October 2026

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Oct-2026. All other data as at 12-Nov-2026.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

The Fund aims to provide a total return (after fees have been deducted) over a 5 year rolling period, while maintaining a volatility of between 12%-15% (annualised). There is no guarantee that this investment objective will be met over any time period. The Fund could suffer a decrease in value and the value of your investment could decrease as a result.The Fund will invest at least 80% of its total assets in other funds to gain indirect exposure to a variety of asset classes globally including: equity securities (i.e. shares), fixed income ("FI") securities (such as corporate and government bonds), cash and assets that can be turned into cash quickly. The Fund may be fully invested in other funds.Given the higher risk profile of the Fund, under normal market conditions the Fund will seek a greater investment in equity securities (which are generally considered to be more risky compared to FI securities), compared to a fund with a lower risk profile which would seek to have a greater investment in FI securities (which are generally considered to be less risky compared to equity securities).

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

1	2	3	**4**	5	6	7

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Asset Class : Multi Asset

Fund Launch Date : 27-Aug-2026

Share Class Launch Date : 27-Aug-2026

Share Class Currency : GBP

GLOSSARY

Average Market Cap: The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

Modified Duration: A measure of price sensitivity of a bond to changes in interest rates. The Modified Duration of the fund is calculated as the average of the underlying bonds' modified duration values, adjusted to take account of their relative weight (size) within the fund.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.
