October 2026

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Oct-2026. All other data as at 12-Nov-2026.

This document is marketing material. For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

- The Fund aims to provide a return on your investment (net of fees) over a period of 5 or more consecutive years beginning at the point of investment, generated through an increase to the value of the assets held by the Fund and/or income received from those assets.
- The Fund has a flexible approach to asset allocation and will seek to achieve its investment objective through a variety of asset classes. The Fund will invest either directly or indirectly on a global basis in equity securities (e.g. shares), equity-related (ER) securities i.e. other investments whose value is related to equities), fixed income (FI) securities (e.g. bonds), FI-related securities (i.e. other investments whose value is related to fixed-income securities), money market instruments (MMIs) (e.g. debt instruments with short-term maturities), deposits, cash and near cash, property, commodities (such as precious metals and agricultural produce), other funds (including exchange traded funds) and other permitted alternative assets.
- The Fund is actively managed and the above-mentioned asset classes and the extent to which the Fund is invested in these may vary without limitation depending on market conditions and other factors at the Investment Manager's (IM) discretion in accordance with the Fund's investment policy. In selecting these, the IM will limit and/or exclude (as applicable) direct investments in companies or issuers which, at the time of purchase, in the opinion of the IM, have exposure to, or ties with certain sectors (as detailed in the Fund's prospectus and set out in full on the Fund's product page at www.blackrock.com). In order to seek to comply with the investment policy, the IM will use MSCI Inc., or such other service provider deemed appropriate from time to time. The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) globally and may include investments with a relatively low credit rating or, in the case of FI securities and MMIs issued by companies, investments which are unrated.

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

1	2	3	4	**5**	6	7

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of perceived risk.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Risk to Capital Growth through distributions: the Fund may make distributions from capital as well as income or pursue certain investment strategies in order to generate income. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital and the potential for long-term capital growth.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Constraint 1 : MSCI World Index (GBP) (60%); Bloomberg Global Aggregate Bond Index (GBP Hedged) (20%); 3 Month GBP SONIA Compounded in arrears plus 3% (20%)

Asset Class : Multi Asset

Fund Launch Date : 13-Jun-2019

Share Class Launch Date : 13-Jun-2019

Share Class Currency : GBP

GLOSSARY

Average Market Cap: The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

Modified Duration: A measure of price sensitivity of a bond to changes in interest rates. The Modified Duration of the fund is calculated as the average of the underlying bonds' modified duration values, adjusted to take account of their relative weight (size) within the fund.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.

IMPORTANT INFORMATION:

The Ongoing Charge may be discounted depending on the size of the fund.
