Performance, Portfolio Breakdowns and Net Asset information as at: 31-Mar-2026. All other data as at 10-Apr-2026.

This document is marketing material. For Investors in the Denmark. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to invest at least 85% of its assets in Norsk Likviditet, a sub-fund of Danske Invest 2 SICAV, authorised as a UCITS fund in Luxembourg by the Commission de Surveillance du Secteur Financier (the Master Fund) and, as such, is designated as a "feeder fund" within the meaning given to that term in the UCITS Regulations.
- In addition to investing at least 85% of its assets into the Master Fund, the Fund may, also invest up to 15% of its assets, in aggregate, in the following other assets: 1) money market instruments (MMI) including bills, commercial paper and certificates of deposits for ancillary liquidity purposes; and (b) financial derivative instruments (FDI) for hedging purposes only.
- The Master Fund's investment objective is to achieve above-market performance. It is an actively managed fixed income (FI) fund which primarily invests in Norwegian short-duration bonds, MMI and bank deposits, with at least two-thirds of its net assets invested in bonds or other debt securities issued by governments, municipalities and other public organisations, companies or credit institutions.

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The Fund is a feeder fund investing solely in a master fund which seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Asset Class : Multi Asset

Fund Launch Date : 05-Dec-2025

Share Class Launch Date : 05-Dec-2025

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Modified Duration: A measure of price sensitivity of a bond to changes in interest rates. The Modified Duration of the fund is calculated as the average of the underlying bonds' modified duration values, adjusted to take account of their relative weight (size) within the fund.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.

Average Market Cap: The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.
