

# BGF China Onshore Bond Fund

## Class I2 Hedged Euro

### BlackRock Global Funds

Performance, Portfolio Breakdowns and Net Assets information as at: 31-May-2026. All other data as at 14-Jun-2026.

This document is marketing material. For Investors in Sweden. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

#### FUND OVERVIEW

- The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets.
- The Fund invests globally at least 70% of its total assets in fixed income (FI) securities denominated in Renminbi issued by entities exercising the predominant part of their economic activity in the PRC (through recognised mechanisms including (but not limited to) the Chinese Interbank Bond Market, the exchange bond market, quota system and/or through onshore or offshore issuances and/or any future developed channels) in a manner consistent with the principles of environmental, social and governance ("ESG") focused investing. The 70% ratio above may include, on a temporary basis and for liquidity management purposes the holding of cash and near-cash instruments.
- The Fund will take into account environment, social and governance criteria when selecting investments as disclosed in the prospectus. The Investment Adviser (IA) will apply the BlackRock EMEA Baseline Screens whereby the IA will seek to limit and/or exclude direct investment (as applicable) in issuers which, in the opinion of the IA, have exposure to, or ties with, certain sectors. For further details please refer to the prospectus and the BlackRock website at [www.blackrock.com/baselinescreens](http://www.blackrock.com/baselinescreens).

#### RISK INDICATOR

##### Lower Risk

Potentially Lower Rewards

##### Higher Risk

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

#### KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Fixed income securities issued or guaranteed by government entities in emerging markets generally experience higher 'Credit Risk' than developed economies.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

#### KEY FACTS

**Comparator<sup>†</sup>:** 1Y China Household Savings Deposits Rate Index

**Asset Class :** Fixed Income

**Fund Launch Date :** 06-Sep-2022

#### GLOSSARY

**SFDR Classification: Article 8:** Products that promote environmental or social characteristics and promote good governance practices.

**Article 9:** Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

**Yield to Maturity:** Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

**Effective Duration:** Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

#### IMPORTANT INFORMATION:

**In the European Economic Area (EEA):** this is issued by BlackRock (Netherlands) B.V., authorised and regulated by the Netherlands Authority for the Financial Markets. Registered office Amstelplein 1, 1096 HA, Amsterdam, Tel: +352 46268 5111. Trade Register No. 17068311 For your protection telephone calls are usually recorded.
