FUND OVERVIEW

- The Fund aims to provide a return on your investment (net of fees) over a period of 5 or more consecutive years beginning at the point of investment, generated through an increase in the value of the assets held by the Fund and/or income received from those assets.
- The Fund invests at least 70% of its assets directly in equity securities (e.g. shares) and equity-related securities (i.e other investments whose value is related to equities) of companies listed (i.e. having its shares admitted to trading on a regulated market such as the London Stock Exchange) and domiciled, or incorporated, in the United Kingdom. The Fund may also invest in other asset classes, including other funds (including exchange traded funds), money market instruments (e.g. debt instruments with short-term maturities), cash and near cash.
- The investment manager (IM) may use derivatives (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to seek to achieve the Fund's investment objective and for efficient portfolio management purposes in order to reduce risk within the Fund, reduce investment costs, or to generate additional income for the Fund. Further investments may be used (including derivatives) to protect the value of the Fund, in whole or in part, from changes in currency exchange rates against its base currency.

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
