board of directors of BlackRock Group Limited, the parent company of all of BlackRock's EMEA regulated entities, including the ManCo.

Functional bonus pools are determined with reference to the performance of each individual function. The remuneration of the senior members of control functions is directly overseen by the MDCC.

Link between pay and performance

There is a clear and well-defined pay-for-performance philosophy and compensation programmes which are designed to meet the following key objectives as detailed below:

- appropriately balance BlackRock's financial results between shareholders and employees;
- attract, retain and motivate employees capable of making significant contributions to the long-term success of the business;
- align the interests of senior employees with those of shareholders by awarding BlackRock Inc.'s stock as a significant part of both annual and long-term incentive awards;
- control fixed costs by ensuring that compensation expense varies with profitability;
- link a significant portion of an employee's total compensation to the financial and operational performance of the business;
- promote sound and effective risk management across all risk categories, including sustainability risk;
- discourage excessive risk-taking (sustainability related or otherwise); and
- ensure that client interests are not negatively impacted by remuneration awarded on a short-term, mid-term and/or long-term basis.

Driving a high-performance culture is dependent on the ability to measure performance against objectives, values and behaviours in a clear and consistent way. Managers use a 5-point rating scale to provide an overall assessment of an employee's performance, and employees also provide a self-evaluation. The overall, final rating is reconciled during each employee's performance appraisal. Employees are assessed on the manner in which performance is attained as well as the absolute performance itself.

In keeping with the pay-for-performance philosophy, ratings are used to differentiate and reward individual performance – but don't pre-determine compensation outcomes. Compensation decisions remain discretionary and are made as part of the year-end compensation process.

1895 FONDS FGR

REPORT ON REMUNERATION (UNAUDITED) (CONTINUED)

Link between pay and performance (continued)

When setting remuneration levels other factors are considered, as well as individual performance, which may include:

- the performance of the ManCo, the funds managed by the ManCo and/or the relevant functional department;
- factors relevant to an employee individually (e.g., relevant working arrangements (including part-time status if applicable); relationships with clients and colleagues; teamwork; skills; any conduct issues; and, subject to any applicable policy, the impact that any relevant leave of absence may have on contribution to the business);
- the management of risk within the risk profiles appropriate for BlackRock's clients;
- strategic business needs, including intentions regarding retention;
- market intelligence; and
- criticality to business; and
- supporting the firm's approaches to environmental, social and governance factors and diversity, equity and inclusion.

A primary product tool is risk management and, while employees are compensated for strong performance in their management of client assets, they are required to manage risk within the risk profiles appropriate for their clients. Therefore, employees are not rewarded for engaging in high-risk transactions outside of established parameters. Remuneration practices do not provide undue incentives for short-term planning or short-term financial rewards, do not reward unreasonable risk and provide a reasonable balance between the many and substantial risks inherent within the business of investment management, risk management and advisory services.

BlackRock operates a total compensation model for remuneration which includes a base salary, which is contractual, and a discretionary bonus scheme.

BlackRock operates an annual discretionary bonus scheme. Although all employees are eligible to be considered for a discretionary bonus, there is no contractual obligation to make any award to an employee under its discretionary bonus scheme. In exercising discretion to award a discretionary bonus, the factors listed above (under the heading "Link between pay and performance") may be taken into account in addition to any other matters which become relevant to the exercise of discretion in the course of the performance year.

Discretionary bonus awards for all employees, including executive officers, are subject to a guideline that determines the portion paid in cash and the portion paid in BlackRock, Inc. stock and subject to additional vesting/clawback conditions. Stock awards are subject to further performance adjustment through variation in BlackRock, Inc.'s share price over the vesting period. As total annual compensation increases, a greater portion is deferred into stock. The MDCC adopted this approach in 2006 to substantially increase the retention value and shareholder alignment of the compensation package for eligible employees, including the executive officers. The portion deferred into stock vests into three equal instalments over the three years following grant.

Supplementary to the annual discretionary bonus as described above, equity awards may be made to select individuals to provide greater linkage with future business results. These long-term incentive awards have been established individually to provide meaningful incentive for continued performance over a multi-year period recognising the scope of the individual's role, business expertise and leadership skills.

Selected senior leaders are eligible to receive performance-adjusted equity-based awards from the "BlackRock Performance Incentive Plan" ("BPIP"). Awards made from the BPIP have a three-year performance period based on a measurement of As Adjusted Operating Margin¹ and Organic Revenue Growth²

Determination of pay-out will be made based on the firm's achievement relative to target financial results at the conclusion of the performance period. The maximum number of shares that can be earned is 165% of the award in those situations where both metrics achieve pre-determined financial targets. No shares will be earned where the firm's financial performance in both of the above metrics is below a pre-determined performance threshold. These metrics have been selected as key measures of shareholder value which endure across market cycles.

A limited number of investment professionals have a portion of their annual discretionary bonus (as described above) awarded as deferred cash that notionally tracks investment in selected products managed by the employee. The intention of these awards is to align investment professionals with the investment returns of the products they manage through the deferral of compensation into those products. Clients and external evaluators have increasingly viewed more favourably those products where key investors have "skin in the game" through significant personal investments.

Identified Staff

"Identified Staff" comprises the following categories of staff whose professional activities have a material impact on the risk profiles of the ManCo or the funds it manages:

- Board members (Executive and Non-Executive Directors);
- Conducting officers;
- Members of Senior Management; and
- Individuals responsible for internal senior management, risk takers, control functions

¹ As Adjusted Operating Margin: As reported in BlackRock's external filings, reflects adjusted Operating Income divided by Total Revenue net of distribution and servicing expenses and amortisation of deferred sales commissions.

² Revenue Growth: Equal to net new base fees plus net new Aladdin revenue generated in the year (in dollars).

1895 FONDS FGR

REPORT ON REMUNERATION (UNAUDITED) (CONTINUED)

Identified Staff (continued)

The list of Identified Staff will be subject to regular review, being formally reviewed in the event of, but not limited to:

- organisational changes;
- new business initiatives;
- changes in significant influence function lists;
- changes in role responsibilities; and
- revised regulatory direction.

BlackRock applies the proportionality principle in respect of staff identified as "Identified Staff". BlackRock bases its proportionality approach on a combination of factors that it is entitled to take into account based on relevant guidelines. The application of proportionality has been assessed based on the criteria set down in the ESMA Guidelines - i.e., criteria in terms of size, internal organisation and nature, scope and complexity of the activities; group of persons, who have only collectively a material impact on the risk profile of the management company; and structure of the remuneration of identified staff.

Quantitative Remuneration Disclosure

The ManCo is required under the Directive to make quantitative disclosures of remuneration. These disclosures are made in line with BlackRock's interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops BlackRock may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other BlackRock fund disclosures in that same year.

Remuneration information at an individual Fund level is not readily available. Disclosures are provided in relation to (a) the staff of the ManCo; (b) staff who are senior management; (c) staff who have the ability to materially affect the risk profile of the Fund; and (d) staff of companies to which portfolio management and risk management has been formally delegated.

All individuals included in the aggregated figures disclosed are rewarded in line with BlackRock's remuneration policy for their responsibilities across the relevant BlackRock business area. As all individuals have a number of areas of responsibilities, only the portion of remuneration for those individuals' services attributable to the ManCo is included in the aggregate figures disclosed.

Members of staff and senior management of the ManCo typically provide both UCITS and non-UCITS related services in respect of multiple funds, clients and functions of the ManCo and across the broader BlackRock group. Conversely, members of staff and senior management of the broader BlackRock group may provide both UCITS and non-UCITS related services in respect of multiple funds, clients and functions of the broader BlackRock group and of the ManCo. Therefore, the figures disclosed are a sum of individual's portion of remuneration attributable to the ManCo according to an objective apportionment methodology which acknowledges the multiple-service nature of the ManCo and the broader BlackRock group. Accordingly, the figures are not representative of any individual's actual remuneration or their remuneration structure.

The amount of the total remuneration awarded to the ManCo's staff in respect of the ManCo's financial year ending 31 December 2024 is USD 584.3 million. This figure is comprised of fixed remuneration of USD 235.2 million and variable remuneration of USD 349.1 million. There were a total of 4,348 beneficiaries of the remuneration described above.

The amount of the aggregate remuneration awarded by the ManCo in respect of the ManCo's financial year ending 31 December 2024, to its senior management was USD 43.5 million, and to other members of its staff whose actions potentially have a material impact on the risk profile of the ManCo or its funds was USD 64.5 million.

1895 FONDS FGR

SUSTAINABILITY-RELATED DISCLOSURES (UNAUDITED)

Glossary and key definitions

The periodic report disclosures set out below are presented for the year ended 31 October 2025, the “reference period”. Comparative information is presented for the financial year ended 31 October 2024, the “previous reference period”.

All data presented for the Funds’ investments and other quantitative measures disclosed has been calculated based on an average of the value of investments traded and held (i) for actively managed funds, at each quarter end date, and (ii) for index tracking funds, on or around each applicable rebalance date of the Fund’s benchmark index, within the reference period for which the relevant Funds met the criteria of an Article 8 fund. For metrics that are presented with sustainability indicators, the relevant metric calculation relates to the investments for which the underlying ESG data is available, rather than all investments held by the Fund.

All such data presented is unaudited and was not subject to an assurance provided by the Funds’ auditor or a review by a third party.

The term “Assets” shall be deemed to mean the total value of investments held by the Fund throughout the reference period. The total value of investments shall include net short positions (including net short positions achieved through derivatives). BlackRock has taken a proportionate approach to the calculation of taxonomy alignment of its funds, by excluding any exposures achieved through derivatives (including both long and short positions) from the calculation of the degree to which investments made by a fund is in economic activities that qualify as environmentally sustainable under the EU Taxonomy.

Investments shall include cash and cash equivalents as set out by Article 53 of the regulatory technical standards under the Delegated Regulation (EU) 2022/1288. However, IFRS Accounting Standards requires cash and cash equivalents to be treated separately. Therefore, there will be a difference in presentation for the purposes of the overall annual report. Cash and cash equivalents are presented on a settlement date basis.

Sustainable Investments: BlackRock defines Sustainable Investments as investments in issuers or securities that contribute to an environmental or social objective, do not significantly harm any of those objectives and where investee companies follow good governance practices. BlackRock refers to relevant sustainability frameworks to identify the alignment of the investment to environmental or social objectives.

Do no significant harm (“DNSH”): The assessment undertaken by BlackRock to determine whether an investment does no significant harm to any environmental or social objective under SFDR. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an investment does significant harm, which considers both third party data points as well as fundamental insights. Investments are screened against these criteria using system-based controls and any which are considered to be causing significant harm do not qualify as Sustainable Investments.

Sustainability Factors: Environmental, social and employee matters, respect for human rights, anti-corruption and antibribery matters.

Disclaimer

Certain information set out below (the “Information”) has been provided by vendors of market data to BlackRock (some of whom may be Registered Investment Advisors under the Investment Advisers Act of 1940), each, an “Information Provider”, and it may not be reproduced or disseminated in whole or in part without prior written permission of such Information Provider. The Information has not been submitted to, nor received approval from, the US SEC or any other regulatory body. The Information may not be used to create any derivative works, or in connection with, nor does it constitute, an offer to buy or sell, or a promotion or recommendation of, any security, financial instrument or product or trading strategy, nor should it be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. The Information is provided “as is” and the user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. The Information Providers make no representations or express or implied warranties (which are expressly disclaimed), nor shall they incur liability for any errors or omissions in the Information, or for any damages related thereto. The foregoing shall not exclude or limit any liability that may not be excluded or limited by applicable law. Information Providers shall be deemed to be third party beneficiaries with respect to the terms of this paragraph, entitled to enforce such terms against any third party.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

1895 Wereld Aandelen Enhanced Index Fonds

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Aandelen Enhanced Index Fonds (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

- Investment in Sustainable Investments
- Weighted average ESG score of the Fund's holdings that will be equal to or higher than the ESG score of the MSCI All Country World Index EUR (the "Index")
- Reduction of carbon emissions intensity (emissions per \$1 million of sales revenue across the Fund's holdings) relative to the Index
- Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of weapons (including, but not limited to, small arms, cluster munitions, anti-personnel mines, white phosphorus used in incendiary weapons or munitions, depleted uranium munitions, biological, chemical and nuclear weapons) and issuers deriving more than 5% of revenue from small arms retail or distribution
- Exclusion of issuers deriving more than 5% of their revenue from thermal coal extraction
- Exclusion of issuers generating more than 5% of power from thermal coal and issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)
- Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions
- Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production
- Exclusion of issuers deriving more than 5% of revenue from tobacco production
- Exclusion of Issuers deriving more than 5% of revenue from the production of cannabis (for recreational use)
- Exclusion of Issuers deriving more than 5% of revenue from production of fur products
- Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators and/or not involved in the most relevant food and beverage sustainability related industry initiatives assessed by Sustainalytics
- Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by sustainalytics controversy, event and incident indicators
- Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption)
- Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
- Exclusion of issuers involved in such other activities which the Investment Manager has determined (in its absolute discretion) conflict with the Investment Manager's consideration of ESG related issues or characteristics

EU Taxonomy environmental objectives contributed to by the Fund

- Climate Change Adaptation
- Climate Change Mitigation

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Aandelen Enhanced Index Fonds (continued)

● **How did the sustainability indicators perform?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

Sustainability Indicator	Metric	2025	2024	2023	2022
Investment in Sustainable Investments	% of Sustainable Investments held by the Fund	49.24%	49.00%	45.28%	N/A ¹
Reduction of carbon emissions intensity (emissions per \$1 million of sales revenue across the Fund's holdings) relative to the Index	% reduction of carbon emissions intensity of the portfolio relative to the Index	36.75%	37.13%	37.04%	40.07%
Weighted average ESG score of the Fund's holdings that will be equal to or higher than the ESG score of the Index	ESG score % improvement relative to the Index	0.82%	1.03%	1.07%	N/A ¹
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches	One active breach ²	No active breaches	No active breaches	No active breaches

¹This sustainability indicator was incorporated into the Fund's investment strategy in January 2023 and as a result, was not included in the 2022 sustainability-related disclosure.

²During the reference period, the Fund had one active breach due to holding issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands). The breach was identified, reported and rectified as part of BlackRock's standard breach resolution process.

● **...and compared to previous periods?**

The above table provides information about the performance of the sustainability indicators for the previous reference periods (see section "How did the sustainability indicators perform?").

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, whilst the Fund does not have a sustainable investment objective, the Fund invested 49.24% of its holdings in Sustainable Investments in pursuit of its investment objective.

Environmental and social objectives

The Fund invested in Sustainable Investments which contributed to a range of environmental and/or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals and other sustainability-related frameworks ("Environmental and Social Objectives").

Economic activity assessment

An investment was assessed as contributing to an environmental and/or social objective where:

- (i) a minimum proportion of the issuer's business activity contributed to an environmental and/or social objective; or
- (ii) the issuer's business practices contributed to an environmental and/or social objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Aandelen Enhanced Index Fonds (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The indicators for principal adverse impacts (“PAI”) on sustainability factors for each type of investment were assessed using BlackRock’s Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, “How did this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments held during the reference period were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers or companies deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

For the reference period, the proportion of sustainability-related investments is shown in the graph below.

What was the asset allocation?

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference periods.

Asset allocation	% of Investments			
	2025	2024	2023	2022
#1 Aligned with E/S characteristics	99.12%	98.70%	98.38%	99.79%
#2 Other	0.88%	1.30%	1.62%	0.21%
#1A Sustainable	49.24%	49.00%	45.28%	N/A ¹
#1B Other E/S characteristics	49.88%	49.70%	53.10%	N/A ¹
Taxonomy-aligned	2.41%	1.12%	0.00%	N/A ¹
Other environmental	39.85%	37.47%	34.94%	N/A ¹
Social	6.98%	10.41%	10.34%	N/A ¹

¹The Fund did not commit to holding Sustainable Investments until January 2023, and therefore was not included in the 2022 sustainability-related disclosure.

Industrials	Transportation	1.48%
Consumer Staples	Household & Personal Products	1.31%
Consumer Discretionary	Consumer Durables	1.16%
Energy	Oil & Gas Storage & Transportation	0.86%
Energy	Oil & Gas Refining & Marketing	0.51%
Energy	Oil & Gas Equipment & Services	0.31%
Energy	Oil & Gas Exploration & Production	0.23%
Energy	Oil & Gas Drilling	0.01%
Energy	Coal & Consumable Fuels	0.00% ¹

¹During the reference period, the Fund had less than 0.005% exposure to this energy sector, however, this is presented as 0.00% in the table above due to rounding.

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Aandelen Enhanced Index Fonds (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below. For the reference period, 2.41% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

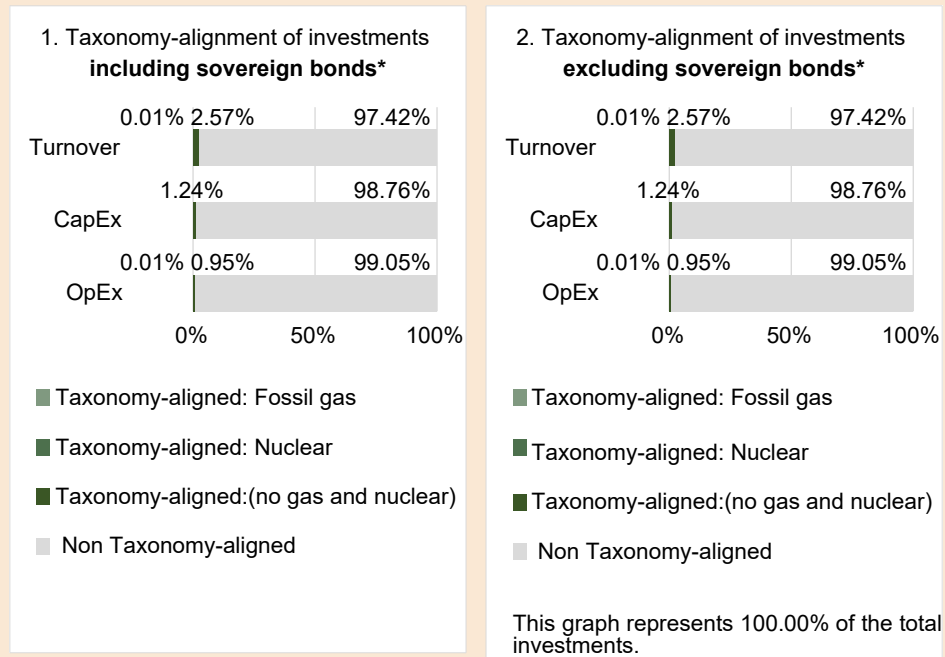

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Aandelen Enhanced Index Fonds (continued)

Taxonomy Alignment (including sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.01%	0.00%	0.01%
Taxonomy-aligned: No gas and nuclear	2.57%	1.24%	0.95%
Non Taxonomy-aligned	97.42%	98.76%	99.05%

Taxonomy Alignment (excluding sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.01%	0.00%	0.01%
Taxonomy-aligned: No gas and nuclear	2.57%	1.24%	0.95%
Non Taxonomy-aligned	97.42%	98.76%	99.05%

During the reference period, the Fund had less than 0.005% exposure to fossil gas and/or nuclear related investments that were EU Taxonomy-aligned; however, this is presented as 0.00% in the tables above due to rounding.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

Environmental objectives	% of Investments
Climate Change Mitigation	2.52%
Climate Change Adaptation	0.02%

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

	% of Investments
Transitional Activities	0.11%
Enabling Activities	1.91%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The following table details the percentage of investments that were aligned with the EU Taxonomy for the current and previous reference periods.

	% of Investments			
	2025	2024	2023	2022
EU Taxonomy Aligned	2.58%	1.34%	0.00%	0.00%

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

For the reference period, 39.85% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Aandelen Enhanced Index Fonds (continued)

Regulation (EU)
2020/852.

What was the share of socially sustainable investments?

For the reference period, 6.98% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, near cash instruments and derivatives however such holdings did not exceed 20%. Such investments were used only for investment purposes in pursuit of the Fund's (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Good governance checks are carried out by the Investment Manager on the issuers to exclude issuers which have been identified, using available data from external ESG research providers, to have (i) failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption), or (ii) been involved in one or more very severe ESG controversies relating to (a) governance structures (b) labour management relations (c) supply chain labour standards (d) discrimination and workforce diversity (e) collective bargaining and unions and (f) bribery and fraud.

Where the Investment Manager appoints one or more external sub-investment managers (i.e. that are not Affiliates of the Investment Manager) to carry out investment management for a Fund, certain external sub-investment managers may use data (a) from one or more external ESG research providers, and/or (b) generated by the Investment Manager using external ESG research provider data, at a point in a month, and updated on a monthly basis, to apply the Good Governance exclusionary criteria. This means that securities of issuers not excluded as at the last ESG data update can be acquired and held in the Fund until implementation of the next data update shows that the issuers should be excluded at which point the holding may be divested as soon as reasonably practicable.

The Investment Manager is also subject to the shareholder engagement requirements of the Shareholders Rights Directive II (SRD) requirements. The SRD aims to strengthen the position of shareholders, enhance transparency and reduce excessive risk within companies traded on regulated EU marketplaces. Further details regarding the Investment Manager's activities under the SRD are available on BlackRock's website at: <https://www.blackrock.com/uk/professionals/solutions/shareholder-rights-directive>.

How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

1895 FONDS FGR

1895 Wereld Multifactor Aandelen Fonds

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Multifactor Aandelen Fonds (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

- Investment in Sustainable Investments
- Weighted average ESG score of the Fund that will be equal to or higher than the ESG score of the MSCI All Country World Index EUR (the "Index")
- Reduction of carbon emissions intensity (emissions per \$1 million of sales revenue across the Fund's holdings) relative to the Index
- Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of weapons (including, but not limited to, small arms, cluster munitions, anti-personnel mines, white phosphorus used in incendiary weapons or munitions, depleted uranium munitions, biological, chemical and nuclear weapons) and issuers deriving more than 5% of revenue from small arms retail or distribution
- Exclusion of issuers deriving more than 5% of their revenue from thermal coal extraction
- Exclusion of issuers generating more than 5% of power from thermal coal and issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)
- Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions
- Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production
- Exclusion of issuers deriving more than 5% of revenue from tobacco production
- Exclusion of Issuers deriving more than 5% of revenue from the production of cannabis (for recreational use)
- Exclusion of Issuers deriving more than 5% of revenue from production of fur products
- Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators and/or not involved in the most relevant food and beverage sustainability related industry initiatives assessed by Sustainalytics
- Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by sustainalytics controversy, event and incident indicators
- Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption)
- Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
- Exclusion of issuers involved in such other activities which the Investment Manager has determined (in its absolute discretion) conflict with the Investment Manager's consideration of ESG related issues or characteristics

EU Taxonomy environmental objectives contributed to by the Fund

- Climate Change Mitigation
- Climate Change Adaptation

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Multifactor Aandelen Fonds (continued)

● **How did the sustainability indicators perform?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

Sustainability Indicator	Metric	2025	2024	2023	2022
Investment in Sustainable Investments	% of Sustainable Investments held by the Fund	53.22%	51.70%	46.83%	N/A ¹
Reduction of carbon emissions intensity (emissions per \$1 million of sales revenue across the Fund's holdings) relative to the Index	% reduction of carbon emissions intensity of the portfolio relative to the Index	34.96%	48.42%	40.61%	34.34%
Weighted average ESG score of the Fund's holdings that will be equal to or higher than the ESG score of the Index	ESG score % improvement relative to the Index	8.39%	9.58%	10.74%	N/A ¹
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches	One active breach ⁴	No active breaches	One active breach ³	Two active breaches ²

¹This sustainability indicator was incorporated into the Fund's investment strategy in January 2023 and as a result, was not included in the 2022 sustainability-related disclosure.

²During the 2022 reference period, the Fund had two active breaches due to holding an issuer that extracts more than 25% of their average production from oil tar sands. The breaches were identified, reported and rectified as part of BlackRock's standard breach resolution process.

³During the 2023 reference period, the Fund had one active breach due to holding an issuer that generated more than 5% of its power from thermal coal. The breach was identified, reported and rectified as part of BlackRock's standard breach resolution process.

⁴During the reference period, the Fund had one active breach due to holding an issuer who extract more than 5% of their average production from oil tar sands (also known as oil sands). The breach was identified, reported and rectified as part of BlackRock's standard breach resolution process.

● **...and compared to previous periods?**

The above table provides information about the performance of the sustainability indicators for the previous reference periods (see section "How did the sustainability indicators perform?").

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, whilst the Fund does not have a sustainable investment objective, the Fund invested 53.22% of its holdings in Sustainable Investments in pursuit of its investment objective.

Environmental and social objectives

The Fund invested in Sustainable Investments which contributed to a range of environmental and/or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals and other sustainability-related frameworks ("Environmental and Social Objectives").

Economic activity assessment

An investment was assessed as contributing to an environmental and/or social objective where:

(i) a minimum proportion of the issuer's business activity contributed to an environmental and/or social objective; or

(ii) the issuer's business practices contributed to an environmental and/or social objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Multifactor Aandelen Fonds (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The indicators for principal adverse impacts (“PAI”)s on sustainability factors for each type of investment were assessed using BlackRock’s Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, “How did this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments held during the reference period were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers or companies deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

● **How did this financial product consider principal adverse impacts on sustainability factors?**

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

For the reference period, the proportion of sustainability-related investments is shown in the graph below.

What was the asset allocation?

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference periods.

Asset allocation	% of Investments			
	2025	2024	2023	2022
#1 Aligned with E/S characteristics	98.55%	98.29%	97.81%	99.80%
#2 Other	1.45%	1.71%	2.19%	0.20%

Energy	Integrated Oil & Gas	0.58%
Energy	Oil & Gas Exploration & Production	0.37%
Energy	Oil & Gas Refining & Marketing	0.33%
Energy	Oil & Gas Drilling	0.14%
Energy	Coal & Consumable Fuels	0.00% ¹

¹During the reference period, the Fund had less than 0.005% exposure to this energy sector, however, this is presented as 0.00% in the table above due to rounding.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Multifactor Aandelen Fonds (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below. For the reference period, 1.97% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

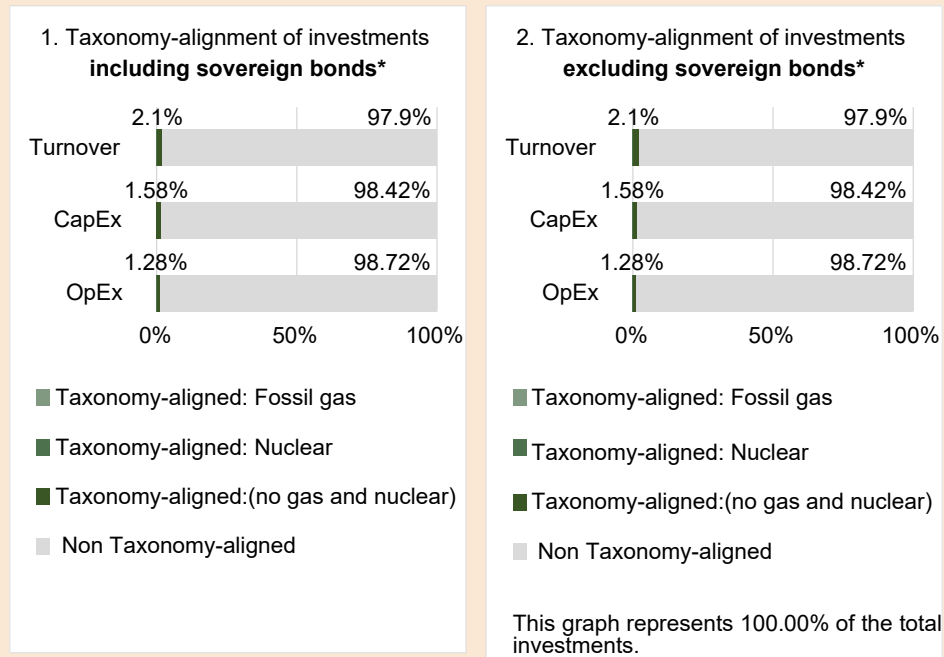

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Multifactor Aandelen Fonds (continued)

Taxonomy Alignment (including sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned: No gas and nuclear	2.10%	1.58%	1.28%
Non Taxonomy-aligned	97.90%	98.42%	98.72%

Taxonomy Alignment (excluding sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned: No gas and nuclear	2.10%	1.58%	1.28%
Non Taxonomy-aligned	97.90%	98.42%	98.72%

During the reference period, the Fund had less than 0.005% exposure to fossil gas and/or nuclear related investments that were EU Taxonomy-aligned; however, this is presented as 0.00% in the tables above due to rounding.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

Environmental objectives	% of Investments
Climate Change Mitigation	2.04%
Climate Change Adaptation	0.02%

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

	% of Investments
Transitional Activities	0.04%
Enabling Activities	1.43%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The following table details the percentage of investments that were aligned with the EU Taxonomy for the current and previous reference periods.

	% of Investments			
	2025	2024	2023	2022
EU Taxonomy Aligned	2.10%	1.39%	0.00%	0.00%

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

For the reference period, 44.84% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Multifactor Aandelen Fonds (continued)

Regulation (EU)
2020/852.

What was the share of socially sustainable investments?

For the reference period, 6.41% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, near cash instruments and derivatives however such holdings did not exceed 20%. Such investments were used only for investment purposes in pursuit of the Fund's (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Good governance checks are carried out by the Investment Manager on the issuers to exclude issuers which have been identified, using available data from external ESG research providers, to have (i) failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption), or (ii) been involved in one or more very severe ESG controversies relating to (a) governance structures (b) labour management relations (c) supply chain labour standards (d) discrimination and workforce diversity (e) collective bargaining and unions and (f) bribery and fraud.

Where the Investment Manager appoints one or more external sub-investment managers (i.e. that are not Affiliates of the Investment Manager) to carry out investment management for a Fund, certain external sub-investment managers may use data (a) from one or more external ESG research providers, and/or (b) generated by the Investment Manager using external ESG research provider data, at a point in a month, and updated on a monthly basis, to apply the Good Governance exclusionary criteria. This means that securities of issuers not excluded as at the last ESG data update can be acquired and held in the Fund until implementation of the next data update shows that the issuers should be excluded at which point the holding may be divested as soon as reasonably practicable.

The Investment Manager is also subject to the shareholder engagement requirements of the Shareholders Rights Directive II (SRD) requirements. The SRD aims to strengthen the position of shareholders, enhance transparency and reduce excessive risk within companies traded on regulated EU marketplaces. Further details regarding the Investment Manager's activities under the SRD are available on BlackRock's website at:

<https://www.blackrock.com/uk/professionals/solutions/shareholder-rights-directive>.

How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

● How does the reference benchmark differ from a broad market index?

Not applicable.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

● How did this financial product perform compared with the reference benchmark?

Not applicable.

● How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

1895 FONDS FGR

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

1895 Euro Obligaties Index Fonds

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
1895 Euro Obligaties Index Fonds

Legal entity identifier:
549300CZECX1QB702169

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 31.84% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Euro Obligaties Index Fonds (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

Investment in Sustainable Investments

Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of weapons (including, but not limited to, small arms, cluster munitions, anti-personnel mines, white phosphorus used in incendiary weapons or munitions, depleted uranium munitions, biological, chemical and nuclear weapons) and issuers deriving more than 5% of revenue from small arms retail or distribution

Exclusion of issuers deriving more than 5% of their revenue from thermal coal extraction

Exclusion of issuers generating more than 5% of power from thermal coal and issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)

Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions

Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production

Exclusion of issuers deriving more than 5% of revenue from tobacco production

Exclusion of Issuers deriving more than 5% of revenue from the production of cannabis (for recreational use)

Exclusion of Issuers deriving more than 5% of revenue from production of fur products

Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators and/or not involved in the most relevant food and beverage sustainability related industry initiatives assessed by Sustainalytics

Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by sustainalytics controversy, event and incident indicators

Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption)

Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG controversies relating to biodiversity and land use, water stress, operational waste (non-hazardous), toxic emissions and waste, governance structures, labour management relations, supply chain labour standards, discrimination and workforce diversity, collective bargaining and unions, and bribery and fraud

Exclusion of issuers involved in such other activities which the Investment Manager has determined (in its absolute discretion) conflict with the Investment Manager's consideration of ESG related issues or characteristics

Limitation and/or exclusion of investments in sovereign issuers which may be deemed to be: involved in social violations and as such may be subject to broad arms embargoes imposed through UN sanctions; be ranked in the bottom 25% of the scores, being scores of 2.5 or lower in the BlackRock Sovereign Sustainable Index; be ranked in the bottom 20% of the sovereign list as assessed by the JP Morgan ESG Methodology; be higher ranking issuers (i.e. those whose scores cause them to be "red flagged") in the Global Peace Index and issuers with a Red flag in the Global Peace index are excluded

EU Taxonomy environmental objectives contributed to by the Fund

Climate Change Mitigation

Climate Change Adaptation

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Euro Obligaties Index Fonds (continued)

● **How did the sustainability indicators perform?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

Sustainability Indicator	Metric	2025	2024	2023	2022
Investment in Sustainable Investments	% of Sustainable Investments held by the Fund	31.84%	41.28%	41.09%	N/A ¹
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches	One active breach ²	No active breaches	No active breaches	No active breaches

¹This sustainability indicator was incorporated into the Fund's investment strategy in January 2023 and as a result, was not included in the 2022 sustainability-related disclosure.

²During the reference period, the Fund had one active breach due to holding an issuer who extract more than 5% of their average production from oil tar sands (also known as oil sands). The breach was identified, reported and rectified as part of BlackRock's standard breach resolution process.

● **...and compared to previous periods?**

The above table provides information about the performance of the sustainability indicators for the previous reference periods (see section "How did the sustainability indicators perform?").

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, whilst the Fund does not have a sustainable investment objective, the Fund invested 31.84% of its holdings in Sustainable Investments in pursuit of its investment objective.

Environmental and social objectives

The Fund invested in Sustainable Investments which contributed to a range of environmental and/or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals and other sustainability-related frameworks ("Environmental and Social Objectives").

Economic activity assessment

An investment was assessed as contributing to an environmental and/or social objective where:

- (i) a minimum proportion of the issuer's business activity contributed to an environmental and/or social objective; or
- (ii) the issuer's business practices contributed to an environmental and/or social objective; or
- (iii) the fixed income securities were aligned with an environmental and/or social objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Euro Obligaties Index Fonds (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The indicators for principal adverse impacts (“PAI”)s on sustainability factors for each type of investment were assessed using BlackRock’s Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, “How did this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments held during the reference period were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers or companies deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

For the reference period, the proportion of sustainability-related investments is shown in the graph below.

What was the asset allocation?

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference periods.

Asset allocation	% of Investments			
	2025	2024	2023	2022
#1 Aligned with E/S characteristics	99.09%	99.42%	99.60%	100.00%
#2 Other	0.91%	0.58%	0.40%	0.00%
#1A Sustainable	31.84%	41.28%	41.09%	N/A ¹
#1B Other E/S characteristics	67.25%	58.14%	58.51%	N/A ¹
Taxonomy-aligned	1.87%	2.86%	0.00%	N/A ¹
Other environmental	24.33%	34.20%	36.75%	N/A ¹
Social	5.64%	4.22%	4.34%	N/A ¹

¹The Fund did not commit to holding Sustainable Investments until January 2023, and therefore was not included in the 2022 sustainability-related disclosure.

● In which economic sectors were the investments made?

The following table details the economic sectors that the Fund was exposed to during the reference period.

Sector	Sub-Sector	% of Investments
Treasuries	Treasuries	53.37%
Government Related	Supranational	7.69%
Government Related	Agency	6.86%
Banking	Banking	6.55%
Securitized	Covered	6.19%
Government Related	Local Authority	4.18%
Government Related	Sovereign	1.28%
Consumer Cyclical	Automotive	1.27%
Electric	Electric	1.19%
Energy	Integrated	0.54%
Energy	Independent	0.04%
Energy	Refining	0.02%
Energy	Oil Field Services	0.02%
Energy	Midstream	0.00% ¹

¹During the reference period, the Fund had less than 0.005% exposure to this energy sector, however, this is presented as 0.00% in the table above due to rounding.

During the reference period, none of the Fund's investments were held in the following sub-sectors (as defined by the Barclays Industry Classification System): metals and mining.

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Euro Obligaties Index Fonds (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below. For the reference period, 1.87% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

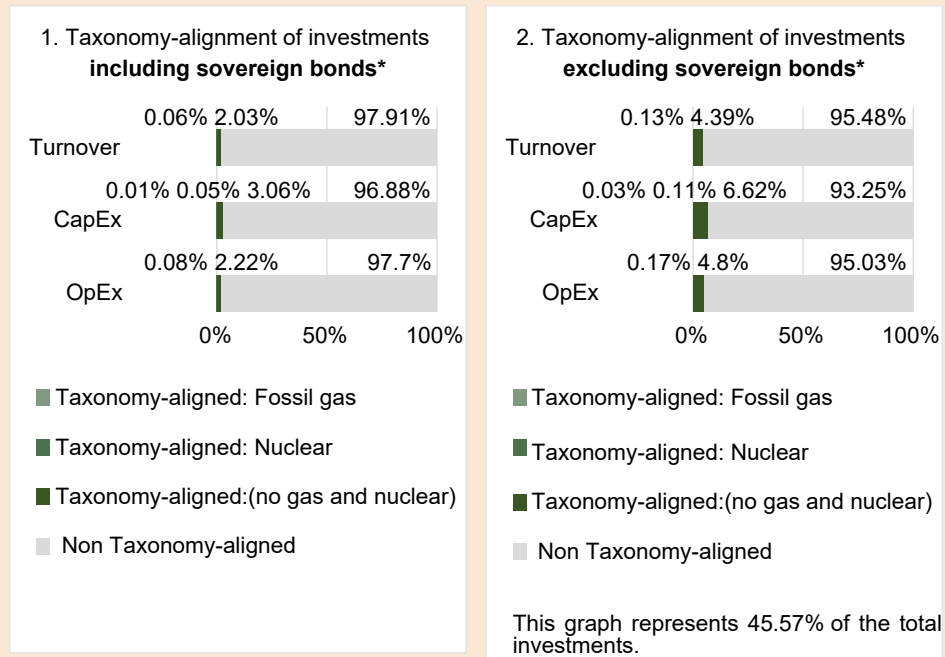

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy Alignment (excluding sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.03%	0.00%
Taxonomy-aligned: Nuclear	0.13%	0.11%	0.17%
Taxonomy-aligned: No gas and nuclear	4.39%	6.62%	4.80%
Non Taxonomy-aligned	95.48%	93.25%	95.03%

During the reference period, the Fund had less than 0.005% exposure to fossil gas and/or nuclear related investments that were EU Taxonomy-aligned; however, this is presented as 0.00% in the tables above due to rounding.

For the reference period, 54.43% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

Environmental objectives	% of Investments
Climate Change Mitigation	2.02%
Climate Change Adaptation	0.03%

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

● What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

	% of Investments
Transitional Activities	0.17%
Enabling Activities	1.02%

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The following table details the percentage of investments that were aligned with the EU Taxonomy for the current and previous reference periods.

	% of Investments			
	2025	2024	2023	2022
EU Taxonomy Aligned	2.09%	3.04%	0.00%	0.00%

Sustainable investments with an environmental objective that do not take into account the criteria

● What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 24.33% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Euro Obligaties Index Fonds (continued)

for environmentally sustainable economic activities under Regulation (EU) 2020/852.

all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 5.64% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, near cash instruments and derivatives however such holdings did not exceed 20%. Such investments were used only for investment purposes in pursuit of the Fund's (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Good governance checks are carried out by the Investment Manager on the issuers to exclude issuers which have been identified, using available data from external ESG research providers, to have (i) failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption), or (ii) been involved in one or more very severe ESG controversies relating to (a) governance structures (b) labour management relations (c) supply chain labour standards (d) discrimination and workforce diversity (e) collective bargaining and unions and (f) bribery and fraud.

Where the Investment Manager appoints one or more external sub-investment managers (i.e. that are not Affiliates of the Investment Manager) to carry out investment management for a Fund, certain external sub-investment managers may use data (a) from one or more external ESG research providers, and/or (b) generated by the Investment Manager using external ESG research provider data, at a point in a month, and updated on a monthly basis, to apply the Good Governance exclusionary criteria. This means that securities of issuers not excluded as at the last ESG data update can be acquired and held in the Fund until implementation of the next data update shows that the issuers should be excluded at which point the holding may be divested as soon as reasonably practicable.

How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

● How does the reference benchmark differ from a broad market index?

Not applicable.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

● How did this financial product perform compared with the reference benchmark?

Not applicable.

● How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

1895 Wereld Bedrijfsobligaties Fonds

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

Investment in Sustainable Investments

Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of weapons (including, but not limited to, small arms, cluster munitions, anti-personnel mines, white phosphorus used in incendiary weapons or munitions, depleted uranium munitions, biological, chemical and nuclear weapons) and issuers deriving more than 5% of revenue from small arms retail or distribution

Exclusion of issuers deriving more than 5% of their revenue from thermal coal extraction

Exclusion of issuers generating more than 5% of power from thermal coal and issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)

Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions

Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production

Exclusion of issuers deriving more than 5% of revenue from tobacco production

Exclusion of Issuers deriving more than 5% of revenue from the production of cannabis (for recreational use)

Exclusion of Issuers deriving more than 5% of revenue from production of fur products

Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators and/or not involved in the most relevant food and beverage sustainability related industry initiatives assessed by Sustainalytics

Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by sustainalytics controversy, event and incident indicators

Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption)

Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG controversies relating to biodiversity and land use, water stress, operational waste (non-hazardous), toxic emissions and waste, governance structures, labour management relations, supply chain labour standards, discrimination and workforce diversity, collective bargaining and unions, and bribery and fraud

Exclusion of issuers involved in such other activities which the Investment Manager has determined (in its absolute discretion) conflict with the Investment Manager's consideration of ESG related issues or characteristics

Limitation and/or exclusion of investments in Sovereign issuers which may be deemed to be: involved in social violations and as such may be subject to broad arms embargoes imposed through UN sanctions; be ranked in the bottom 25% of the scores, being scores of 2.5 or lower in the BlackRock Sovereign Sustainable Index; be ranked in the bottom 20% of the sovereign list as assessed by the JP Morgan ESG Methodology; be higher ranking issuers (ie those whose scores cause them to be "red flagged") in the Global Peace Index, issuers with a Red flag in the Global Peace index are excluded

EU Taxonomy environmental objectives contributed to by the Fund

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Bedrijfsobligaties Fonds (continued)

● **How did the sustainability indicators perform?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

Sustainability Indicator	Metric	2025	2024	2023	2022
Investment in Sustainable Investments	% of Sustainable Investments held by the Fund	37.68%	47.46%	44.66%	N/A ¹
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches	One active breach ³	One active breach ²	No active breaches	No active breaches

¹This sustainability indicator was incorporated into the Fund's investment strategy in January 2023 and as a result, was not included in the 2022 sustainability-related disclosure.

²During the previous reference period, the Fund had one active breach due to holding an issuer that failed the Fund's Good Governance criteria. The breach was identified, reported and rectified as part of Blackrock's standard breach resolution process.

³During the reference period, the Fund had one active breach due to holding an issuer who extract more than 5% of their average production from oil tar sands (also known as oil sands). The breach was identified, reported and rectified as part of BlackRock's standard breach resolution process.

● **...and compared to previous periods?**

The above table provides information about the performance of the sustainability indicators for the previous reference periods (see section "How did the sustainability indicators perform?").

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, whilst the Fund does not have a sustainable investment objective, the Fund invested 37.68% of its holdings in Sustainable Investments in pursuit of its investment objective.

Environmental and social objectives

The Fund invested in Sustainable Investments which contributed to a range of environmental and/or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals and other sustainability-related frameworks ("Environmental and Social Objectives").

Economic activity assessment

An investment was assessed as contributing to an environmental and/or social objective where:

- (i) a minimum proportion of the issuer's business activity contributed to an environmental and/or social objective; or
- (ii) the issuer's business practices contributed to an environmental and/or social objective; or
- (iii) the fixed income securities were aligned with an environmental and/or social objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Bedrijfsobligaties Fonds (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The indicators for principal adverse impacts (“PAI”) on sustainability factors for each type of investment were assessed using BlackRock’s Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, “How did this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments held during the reference period were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers or companies deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

For the reference period, the proportion of sustainability-related investments is shown in the graph below.

What was the asset allocation?

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference periods.

Asset allocation	% of Investments			
	2025	2024	2023	2022
#1 Aligned with E/S characteristics	98.34%	98.74%	97.96%	99.20%
#2 Other	1.66%	1.26%	2.04%	0.80%
#1A Sustainable	37.68%	47.46%	44.66%	N/A ¹
#1B Other E/S characteristics	60.66%	51.28%	53.30%	N/A ¹
Taxonomy-aligned	2.55%	3.44%	0.00%	N/A ¹
Other environmental	31.32%	40.72%	40.91%	N/A ¹
Social	3.81%	3.30%	3.75%	N/A ¹

¹The Fund did not commit to holding Sustainable Investments until January 2023, and therefore was not included in the 2022 sustainability-related disclosure.

Energy	Refining	0.06%
Energy	Oil Field Services	0.06%

During the reference period, none of the Fund's investments were held in the following sub-sectors (as defined by the Barclays Industry Classification System): metals and mining.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Bedrijfsobligaties Fonds (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below. For the reference period, 2.55% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

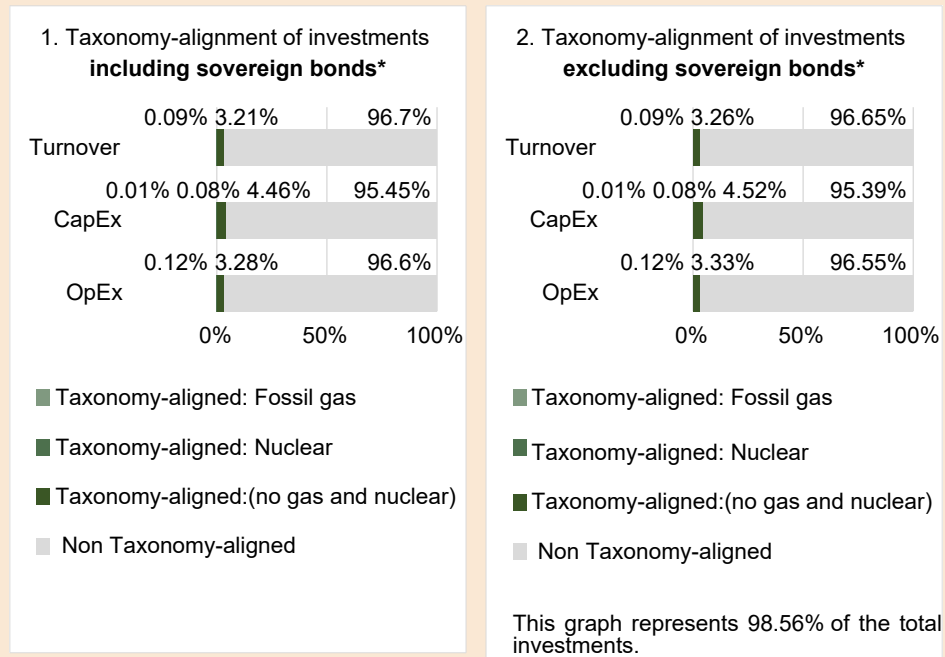

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Bedrijfsobligaties Fonds (continued)

Taxonomy Alignment (including sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.01%	0.00%
Taxonomy-aligned: Nuclear	0.09%	0.08%	0.12%
Taxonomy-aligned: No gas and nuclear	3.21%	4.46%	3.28%
Non Taxonomy-aligned	96.70%	95.45%	96.60%

Taxonomy Alignment (excluding sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.01%	0.00%
Taxonomy-aligned: Nuclear	0.09%	0.08%	0.12%
Taxonomy-aligned: No gas and nuclear	3.26%	4.52%	3.33%
Non Taxonomy-aligned	96.65%	95.39%	96.55%

During the reference period, the Fund had less than 0.005% exposure to fossil gas and/or nuclear related investments that were EU Taxonomy-aligned; however, this is presented as 0.00% in the tables above due to rounding.

For the reference period, 1.44% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

Environmental objectives	% of Investments
Climate Change Mitigation	3.15%
Climate Change Adaptation	0.08%

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

● What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

	% of Investments
Transitional Activities	0.10%
Enabling Activities	1.39%

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The following table details the percentage of investments that were aligned with the EU Taxonomy for the current and previous reference periods.

	% of Investments			
	2025	2024	2023	2022
EU Taxonomy Aligned	3.30%	3.79%	0.00%	0.00%

Sustainable investments with an environmental objective that do not take into account the criteria

● What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 31.32% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Bedrijfsobligaties Fonds (continued)

for environmentally sustainable economic activities under Regulation (EU) 2020/852.

all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 3.81% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, near cash instruments and derivatives however such holdings did not exceed 20%. Such investments were used only for investment purposes in pursuit of the Fund's (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Good governance checks are carried out by the Investment Manager on the issuers to exclude issuers which have been identified, using available data from external ESG research providers, to have (i) failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption), or (ii) been involved in one or more very severe ESG controversies relating to (a) governance structures (b) labour management relations (c) supply chain labour standards (d) discrimination and workforce diversity (e) collective bargaining and unions and (f) bribery and fraud.

Where the Investment Manager appoints one or more external sub-investment managers (i.e. that are not Affiliates of the Investment Manager) to carry out investment management for a Fund, certain external sub-investment managers may use data (a) from one or more external ESG research providers, and/or (b) generated by the Investment Manager using external ESG research provider data, at a point in a month, and updated on a monthly basis, to apply the Good Governance exclusionary criteria. This means that securities of issuers not excluded as at the last ESG data update can be acquired and held in the Fund until implementation of the next data update shows that the issuers should be excluded at which point the holding may be divested as soon as reasonably practicable.

How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

1895 Wereld Investment Grade Obligaties Fonds

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

Investment in Sustainable Investments

Investment in use-of-proceeds bonds

Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of weapons (including, but not limited to, small arms, cluster munitions, anti-personnel mines, white phosphorus used in incendiary weapons or munitions, depleted uranium munitions, biological, chemical and nuclear weapons) and issuers deriving more than 5% of revenue from small arms retail or distribution

Exclusion of issuers deriving more than 5% of their revenue from thermal coal extraction

Exclusion of issuers generating more than 5% of power from thermal coal and issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)

Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions

Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production

Exclusion of issuers deriving more than 5% of revenue from tobacco production

Exclusion of Issuers deriving more than 5% of revenue from the production of cannabis (for recreational use)

Exclusion of Issuers deriving more than 5% of revenue from production of fur products

Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators and/or not involved in the most relevant food and beverage sustainability related industry initiatives assessed by Sustainalytics

Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by sustainalytics controversy, event and incident indicators

Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption)

Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste

Exclusion of issuers involved in such other activities which the Investment Manager has determined (in its absolute discretion) conflict with the Investment Manager's consideration of ESG related issues or characteristics

Limitation and/or exclusion of investments in Sovereign issuers which may be deemed to be: involved in social violations and as such may be subject to broad arms embargoes imposed through UN sanctions; be ranked in the bottom 25% of the scores, being scores of 2.5 or lower in the BlackRock Sovereign Sustainable Index; be ranked in the bottom 20% of the sovereign list as assessed by the JP Morgan ESG Methodology; be higher ranking issuers (ie those whose scores cause them to be "red flagged") in the Global Peace Index, issuers with a Red flag in the Global Peace index are excluded

Climate Change Adaptation

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Investment Grade Obligaties Fonds (continued)

● **How did the sustainability indicators perform?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

Sustainability Indicator	Metric	2025	2024	2023	2022
Investment in Sustainable Investments	% of Sustainable Investments held by the Fund	20.97%	32.74%	31.29%	N/A ¹
Investment in use-of-proceeds bonds	% use-of-proceeds bonds held by the Fund	15.06%	29.12%	22.56%	N/A ¹
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches	No active breaches	No active breaches	No active breaches	No active breaches

¹This sustainability indicator was incorporated into the Fund's investment strategy in January 2023 and as a result, was not included in the 2022 sustainability-related disclosure.

● **...and compared to previous periods?**

The above table provides information about the performance of the sustainability indicators for the previous reference periods (see section "How did the sustainability indicators perform?").

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, whilst the Fund does not have a sustainable investment objective, the Fund invested 20.97% of its holdings in Sustainable Investments in pursuit of its investment objective.

Environmental and social objectives

The Fund invested in Sustainable Investments which contributed to a range of environmental and/or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals and other sustainability-related frameworks ("Environmental and Social Objectives").

Economic activity assessment

An investment was assessed as contributing to an environmental and/or social objective where:

- (i) a minimum proportion of the issuer's business activity contributed to an environmental and/or social objective; or
- (ii) the issuer's business practices contributed to an environmental and/or social objective; or
- (iii) the use of proceeds was assessed as contributing to an environmental and/or social objective such as green bonds, social bonds, and sustainability bonds; or
- (iv) the fixed income securities were aligned with an environmental and/or social objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Investment Grade Obligaties Fonds (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The indicators for principal adverse impacts (“PAI”) on sustainability factors for each type of investment were assessed using BlackRock’s Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, “How did this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments held during the reference period were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers or companies deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

● **How did this financial product consider principal adverse impacts on sustainability factors?**

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

1895 Wereld Investment Grade Obligaties Fonds (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

For the reference period, the proportion of sustainability-related investments is shown in the graph below.

What was the asset allocation?

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference periods.

Asset allocation	% of Investments			
	2025	2024	2023	2022
#1 Aligned with E/S characteristics	95.58%	96.87%	96.13%	99.28%
#2 Other	4.42%	3.13%	3.87%	0.72%
#1A Sustainable	20.97%	32.74%	31.29%	N/A ¹
#1B Other E/S characteristics	74.61%	64.13%	64.84%	N/A ¹
Taxonomy-aligned	0.65%	1.63%	0.00%	N/A ¹
Other environmental	16.41%	28.62%	28.74%	N/A ¹
Social	3.91%	2.48%	2.55%	N/A ¹

¹The Fund did not commit to holding Sustainable Investments until January 2023, and therefore was not included in the 2022 sustainability-related disclosure.

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Investment Grade Obligaties Fonds (continued)

● In which economic sectors were the investments made?

The following table details the economic sectors representing 1% or more of investments held that the Fund was exposed to during the reference period.

Sector	Sub-Sector	% of Investments
Treasuries	Treasuries	50.00%
Securitized	ABS	12.07%
Securitized	MBS Pass-Through	9.27%
Government Related	Agency	9.03%
Government Related	Local Authority	5.06%
Government Related	Supranational	3.78%
Securitized	Covered	2.43%
Government Related	Sovereign	2.24%

During the reference period, none of the Fund's investments were held in the following sub-sectors (as defined by the Barclays Industry Classification System): integrated, independent, midstream, oil field services, refining, or metals and mining.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Investment Grade Obligaties Fonds (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below. For the reference period, 0.65% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

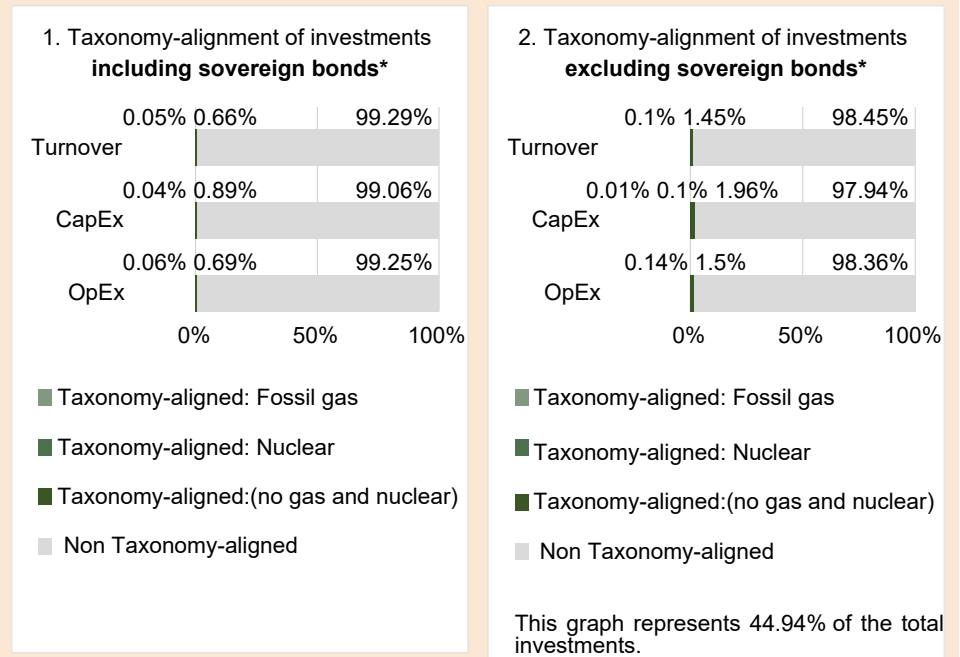

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Investment Grade Obligaties Fonds (continued)

Taxonomy Alignment (including sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.05%	0.04%	0.06%
Taxonomy-aligned: No gas and nuclear	0.66%	0.89%	0.69%
Non Taxonomy-aligned	99.29%	99.06%	99.25%

Taxonomy Alignment (excluding sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.01%	0.00%
Taxonomy-aligned: Nuclear	0.10%	0.10%	0.14%
Taxonomy-aligned: No gas and nuclear	1.45%	1.96%	1.50%
Non Taxonomy-aligned	98.45%	97.94%	98.36%

During the reference period, the Fund had less than 0.005% exposure to fossil gas and/or nuclear related investments that were EU Taxonomy-aligned; however, this is presented as 0.00% in the tables above due to rounding.

For the reference period, 55.06% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

Environmental objectives	% of Investments
Climate Change Mitigation	0.70%
Climate Change Adaptation	0.00%

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

● What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

	% of Investments
Transitional Activities	0.08%
Enabling Activities	0.36%

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The following table details the percentage of investments that were aligned with the EU Taxonomy for the current and previous reference periods.

	% of Investments			
	2025	2024	2023	2022
EU Taxonomy Aligned	0.71%	1.66%	0.00%	0.00%

Sustainable investments with an environmental objective that do not take into account the criteria

● What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 16.41% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Wereld Investment Grade Obligaties Fonds (continued)

for environmentally sustainable economic activities under Regulation (EU) 2020/852.

all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 3.91% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, near cash instruments and derivatives however such holdings did not exceed 20%. Such investments were used only for investment purposes in pursuit of the Fund's (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Good governance checks are carried out by the Investment Manager on the issuers to exclude issuers which have been identified, using available data from external ESG research providers, to have (i) failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption), or (ii) been involved in one or more very severe ESG controversies relating to (a) governance structures (b) labour management relations (c) supply chain labour standards (d) discrimination and workforce diversity (e) collective bargaining and unions and (f) bribery and fraud.

Where the Investment Manager appoints one or more external sub-investment managers (i.e. that are not Affiliates of the Investment Manager) to carry out investment management for a Fund, certain external sub-investment managers may use data (a) from one or more external ESG research providers, and/or (b) generated by the Investment Manager using external ESG research provider data, at a point in a month, and updated on a monthly basis, to apply the Good Governance exclusionary criteria. This means that securities of issuers not excluded as at the last ESG data update can be acquired and held in the Fund until implementation of the next data update shows that the issuers should be excluded at which point the holding may be divested as soon as reasonably practicable.

How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

1895 FONDS FGR

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

1895 Aandelen Macro Opportunities Fonds

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
1895 Aandelen Macro Opportunities Fonds

Legal entity identifier:
549300DFQE8580L7J038

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 48.87% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Macro Opportunities Fonds (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

Investment in Sustainable Investments

Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of weapons (including, but not limited to, small arms, cluster munitions, anti-personnel mines, white phosphorus used in incendiary weapons or munitions, depleted uranium munitions, biological, chemical and nuclear weapons) and issuers deriving more than 5% of revenue from small arms retail or distribution

Exclusion of issuers deriving more than 5% of their revenue from thermal coal extraction

Exclusion of issuers generating more than 5% of power from thermal coal and issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)

Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions

Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production

Exclusion of issuers deriving more than 5% of revenue from tobacco production

Exclusion of Issuers deriving more than 5% of revenue from the production of cannabis (for recreational use)

Exclusion of Issuers deriving more than 5% of revenue from production of fur products

Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators and/or not involved in the most relevant food and beverage sustainability related industry initiatives assessed by Sustainalytics

Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by sustainalytics controversy, event and incident indicators

Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption)

Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste

Exclusion of issuers involved in such other activities which the Investment Manager has determined (in its absolute discretion) conflict with the Investment Manager's consideration of ESG related issues or characteristics

EU Taxonomy environmental objectives contributed to by the Fund

Climate Change Mitigation

Climate Change Adaptation

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Macro Opportunities Fonds (continued)

● **How did the sustainability indicators perform?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

Sustainability Indicator	Metric	2025	2024	2023	2022
Investment in Sustainable Investments	% of Sustainable Investments held by the Fund	48.87%	46.13%	40.74%	N/A ¹
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches	One active breach ²	No active breaches	No active breaches	No active breaches

¹This sustainability indicator was incorporated into the Fund's investment strategy in January 2023 and as a result, was not included in the 2022 sustainability-related disclosure.

²During the reference period, the Fund had one active breach due to holding issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands). The breach was identified, reported and rectified as part of BlackRock's standard breach resolution process.

● **...and compared to previous periods?**

The above table provides information about the performance of the sustainability indicators for the previous reference periods (see section "How did the sustainability indicators perform?").

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, whilst the Fund does not have a sustainable investment objective, the Fund invested 48.87% of its holdings in Sustainable Investments in pursuit of its investment objective.

Environmental and social objectives

The Fund invested in Sustainable Investments which contributed to a range of environmental and/or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals and other sustainability-related frameworks ("Environmental and Social Objectives").

Economic activity assessment

An investment was assessed as contributing to an environmental and/or social objective where:

- (i) a minimum proportion of the issuer's business activity contributed to an environmental and/or social objective; or
- (ii) the issuer's business practices contributed to an environmental and/or social objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Macro Opportunities Fonds (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The indicators for principal adverse impacts (“PAI”) on sustainability factors for each type of investment were assessed using BlackRock’s Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, “How did this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments held during the reference period were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers or companies deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Macro Opportunities Fonds (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

For the reference period, the proportion of sustainability-related investments is shown in the graph below.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference periods.

Asset allocation	% of Investments			
	2025	2024	2023	2022
#1 Aligned with E/S characteristics	99.02%	98.25%	98.00%	99.94%
#2 Other	0.98%	1.75%	2.00%	0.06%
#1A Sustainable	48.87%	46.13%	40.74%	N/A ¹
#1B Other E/S characteristics	50.15%	52.12%	57.26%	N/A ¹
Taxonomy-aligned	2.12%	0.71%	0.00%	N/A ¹
Other environmental	41.02%	36.25%	30.41%	N/A ¹
Social	5.73%	9.17%	10.33%	N/A ¹

¹The Fund did not commit to holding Sustainable Investments until January 2023, and therefore was not included in the 2022 sustainability-related disclosure.

1895 Aandelen Macro Opportunities Fonds (continued)

● In which economic sectors were the investments made?

The following table details the economic sectors that the Fund was exposed to during the reference period.

Sector	Sub-Sector	% of Investments
Information Technology	Semiconductors & Semiconductor Equipment	11.29%
Financials	Banks	9.29%
Information Technology	Software & Services	8.03%
Industrials	Capital Goods	7.89%
Communication	Media & Entertainment	7.41%
Financials	Financial Services	7.37%
Information Technology	Tech Hardware & Equipment	6.84%
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.94%
Materials	Materials	4.27%
Health Care	Pharma, Biotech & Life Sciences	3.42%
Consumer Staples	Food Beverage Tobacco	3.35%
Health Care	Health Care Equipment & Services	2.96%
Consumer Discretionary	Autos & Components	2.81%
Financials	Insurance	2.74%
Industrials	Commercial & Professional Services	2.41%
Consumer Discretionary	Consumer Services	2.00%
Consumer Staples	Household & Personal Products	1.73%
Industrials	Transportation	1.72%
Consumer Staples	Consumer Staples Distribution & Retail	1.41%
Energy	Integrated Oil & Gas	1.30%
Consumer Discretionary	Consumer Durables	1.22%
Utilities	Utilities	1.17%
Energy	Oil & Gas Storage & Transportation	0.32%
Energy	Oil & Gas Equipment & Services	0.15%
Energy	Oil & Gas Refining & Marketing	0.13%
Energy	Oil & Gas Exploration & Production	0.06%

During the reference period, none of the Fund's investments were held in the following sub-sectors (as defined by the Global Industry Classification System): oil and gas drilling, coal and consumable fuels.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Macro Opportunities Fonds (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below. For the reference period, 2.12% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

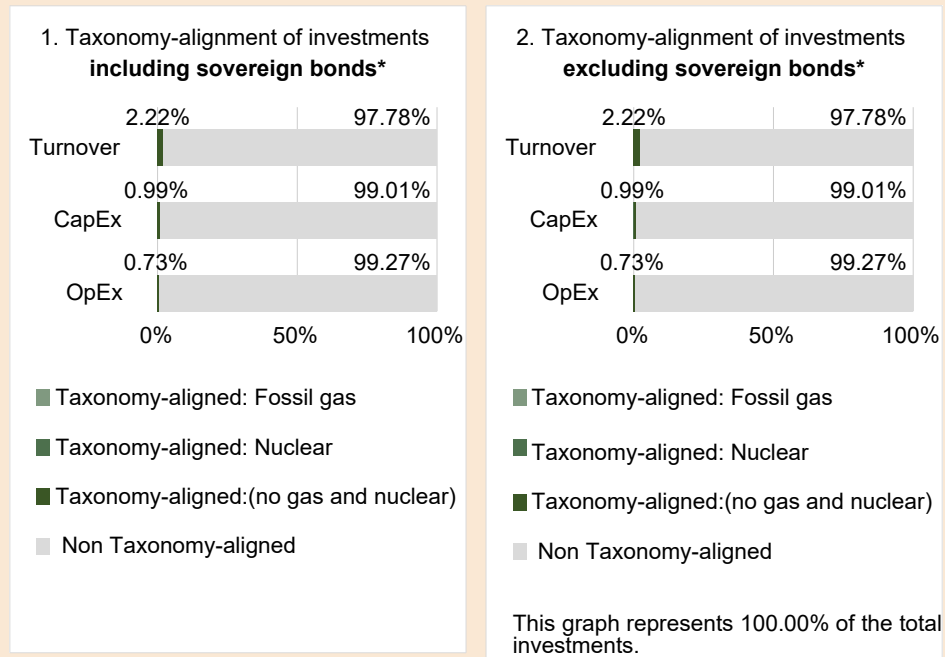

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Macro Opportunities Fonds (continued)

Taxonomy Alignment (including sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned: No gas and nuclear	2.22%	0.99%	0.73%
Non Taxonomy-aligned	97.78%	99.01%	99.27%

Taxonomy Alignment (excluding sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned: No gas and nuclear	2.22%	0.99%	0.73%
Non Taxonomy-aligned	97.78%	99.01%	99.27%

During the reference period, the Fund had less than 0.005% exposure to fossil gas and/or nuclear related investments that were EU Taxonomy-aligned; however, this is presented as 0.00% in the tables above due to rounding.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

Environmental objectives	% of Investments
Climate Change Mitigation	2.18%
Climate Change Adaptation	0.01%

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

● What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

	% of Investments
Transitional Activities	0.08%
Enabling Activities	1.73%

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The following table details the percentage of investments that were aligned with the EU Taxonomy for the current and previous reference periods.

	% of Investments			
	2025	2024	2023	2022
EU Taxonomy Aligned	2.22%	0.85%	0.00%	0.00%

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under

● What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 41.02% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Macro Opportunities Fonds (continued)

Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

For the reference period, 5.73% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, near cash instruments and derivatives however such holdings did not exceed 20%. Such investments were used only for investment purposes in pursuit of the Fund's (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Good governance checks are carried out by the Investment Manager on the issuers to exclude issuers which have been identified, using available data from external ESG research providers, to have (i) failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption), or (ii) been involved in one or more very severe ESG controversies relating to (a) governance structures (b) labour management relations (c) supply chain labour standards (d) discrimination and workforce diversity (e) collective bargaining and unions and (f) bribery and fraud.

Where the Investment Manager appoints one or more external sub-investment managers (i.e. that are not Affiliates of the Investment Manager) to carry out investment management for a Fund, certain external sub-investment managers may use data (a) from one or more external ESG research providers, and/or (b) generated by the Investment Manager using external ESG research provider data, at a point in a month, and updated on a monthly basis, to apply the Good Governance exclusionary criteria. This means that securities of issuers not excluded as at the last ESG data update can be acquired and held in the Fund until implementation of the next data update shows that the issuers should be excluded at which point the holding may be divested as soon as reasonably practicable.

The Investment Manager is also subject to the shareholder engagement requirements of the Shareholders Rights Directive II (SRD) requirements. The SRD aims to strengthen the position of shareholders, enhance transparency and reduce excessive risk within companies traded on regulated EU marketplaces. Further details regarding the Investment Manager's activities under the SRD are available on BlackRock's website at: <https://www.blackrock.com/uk/professionals/solutions/shareholder-rights-directive>.

How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

1895 FONDS FGR

1895 Aandelen Thematic Opportunities Fonds

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
1895 Aandelen Thematic Opportunities Fonds

Legal entity identifier:
549300RBYFIFUHPOZT98

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.76% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Thematic Opportunities Fonds (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

Investment in Sustainable Investments

Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of weapons (including, but not limited to, small arms, cluster munitions, anti-personnel mines, white phosphorus used in incendiary weapons or munitions, depleted uranium munitions, biological, chemical and nuclear weapons) and issuers deriving more than 5% of revenue from small arms retail or distribution

Exclusion of issuers deriving more than 5% of their revenue from thermal coal extraction

Exclusion of issuers generating more than 5% of power from thermal coal and issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)

Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions

Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production

Exclusion of issuers deriving more than 5% of revenue from tobacco production

Exclusion of Issuers deriving more than 5% of revenue from the production of cannabis (for recreational use)

Exclusion of Issuers deriving more than 5% of revenue from production of fur products

Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators and/or not involved in the most relevant food and beverage sustainability related industry initiatives assessed by Sustainalytics

Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by sustainalytics controversy, event and incident indicators

Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption)

Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG controversies relating to biodiversity and land use, water stress, operational waste (non-hazardous), toxic emissions and waste, governance structures, labour management relations, supply chain labour standards, discrimination and workforce diversity, collective bargaining and unions, and bribery and fraud

Exclusion of issuers involved in such other activities which the Investment Manager has determined (in its absolute discretion) conflict with the Investment Manager's consideration of ESG related issues or characteristics

EU Taxonomy environmental objectives contributed to by the Fund

Climate Change Mitigation

Climate Change Adaptation

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Thematic Opportunities Fonds (continued)

● **How did the sustainability indicators perform?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund’s prospectus.

Sustainability Indicator	Metric	2025	2024	2023	2022
Investment in Sustainable Investments	% of Sustainable Investments held by the Fund	73.76%	81.63%	74.35%	N/A ¹
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches	One active breach ²	No active breaches	No active breaches	No active breaches

¹This sustainability indicator was incorporated into the Fund's investment strategy in January 2023 and as a result, was not included in the 2022 sustainability-related disclosure.

² During the reference period, the Fund had one active breach due to holding issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands). The breach was identified, reported and rectified as part of BlackRock’s standard breach resolution process.

● **...and compared to previous periods?**

The above table provides information about the performance of the sustainability indicators for the previous reference periods (see section “How did the sustainability indicators perform?”).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, whilst the Fund does not have a sustainable investment objective, the Fund invested 73.76% of its holdings in Sustainable Investments in pursuit of its investment objective.

Environmental and social objectives

The Fund invested in Sustainable Investments which contributed to a range of environmental and/or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals and other sustainability-related frameworks (“Environmental and Social Objectives”).

Economic activity assessment

An investment was assessed as contributing to an environmental and/or social objective where:

- (i) a minimum proportion of the issuer’s business activity contributed to an environmental and/or social objective; or
- (ii) the issuer’s business practices contributed to an environmental and/or social objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Thematic Opportunities Fonds (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The indicators for principal adverse impacts (“PAI”) on sustainability factors for each type of investment were assessed using BlackRock’s Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, “How did this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments held during the reference period were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers or companies deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

For the reference period, the proportion of sustainability-related investments is shown in the graph below.

What was the asset allocation?

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference periods.

Asset allocation	% of Investments			
	2025	2024	2023	2022
#1 Aligned with E/S characteristics	96.82%	96.87%	96.42%	99.99%
#2 Other	3.18%	3.13%	3.58%	0.01%
#1A Sustainable	73.76%	81.63%	74.35%	N/A ¹
#1B Other E/S characteristics	23.06%	15.24%	22.07%	N/A ¹
Taxonomy-aligned	6.61%	11.95%	0.00%	N/A ¹
Other environmental	58.93%	54.73%	58.53%	N/A ¹
Social	8.22%	14.95%	15.82%	N/A ¹

¹The Fund did not commit to holding Sustainable Investments until January 2023, and therefore was not included in the 2022 sustainability-related disclosure.

● In which economic sectors were the investments made?

The following table details the economic sectors representing 1% or more of investments held that the Fund was exposed to during the reference period.

Sector	Sub-Sector	% of Investments
Industrials	Capital Goods	20.15%
Information Technology	Semiconductors & Semiconductor Equipment	12.78%
Information Technology	Software & Services	9.95%
Health Care	Pharma, Biotech & Life Sciences	8.22%
Information Technology	Tech Hardware & Equipment	8.20%
Materials	Materials	6.85%
Health Care	Health Care Equipment & Services	5.07%
Utilities	Utilities	3.19%
Communication	Media & Entertainment	2.94%
Industrials	Commercial & Professional Services	2.72%
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.47%
Consumer Staples	Food Beverage Tobacco	2.31%
Consumer Discretionary	Consumer Durables	2.19%
Financials	Banks	2.19%
Consumer Discretionary	Consumer Services	1.95%
Financials	Financial Services	1.74%
Financials	Insurance	1.45%
Consumer Discretionary	Autos & Components	1.28%
Consumer Staples	Consumer Staples Distribution & Retail	1.12%
Energy	Oil & Gas Storage & Transportation	0.29%
Energy	Integrated Oil & Gas	0.16%
Energy	Oil & Gas Exploration & Production	0.05%
Energy	Oil & Gas Refining & Marketing	0.04%
Energy	Oil & Gas Equipment & Services	0.03%
Energy	Oil & Gas Drilling	0.01%
Energy	Coal & Consumable Fuels	0.00% ¹

¹During the reference period, the Fund had less than 0.005% exposure to this energy sector, however, this is presented as 0.00% in the table above due to rounding.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Thematic Opportunities Funds (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below. For the reference period, 6.61% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

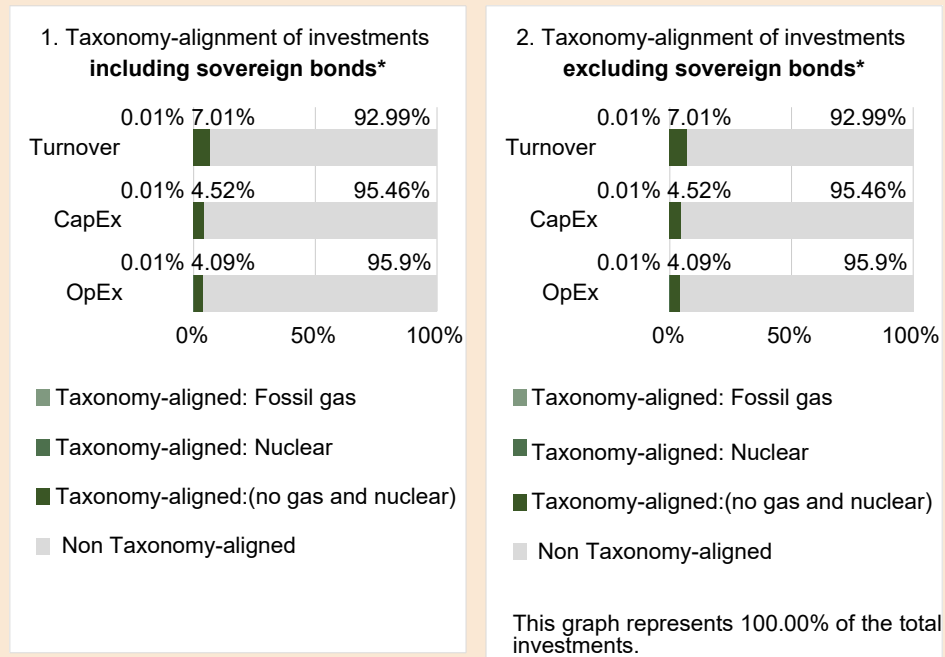

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Thematic Opportunities Fonds (continued)

Taxonomy Alignment (including sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.01%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned: No gas and nuclear	7.01%	4.52%	4.09%
Non Taxonomy-aligned	92.99%	95.46%	95.90%

Taxonomy Alignment (excluding sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.01%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned: No gas and nuclear	7.01%	4.52%	4.09%
Non Taxonomy-aligned	92.99%	95.46%	95.90%

During the reference period, the Fund had less than 0.005% exposure to fossil gas and/or nuclear related investments that were EU Taxonomy-aligned; however, this is presented as 0.00% in the tables above due to rounding.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

Environmental objectives	% of Investments
Climate Change Mitigation	6.78%
Climate Change Adaptation	0.00%

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

● What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

	% of Investments
Transitional Activities	0.17%
Enabling Activities	4.06%

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The following table details the percentage of investments that were aligned with the EU Taxonomy for the current and previous reference periods.

	% of Investments			
	2025	2024	2023	2022
EU Taxonomy Aligned	7.02%	12.43%	0.00%	0.00%

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under

● What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 58.93% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Aandelen Thematic Opportunities Fonds (continued)

Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

For the reference period, 8.22% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, near cash instruments and derivatives however such holdings did not exceed 20%. Such investments were used only for investment purposes in pursuit of the Fund's (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Good governance checks are carried out by the Investment Manager on the issuers to exclude issuers which have been identified, using available data from external ESG research providers, to have (i) failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption), or (ii) been involved in one or more very severe ESG controversies relating to (a) governance structures (b) labour management relations (c) supply chain labour standards (d) discrimination and workforce diversity (e) collective bargaining and unions and (f) bribery and fraud.

Where the Investment Manager appoints one or more external sub-investment managers (i.e. that are not Affiliates of the Investment Manager) to carry out investment management for a Fund, certain external sub-investment managers may use data (a) from one or more external ESG research providers, and/or (b) generated by the Investment Manager using external ESG research provider data, at a point in a month, and updated on a monthly basis, to apply the Good Governance exclusionary criteria. This means that securities of issuers not excluded as at the last ESG data update can be acquired and held in the Fund until implementation of the next data update shows that the issuers should be excluded at which point the holding may be divested as soon as reasonably practicable.

The Investment Manager is also subject to the shareholder engagement requirements of the Shareholders Rights Directive II (SRD) requirements. The SRD aims to strengthen the position of shareholders, enhance transparency and reduce excessive risk within companies traded on regulated EU marketplaces. Further details regarding the Investment Manager's activities under the SRD are available on BlackRock's website at: <https://www.blackrock.com/uk/professionals/solutions/shareholder-rights-directive>.

How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

1895 FONDS FGR

1895 Obligatios Opportunities Fonds

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
1895 Obligatios Opportunities Fonds

Legal entity identifier:
549300X9LWWP3HLON989

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: ___%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.72% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

Investment in Sustainable Investments

Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of weapons (including, but not limited to, small arms, cluster munitions, anti-personnel mines, white phosphorus used in incendiary weapons or munitions, depleted uranium munitions, biological, chemical and nuclear weapons) and issuers deriving more than 5% of revenue from small arms retail or distribution

Exclusion of issuers deriving more than 5% of their revenue from thermal coal extraction

Exclusion of issuers generating more than 5% of power from thermal coal and issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)

Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions

Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production

Exclusion of issuers deriving more than 5% of revenue from tobacco production

Exclusion of Issuers deriving more than 5% of revenue from the production of cannabis (for recreational use)

Exclusion of Issuers deriving more than 5% of revenue from production of fur products

Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators and/or not involved in the most relevant food and beverage sustainability related industry initiatives assessed by Sustainalytics

Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by sustainalytics controversy, event and incident indicators

Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption)

Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste

Exclusion of issuers involved in such other activities which the Investment Manager has determined (in its absolute discretion) conflict with the Investment Manager's consideration of ESG related issues or characteristics

Limitation and/or exclusion of investments in Sovereign issuers which may be deemed to be: involved in social violations and as such may be subject to broad arms embargoes imposed through UN sanctions; be ranked in the bottom 25% of the scores, being scores of 2.5 or lower in the BlackRock Sovereign Sustainable Index; be ranked in the bottom 20% of the sovereign list as assessed by the JP Morgan ESG Methodology; be higher ranking issuers (ie those whose scores cause them to be "red flagged") in the Global Peace Index, issuers with a Red flag in the Global Peace index are excluded

1895 Obligaties Opportunities Fonds (continued)

● **How did the sustainability indicators perform?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

Sustainability Indicator	Metric	2025	2024	2023	2022
Investment in Sustainable Investments	% of Sustainable Investments held by the Fund	27.72%	40.11%	42.46%	N/A ¹
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches	No active breaches	One active breach ²	No active breaches	No active breaches

¹This sustainability indicator was incorporated into the Fund's investment strategy in January 2023 and as a result, was not included in the 2022 sustainability-related disclosure.

²During the prior reference period, the Fund had one active breach due to holding an issuer that failed the Fund's Good Governance criteria. The breach was identified, reported and rectified as part of Blackrock's standard breach resolution process.

● **...and compared to previous periods?**

The above table provides information about the performance of the sustainability indicators for the previous reference periods (see section "How did the sustainability indicators perform?").

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, whilst the Fund does not have a sustainable investment objective, the Fund invested 27.72% of its holdings in Sustainable Investments in pursuit of its investment objective.

Environmental and social objectives

The Fund invested in Sustainable Investments which contributed to a range of environmental and/or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals and other sustainability-related frameworks ("Environmental and Social Objectives").

Economic activity assessment

An investment was assessed as contributing to an environmental and/or social objective where:

- (i) a minimum proportion of the issuer's business activity contributed to an environmental and/or social objective; or
- (ii) the issuer's business practices contributed to an environmental and/or social objective; or
- (iii) the fixed income securities were aligned with an environmental and/or social objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Obligaties Opportunites Fonds (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The indicators for principal adverse impacts (“PAI”) on sustainability factors for each type of investment were assessed using BlackRock’s Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, “How did this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments held during the reference period were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers or companies deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Obligaties Opportunities Fonds (continued)

Adverse Sustainability Indicator	Sustainability Indicators
Exposure to companies active in the fossil fuel sector	Exclusion of issuers deriving more than 5% of revenue from thermal coal extraction
Exposure to companies active in the fossil fuel sector	Exclusion of issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)
Activities negatively affecting biodiversity sensitive areas	Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG Controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
Emissions to water	Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG Controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
Hazardous waste and radioactive waste ratio	Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG Controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG Controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles
Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of controversial weapons (including, but not limited to, cluster munitions, biological chemical, landmines, depleted uranium, blinding laser, non-detectable fragments and/or incendiary weapons)
Investee countries subject to social violations	Exclusion of sovereign issuers who are involved in social violations and as such may be subject to broad arms embargoes imposed through UN sanctions
Investee countries subject to social violations	Exclusion of sovereign issuers who ranked in the bottom 25% of the scores, being scores of 2.5 or lower in the BlackRock Sovereign Sustainable Index
Investee countries subject to social violations	Exclusion of sovereign issuers who ranked in the bottom 20% of the sovereign list as assessed by the JP Morgan ESG Methodology
Investee countries subject to social violations	Exclusion of sovereign issuers who are higher ranking issuers (i.e. those whose scores cause them to be "red flagged") in the Global Peace Index, issuers with a Red flag in the Global Peace index are excluded
Activities negatively affecting biodiversity sensitive areas	Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy
Activities negatively affecting biodiversity sensitive areas	Exclusion of issuers deriving more than 5% of their revenue from involvement in the production

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

For the reference period, the proportion of sustainability-related investments is shown in the graph below.

What was the asset allocation?

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference periods.

Asset allocation	% of Investments			
	2025	2024	2023	2022
#1 Aligned with E/S characteristics	96.99%	97.10%	96.59%	99.29%
#2 Other	3.01%	2.90%	3.41%	0.71%
#1A Sustainable	27.72%	40.11%	42.46%	N/A ¹
#1B Other E/S characteristics	69.27%	56.99%	54.13%	N/A ¹
Taxonomy-aligned	3.80%	5.37%	0.00%	N/A ¹
Other environmental	19.57%	29.09%	38.61%	N/A ¹
Social	4.35%	5.65%	3.85%	N/A ¹

¹The Fund did not commit to holding Sustainable Investments until January 2023, and therefore was not included in the 2022 sustainability-related disclosure.

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Obligaties Opportunities Fonds (continued)

● In which economic sectors were the investments made?

The following table details the economic sectors that the Fund was exposed to during the reference period.

Sector	Sub-Sector	% of Investments
Banking	Banking	17.62%
Government Related	Sovereign	17.34%
Treasuries	Treasuries	17.00%
Government Related	Agency	5.40%
Technology	Technology	4.69%
Electric	Electric	4.51%
Communications	Wirelines	2.52%
Energy	Integrated	1.54%
Consumer Cyclical	Automotive	1.53%
Natural Gas	Natural Gas	1.47%
Energy	Midstream	1.30%
Consumer Non-Cyclical	Pharmaceuticals	1.28%
Consumer Cyclical	Consumer Cyclical Services	1.27%
Financial Other	Financial Other	1.24%
Consumer Cyclical	Retailers	1.08%
Communications	Cable and Satellite	1.07%
Government Related	Local Authority	1.07%
Energy	Oil Field Services	0.47%
Energy	Independent	0.38%
Energy	Refining	0.23%

During the reference period, none of the Fund's investments were held in the following sub-sectors (as defined by the Barclays Industry Classification System): metals or mining.

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Obligaties Opportunites Fonds (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below. For the reference period, 3.80% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

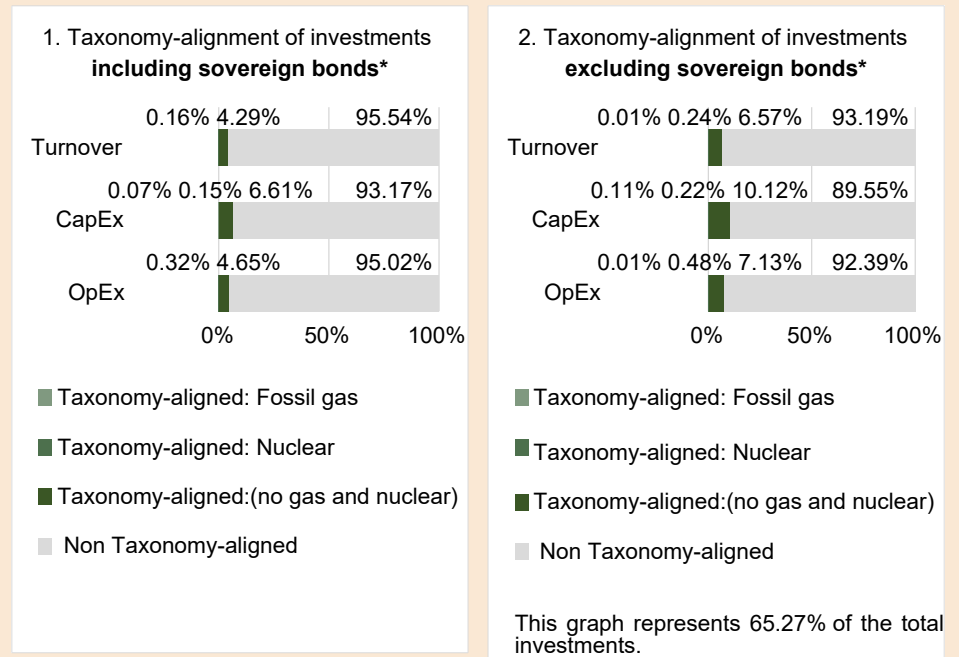

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Obligaties Opportunities Fonds (continued)

Taxonomy Alignment (including sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.07%	0.00%
Taxonomy-aligned: Nuclear	0.16%	0.15%	0.32%
Taxonomy-aligned: No gas and nuclear	4.29%	6.61%	4.65%
Non Taxonomy-aligned	95.54%	93.17%	95.02%

Taxonomy Alignment (excluding sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.01%	0.11%	0.01%
Taxonomy-aligned: Nuclear	0.24%	0.22%	0.48%
Taxonomy-aligned: No gas and nuclear	6.57%	10.12%	7.13%
Non Taxonomy-aligned	93.19%	89.55%	92.39%

During the reference period, the Fund had less than 0.005% exposure to fossil gas and/or nuclear related investments that were EU Taxonomy-aligned; however, this is presented as 0.00% in the tables above due to rounding.

For the reference period, 34.73% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

Environmental objectives	% of Investments
Climate Change Mitigation	4.41%
Climate Change Adaptation	0.01%

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

● What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

	% of Investments
Transitional Activities	0.09%
Enabling Activities	1.89%

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The following table details the percentage of investments that were aligned with the EU Taxonomy for the current and previous reference periods.

	% of Investments			
	2025	2024	2023	2022
EU Taxonomy Aligned	4.45%	5.65%	0.00%	0.00%

Sustainable investments with an environmental objective that do not take into account the criteria

● What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 19.57% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Obligatias Opportunities Fonds (continued)

for environmentally sustainable economic activities under Regulation (EU) 2020/852.

all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 4.35% of the Fund's investments were classified as socially sustainable investments.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included cash, near cash instruments and derivatives however such holdings did not exceed 20%. Such investments were used only for investment purposes in pursuit of the Fund's (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Good governance checks are carried out by the Investment Manager on the issuers to exclude issuers which have been identified, using available data from external ESG research providers, to have (i) failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption), or (ii) been involved in one or more very severe ESG controversies relating to (a) governance structures (b) labour management relations (c) supply chain labour standards (d) discrimination and workforce diversity (e) collective bargaining and unions and (f) bribery and fraud.

Where the Investment Manager appoints one or more external sub-investment managers (i.e. that are not Affiliates of the Investment Manager) to carry out investment management for a Fund, certain external sub-investment managers may use data (a) from one or more external ESG research providers, and/or (b) generated by the Investment Manager using external ESG research provider data, at a point in a month, and updated on a monthly basis, to apply the Good Governance exclusionary criteria. This means that securities of issuers not excluded as at the last ESG data update can be acquired and held in the Fund until implementation of the next data update shows that the issuers should be excluded at which point the holding may be divested as soon as reasonably practicable.

How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

1895 Euro Short Duration Obligaties Fonds

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

Investment in Sustainable Investments

Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of weapons (including, but not limited to, small arms, cluster munitions, anti-personnel mines, white phosphorus used in incendiary weapons or munitions, depleted uranium munitions, biological, chemical and nuclear weapons) and issuers deriving more than 5% of revenue from small arms retail or distribution

Exclusion of issuers deriving more than 5% of their revenue from thermal coal extraction

Exclusion of issuers generating more than 5% of power from thermal coal and issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)

Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions

Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production

Exclusion of issuers deriving more than 5% of revenue from tobacco production

Exclusion of Issuers deriving more than 5% of revenue from the production of cannabis (for recreational use)

Exclusion of Issuers deriving more than 5% of revenue from production of fur products

Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators and/or not involved in the most relevant food and beverage sustainability related industry initiatives assessed by Sustainalytics

Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by sustainalytics controversy, event and incident indicators

Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption)

Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste

Exclusion of issuers involved in such other activities which the Investment Manager has determined (in its absolute discretion) conflict with the Investment Manager's consideration of ESG related issues or characteristics

Limitation and/or exclusion of investments in Sovereign issuers which may be deemed to be: involved in social violations and as such may be subject to broad arms embargoes imposed through UN sanctions; be ranked in the bottom 25% of the scores, being scores of 2.5 or lower in the BlackRock Sovereign Sustainable Index; be ranked in the bottom 20% of the sovereign list as assessed by the JP Morgan ESG Methodology; be higher ranking issuers (i.e. those whose scores cause them to be "red flagged") in the Global Peace Index and issuers with a Red flag in the Global Peace index are excluded

EU Taxonomy environmental objectives contributed to by the Fund

Climate Change Mitigation

Climate Change Adaptation

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Euro Short Duration Obligatgies Fonds (continued)

● **How did the sustainability indicators perform?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

Sustainability Indicator	Metric	2025
Investment in Sustainable Investments	% of Sustainable Investments held by the Fund	34.25%
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches	No active breaches

● **...and compared to previous periods?**

As this is the first reference period that the periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 are effective, no comparatives are presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, whilst the Fund does not have a sustainable investment objective, the Fund invested 34.25% of its holdings in Sustainable Investments in pursuit of its investment objective.

Environmental and social objectives

The Fund invested in Sustainable Investments which contributed to a range of environmental and/or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals and other sustainability-related frameworks ("Environmental and Social Objectives").

Economic activity assessment

An investment was assessed as contributing to an environmental and/or social objective where:

- (i) a minimum proportion of the issuer's business activity contributed to an environmental and/or social objective; or
- (ii) the issuer's business practices contributed to an environmental and/or social objective; or
- (iii) the use of proceeds was assessed as contributing to an environmental and/or social objective such as green bonds, social bonds, and sustainability bonds; or
- (iv) the fixed income securities were aligned with an environmental and/or social objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Euro Short Duration Obligatgies Fonds (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The indicators for principal adverse impacts (“PAI”)s on sustainability factors for each type of investment were assessed using BlackRock’s Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, “How did this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments held during the reference period were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers or companies deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

Adverse Sustainability Indicator	Sustainability Indicators
Activities negatively affecting biodiversity sensitive areas	Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG Controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
Activities negatively affecting biodiversity sensitive areas	Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy
Activities negatively affecting biodiversity sensitive areas	Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators
Emissions to water	Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG Controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
Emissions to water	Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy
Emissions to water	Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators
Exposure to companies active in the fossil fuel sector	Exclusion of issuers deriving more than 5% of revenue from thermal coal extraction
Exposure to companies active in the fossil fuel sector	Exclusion of issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)
Exposure to companies active in the fossil fuel sector	Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions
Exposure to companies active in the fossil fuel sector	Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production
Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of controversial weapons (including, but not limited to, cluster munitions, biological chemical, landmines, depleted uranium, blinding laser, non-detectable fragments and/or incendiary weapons)
Hazardous waste and radioactive waste ratio	Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG Controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
Hazardous waste and radioactive waste ratio	Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy,

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

For the reference period, the proportion of sustainability-related investments is shown in the graph below.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference periods.

Asset allocation	% of Investments	
	2025	2024
#1 Aligned with E/S characteristics	99.46%	N/A ¹
#2 Other	0.54%	N/A ¹
#1A Sustainable	34.25%	N/A ¹
#1B Other E/S characteristics	65.21%	N/A ¹
Taxonomy-aligned	1.02%	N/A ¹
Other environmental	26.78%	N/A ¹
Social	6.45%	N/A ¹

¹As 2025 was the first reference period presented for the Fund, no comparatives are presented for prior years.

1895 FONDS FGR

1895 Euro Short Duration Obligatgies Fonds (continued)

● In which economic sectors were the investments made?

The following table details the economic sectors representing 1% or more of investments held that the Fund was exposed to during the reference period.

Sector	Sub-Sector	% of Investments
Treasuries	Treasuries	34.56%
Banking	Banking	24.25%
Government Related	Agency	14.20%
Financial Other	Financial Other	4.80%
Government Related	Sovereign	4.44%
Government Related	Supranational	3.89%
Government Related	Local Authority	2.47%
Consumer Non-Cyclical	Consumer Products	1.61%
Transportation	Transportation Services	1.16%
Electric	Electric	1.06%
Consumer Non-Cyclical	Food and Beverage	1.00%

During the reference period, none of the Fund's investments were held in the following sub-sectors (as defined by the Barclays Industry Classification System): integrated, independent, midstream, oil field services, refining, or metals and mining.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Euro Short Duration Obligaties Fonds (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below. For the reference period, 1.02% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

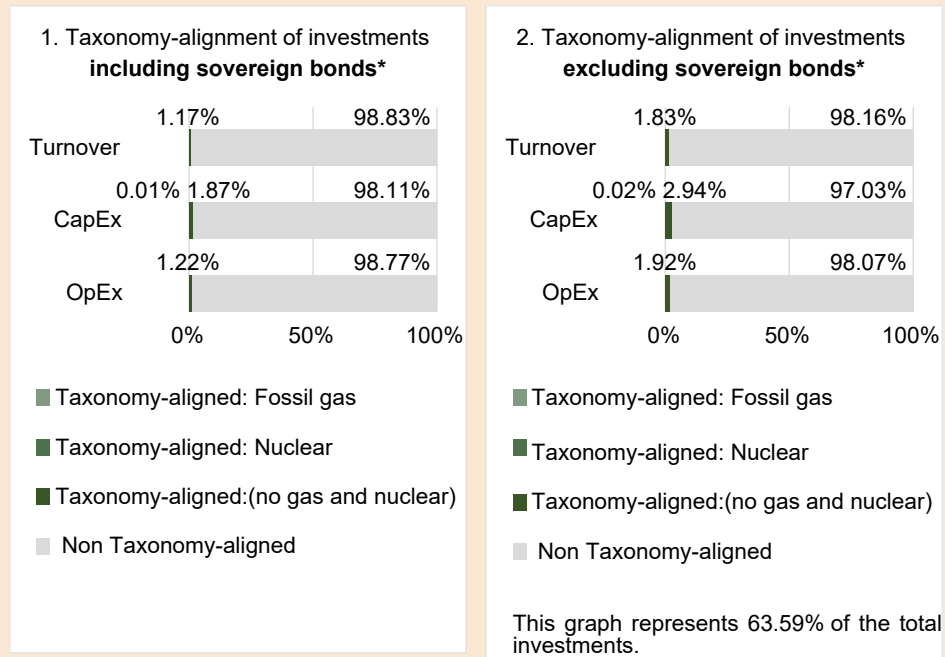

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

1895 Euro Short Duration Obligaties Fonds (continued)

Taxonomy Alignment (including sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.01%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned: No gas and nuclear	1.17%	1.87%	1.22%
Non Taxonomy-aligned	98.83%	98.11%	98.77%

Taxonomy Alignment (excluding sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.02%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned: No gas and nuclear	1.83%	2.94%	1.92%
Non Taxonomy-aligned	98.16%	97.03%	98.07%

During the reference period, the Fund had less than 0.005% exposure to fossil gas and/or nuclear related investments that were EU Taxonomy-aligned; however, this is presented as 0.00% in the tables above due to rounding.

For the reference period, 36.41% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

Environmental objectives	% of Investments
Climate Change Mitigation	1.15%
Climate Change Adaptation	0.00%

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

	% of Investments
Transitional Activities	0.01%
Enabling Activities	0.62%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reference period presented for the Fund, no comparatives are presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 26.78% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 6.45% of the Fund's investments were classified as socially sustainable investments.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Euro Short Duration Obligaties Fonds (continued)

What investments were included under “Other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” included cash, near cash instruments and derivatives however such holdings did not exceed 20%. Such investments were used only for investment purposes in pursuit of the Fund’s (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Good governance checks are carried out by the Investment Manager on the issuers to exclude issuers which have been identified, using available data from external ESG research providers, to have (i) failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption), or (ii) been involved in one or more very severe ESG controversies relating to (a) governance structures (b) labour management relations (c) supply chain labour standards (d) discrimination and workforce diversity (e) collective bargaining and unions and (f) bribery and fraud.

Where the Investment Manager appoints one or more external sub-investment managers (i.e. that are not Affiliates of the Investment Manager) to carry out investment management for a Fund, certain external sub-investment managers may use data (a) from one or more external ESG research providers, and/or (b) generated by the Investment Manager using external ESG research provider data, at a point in a month, and updated on a monthly basis, to apply the Good Governance exclusionary criteria. This means that securities of issuers not excluded as at the last ESG data update can be acquired and held in the Fund until implementation of the next data update shows that the issuers should be excluded at which point the holding may be divested as soon as reasonably practicable.

How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable.
- **How did this financial product perform compared with the reference benchmark?**
Not applicable.
- **How did this financial product perform compared with the broad market index?**
Not applicable.

1895 Speciale Projecten Obligaties Fonds

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

Environmental and social characteristics promoted by the Fund

Investment in Sustainable Investments

Investment in use-of-proceeds bonds

Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of weapons (including, but not limited to, small arms, cluster munitions, anti-personnel mines, white phosphorus used in incendiary weapons or munitions, depleted uranium munitions, biological, chemical and nuclear weapons) and issuers deriving more than 5% of revenue from small arms retail or distribution

Exclusion of issuers deriving more than 5% of their revenue from thermal coal extraction

Exclusion of issuers generating more than 5% of power from thermal coal and issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)

Exclusion of issuers deriving more than 5% of revenue from oil and gas exploration in offshore Arctic regions

Exclusion of issuers deriving more than 5% of revenue from shale energy, gas and/or oil, extraction and/or production

Exclusion of issuers deriving more than 5% of revenue from tobacco production

Exclusion of Issuers deriving more than 5% of revenue from the production of cannabis (for recreational use)

Exclusion of Issuers deriving more than 5% of revenue from production of fur products

Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators and/or not involved in the most relevant food and beverage sustainability related industry initiatives assessed by Sustainalytics

Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by sustainalytics controversy, event and incident indicators

Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption)

Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste

Exclusion of issuers involved in such other activities which the Investment Manager has determined (in its absolute discretion) conflict with the Investment Manager's consideration of ESG related issues or characteristics

Limitation and/or exclusion of investments in Sovereign issuers which may be deemed to be: involved in social violations and as such may be subject to broad arms embargoes imposed through UN sanctions; be ranked in the bottom 25% of the scores, being scores of 2.5 or lower in the BlackRock Sovereign Sustainable Index; be ranked in the bottom 20% of the sovereign list as assessed by the JP Morgan ESG Methodology; be higher ranking issuers (ie those whose scores cause them to be "red flagged") in the Global Peace Index, issuers with a Red flag in the Global Peace index are excluded

EU Taxonomy environmental objectives contributed to by the Fund

Climate Change Mitigation

Climate Change Adaptation

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Speciale Projecten Obligaties Fonds (continued)

● **How did the sustainability indicators perform?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

Sustainability Indicator	Metric	2025
Investment in Sustainable Investments	% of Sustainable Investments held by the Fund	95.85%
Investment in use-of-proceeds bonds	% use-of-proceeds bonds held by the Fund	84.15%
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches	No active breaches

● **...and compared to previous periods?**

As this is the first reference period that the periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 are effective, no comparatives are presented.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, whilst the Fund does not have a sustainable investment objective, the Fund invested 95.85% of its holdings in Sustainable Investments in pursuit of its investment objective.

Environmental and social objectives

The Fund invested in Sustainable Investments which contributed to a range of environmental and/or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals and other sustainability-related frameworks ("Environmental and Social Objectives").

Economic activity assessment

An investment was assessed as contributing to an environmental and/or social objective where:

- (i) a minimum proportion of the issuer's business activity contributed to an environmental and/or social objective; or
- (ii) the issuer's business practices contributed to an environmental and/or social objective; or
- (iii) the use of proceeds was assessed as contributing to an environmental and/or social objective such as green bonds, social bonds, and sustainability bonds; or
- (iv) the fixed income securities were aligned with an environmental and/or social objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Speciale Projecten Obligaties Fonds (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Sustainable Investments held by the Fund during the reference period met the do no significant harm (“DNSH”) requirements, as defined by applicable law and regulation. BlackRock has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm do not qualify as Sustainable Investments.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The indicators for principal adverse impacts (“PAI”) on sustainability factors for each type of investment were assessed using BlackRock’s Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, “How did this financial product consider principal adverse impacts on sustainability factors?”, which describes how the Fund considered PAIs on sustainability factors.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments held during the reference period were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers or companies deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

● **How did this financial product consider principal adverse impacts on sustainability factors?**

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics (“E&S criteria”) set out above (see To what extent were the environmental and/or social characteristics promoted by this financial product met?). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund’s specific sustainability indicator may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards (“RTS”).

1895 FONDS FGR

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Speciale Projecten Obligaties Fonds (continued)

Adverse Sustainability Indicator	Sustainability Indicators
Greenhouse gas (GHG) Emissions	Investment in use-of-proceeds bonds
GHG Intensity of investee companies	Investment in use-of-proceeds bonds
Exposure to companies active in the fossil fuel sector	Exclusion of issuers deriving more than 5% of revenue from thermal coal extraction
Exposure to companies active in the fossil fuel sector	Exclusion of issuers who extract more than 5% of their average production from oil tar sands (also known as oil sands)
Emissions to water	Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG Controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
Hazardous waste and radioactive waste ratio	Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG Controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Exclusion of issuers which have been indicated as involved in one or more very severe controversies by MSCI ESG Controversies relating to (i) biodiversity & land use, (ii) water stress, (iii) operational waste (non-hazardous), and (iv) toxic emissions & waste
Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	Exclusion of issuers which are engaged in, or are otherwise exposed to, the production of controversial weapons (including, but not limited to, cluster munitions, biological chemical, landmines, depleted uranium, blinding laser, non-detectable fragments and/or incendiary weapons)
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Exclusion of issuers which have been deemed to have failed to comply with UN Global Compact Principles
Investee countries subject to social violations	Exclusion of sovereign issuers who are involved in social violations and as such may be subject to broad arms embargoes imposed through UN sanctions
Investee countries subject to social violations	Exclusion of sovereign issuers who ranked in the bottom 25% of the scores, being scores of 2.5 or lower in the BlackRock Sovereign Sustainable Index
Investee countries subject to social violations	Exclusion of sovereign issuers who ranked in the bottom 20% of the sovereign list as assessed by the JP Morgan ESG Methodology
Investee countries subject to social violations	Exclusion of sovereign issuers who are higher ranking issuers (i.e. those whose scores cause them to be "red flagged") in the Global Peace Index, issuers with a Red flag in the Global Peace index are excluded
Activities negatively affecting biodiversity sensitive areas	Exclusion of issuers deriving more than 5% of their revenue from the production of palm oil and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy
Activities negatively affecting biodiversity sensitive areas	Exclusion of issuers deriving more than 5% of their revenue from involvement in the production of pesticides and have been indicated as involved in one or more high or severe rated controversies by Sustainalytics Controversy, Event and Incident indicators

1895 Speciale Projecten Obligaties Fonds (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

For the reference period, the proportion of sustainability-related investments is shown in the graph below.

What was the asset allocation?

The taxonomy alignment percentage in the above diagram represents the percentage of investments held by the Fund in EU Taxonomy-aligned activities through Sustainable Investments with an environmental objective. It does not include the taxonomy alignment achieved through the Fund's other investments. For the taxonomy alignment of the Fund's total investments, see the bar chart below.

The following table details the asset allocation of the Fund for the current and the previous reference periods.

Asset allocation	% of Investments	
	2025	2024
#1 Aligned with E/S characteristics	98.20%	N/A ¹
#2 Other	1.80%	N/A ¹
#1A Sustainable	95.85%	N/A ¹
#1B Other E/S characteristics	2.35%	N/A ¹
Taxonomy-aligned	7.20%	N/A ¹
Other environmental	69.65%	N/A ¹
Social	19.00%	N/A ¹

¹As 2025 was the first reference period presented for the Fund, no comparatives are presented for prior years.

1895 FONDS FGR

1895 Speciale Projecten Obligaties Fonds (continued)

● In which economic sectors were the investments made?

The following table details the economic sectors representing 1% or more of investments held that the Fund was exposed to during the reference period.

Sector	Sub-Sector	% of Investments
Financials	Banks	28.03%
Utilities	Utilities	14.13%
Treasuries	Treasuries	10.33%
Financials	Financial Services	8.78%
Government Related	Supranational	4.92%
Real Estate	Equity Real Estate Investment Trusts (REITs)	4.23%
Government Related	Agency	3.93%
Materials	Materials	3.37%
Consumer Discretionary	Consumer Services	3.23%
Government Related	Local Authority	2.95%
Communication	Telecom	2.39%
Government Related	Sovereign	2.26%
Financials	Insurance	2.00%
Industrials	Transportation	1.50%
Information Technology	Semiconductors & Semiconductor Equipment	1.39%
Real Estate	Real Estate Management & Development	1.19%
Industrials	Capital Goods	1.17%

During the reference period, none of the Fund's investments were held in the following sub-sectors (as defined by the Barclays Industry Classification System): integrated, independent, midstream, oil field services, refining, or metals and mining.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Speciale Projecten Obligaties Fonds (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

For the reference period, the Fund's investment alignment with EU Taxonomy is shown in the graphs below. For the reference period, 7.20% of the Fund's investments were classified as both Sustainable Investments with an environmental objective and aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

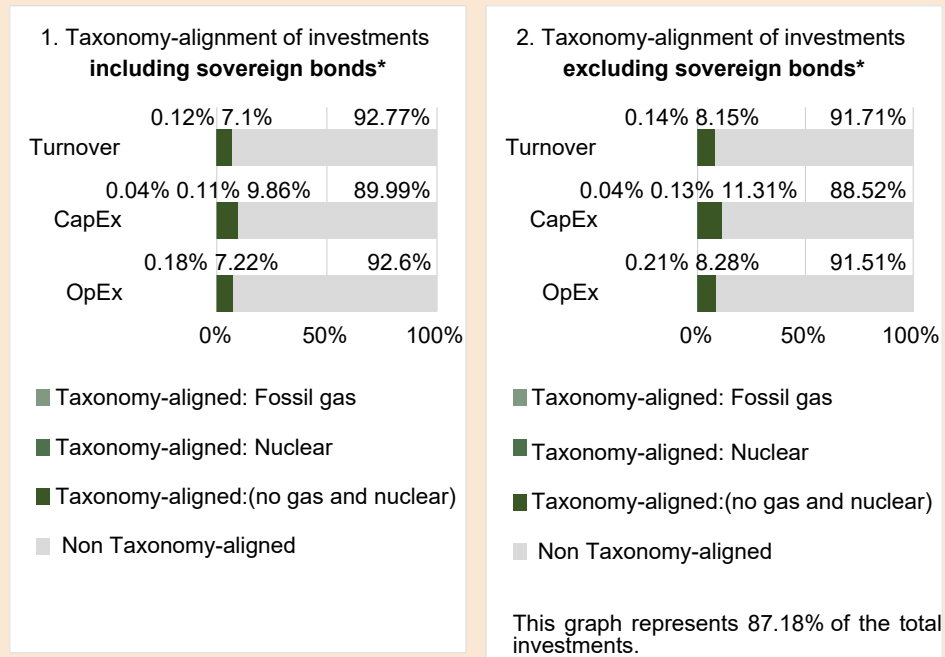

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

1895 Speciale Projecten Obligaties Fonds (continued)

Taxonomy Alignment (including sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.04%	0.00%
Taxonomy-aligned: Nuclear	0.12%	0.11%	0.18%
Taxonomy-aligned: No gas and nuclear	7.10%	9.86%	7.22%
Non Taxonomy-aligned	92.77%	89.99%	92.60%

Taxonomy Alignment (excluding sovereign bonds)	Turnover	CapEx	OpEx
Taxonomy-aligned: Fossil gas	0.00%	0.04%	0.00%
Taxonomy-aligned: Nuclear	0.14%	0.13%	0.21%
Taxonomy-aligned: No gas and nuclear	8.15%	11.31%	8.28%
Non Taxonomy-aligned	91.71%	88.52%	91.51%

During the reference period, the Fund had less than 0.005% exposure to fossil gas and/or nuclear related investments that were EU Taxonomy-aligned; however, this is presented as 0.00% in the tables above due to rounding.

For the reference period, 12.82% of the Fund's total investments were held in sovereign exposures. Taxonomy alignment of these exposures could not be determined due to limited data availability.

The investments held by the Fund during the reference period contributed to the following EU Taxonomy environmental objectives:

Environmental objectives	% of Investments
Climate Change Mitigation	7.12%
Climate Change Adaptation	0.07%

The data presented in the table above was not subject to an assurance provided by the Fund's auditor or a review by a third party. The assessment of EU Taxonomy alignment is based on data from a third-party vendor. The source of this data is a combination of equivalent and reported data. Equivalent data that matches the technical criteria under EU Taxonomy generates an eligibility or alignment result for those companies for which we do not have reported data.

What was the share of investments made in transitional and enabling activities?

For the reference period, the Fund's investments in transitional and enabling activities were as follows:

	% of Investments
Transitional Activities	0.31%
Enabling Activities	3.26%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reference period presented for the Fund, no comparatives are presented.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 69.65% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) it is part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

What was the share of socially sustainable investments?

For the reference period, 19.00% of the Fund's investments were classified as socially sustainable investments.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852 (continued)

1895 Speciale Projecten Obligaties Fonds (continued)

What investments were included under “Other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” included cash, near cash instruments and derivatives however such holdings did not exceed 15%. Such investments were used only for investment purposes in pursuit of the Fund’s (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Good governance checks are carried out by the Investment Manager on the issuers to exclude issuers which have been identified, using available data from external ESG research providers, to have (i) failed to comply with UN Global Compact Principles (which cover human rights, labour standards, the environment and anti-corruption), or (ii) been involved in one or more very severe ESG controversies relating to (a) governance structures (b) labour management relations (c) supply chain labour standards (d) discrimination and workforce diversity (e) collective bargaining and unions and (f) bribery and fraud.

Where the Investment Manager appoints one or more external sub-investment managers (i.e. that are not Affiliates of the Investment Manager) to carry out investment management for a Fund, certain external sub-investment managers may use data (a) from one or more external ESG research providers, and/or (b) generated by the Investment Manager using external ESG research provider data, at a point in a month, and updated on a monthly basis, to apply the Good Governance exclusionary criteria. This means that securities of issuers not excluded as at the last ESG data update can be acquired and held in the Fund until implementation of the next data update shows that the issuers should be excluded at which point the holding may be divested as soon as reasonably practicable.

How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable.
- **How did this financial product perform compared with the reference benchmark?**
Not applicable.
- **How did this financial product perform compared with the broad market index?**
Not applicable.
