

BGF Natural Resources Fund
Class E5G Hedged Euro
BlackRock Global Funds

Performance, Portfolio Breakdowns and Net Assets information as at: 31-Jul-2026. All other data as at 12-Aug-2026.
This document is marketing material. For Investors in Luxembourg. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to maximise total return.
- The Fund invests globally at least 70% of its total assets in the equity securities (e.g. shares) of companies the main business of which is the natural resources sector, such as, but not limited to, companies engaged in mining, energy and agriculture.
- The Fund distributes income gross of expenses.

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Investments in the natural resources securities are subject to environmental or sustainability concerns, taxes, government regulation, price and supply fluctuations.
- This Share Class may pay dividends or take charges from capital. While this may allow more income to be distributed, it may reduce the value of your holdings and impact the potential for long term capital growth.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Constraint 1 : S&P Global Natural Resources Index

Comparator 2 : S&P Global Natural Resources Index (Net)

Asset Class : Equity

Fund Launch Date : 15-Apr-2011

Share Class Launch Date : 20-May-2011
