Performance, Portfolio Breakdowns and Net Asset information as at: 31-May-2026. All other data as at 11-Jun-2026.
This document is marketing material. For Investors in the Denmark. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets.
- The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies which are domiciled in, or the main business of which is in, Asia excluding Japan. Many of these countries are developing countries. The Fund may invest up to 30% of its total assets in the People's Republic of China (PRC) via the Stock Connect (a program that aims to achieve mutual stock market access between the PRC and Hong Kong) and the Renminbi denominated investment quota issued to Renminbi Qualified Foreign Institutional Investors (RQFII Quota).
- In particular, the Fund will invest in the equity securities of companies, which, in the investment adviser's (IA) opinion, have good growth potential. For example the companies may demonstrate above-average growth rates in earnings or sales and high or improving returns on capital.

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
