FUND OVERVIEW

- The Fund aims to achieve a return on your investment over a period of at least 5 years, through a combination of capital growth and income on the Fund's assets, whilst also seeking to outperform the Bloomberg Global Aggregate Corporate Index (EUR Hedged) (the "Index"). The Fund also seeks to invest in a manner consistent with the principles of environmental, social and governance ("ESG") investing.
- The Fund will seek to invest 80% of its assets in fixed income (FI) securities (e.g. bonds) and fixed income-related securities of issuers worldwide.
- The Fund's investments will normally be listed or traded on regulated markets. The Fund may also invest in other FI securities (such as bonds issued by Economic and Monetary Union ("EMU") and non-EMU governments and government agencies and supranational bonds domiciled in and outside the European Union) in order to achieve a similar return to the Index in a cost efficient manner. All FI securities in which the Fund invests will be investment grade rated by Moody's, Standard & Poor's Corporation or Fitch Ratings at the time of purchase or are deemed by the Investment Manager ("IM") to be of an equivalent rating.

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices. **Article 9:** Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTMs based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.
