May 2026

Performance, Portfolio Breakdowns and Net Asset information as at: 31-May-2026. All other data as at 10-Jun-2026.

This document is marketing material. For Investors in the Denmark. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

The fund aims to achieve a return on your investment, through a combination of capital growth and income on the fund's assets, which reflects the return of the MSCI ACWI Index, the Fund's benchmark index (Index).

KEY BENEFITS

1. Exposure to large and mid-capitalisation stocks across developed and emerging market countries and is a free float-adjusted market capitalisation weighted index.
2. The fund intends to track the performance of the index by gaining an indirect exposure to it via financial derivative instruments (FDIs), particularly unfunded total return swaps.
3. The fund is passively managed and invests in FDIs. In particular, it will enter into unfunded total return swaps in order to achieve its investment objective.

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- The Fund's ability to track the benchmark's performance is reliant on the counterparties to continuously deliver the performance of the benchmark in line with the swap agreements (i.e. counterparty risk) and would also be affected by any spread between the pricing of the swaps and the pricing of the benchmark. If any swap counterparty fails to provide sufficient assets as security for amounts owed to the Fund, there might be an increased counterparty risk exposure at a given time.

Product Information

ISIN : IE000CYC2B65

Share Class Launch Date : 24-Feb-2026

Share Class Currency : USD

Total Expense Ratio : 0.12%

Use of Income : Accumulating

Net Assets of Share Class (M) : 14.66 USD

KEY FACTS

Asset Class : Equity

Benchmark : MSCI All Country World Index (Net)

Fund Launch Date : 24-Feb-2026

This is Marketing Material. iShares plc, iShares II plc, iShares III plc, iShares IV plc, iShares V plc, iShares VI plc and iShares VII plc (together 'the Companies') are open-ended investment companies with variable capital having segregated liability between their funds organised under the laws of Ireland and authorised by the Central Bank of Ireland. The Prospectus (Available in French, German, Polish and English Languages) Key Investor Information document (UK only), PRIIPs KID and further information about the Fund and the Share Class, such as details of the key underlying investments of the Share Class and share prices, is available on the iShares website at www.ishares.com or by calling +44 (0)845 357 7000 or from your broker or financial adviser. The indicative intra-day net asset value of the Share Class is available at <http://deutsche-boerse.com> and/or <http://www.reuters.com>. A UCITS ETF's units / shares that have been acquired on the secondary market cannot usually be sold directly back to the UCITS ETF itself. Investors who are not Authorised Participants must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees and additional taxes in doing so. In addition, as the market price at which the Shares are traded on the secondary market may differ from the Net Asset Value per Share, investors may pay more than the then current Net Asset Value per Share when buying shares and may receive less than the current Net Asset Value per Share when selling them. UCITS HAVE NO GUARANTEED RETURN AND PAST PERFORMANCE DOES NOT GUARANTEE THE FUTURE ONES
