October 2026

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Oct-2026. All other data as at 12-Nov-2026.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets and in a manner consistent with the principles of environmental, social and governance "ESG" focused investing.
- The Fund invests at least 80% of its total assets in fixed income (FI) securities, FI related securities (in each case which are investment grade (i.e. meet a specified level of credit worthiness) and, when determined appropriate, deposits and cash. FI securities include bonds and money market instruments (MMIs) (i.e. debt securities with short term maturities). FI-related securities include financial derivative instruments ("FDIs") (i.e. investments the prices of which are based on one or more underlying assets). The Fund will focus on non-government FI securities and will also have exposure to FI securities of governments and government agencies inside or outside of the Eurozone.
- The Fund will take into account ESG criteria when selecting investments as disclosed in the prospectus and will apply the EU Paris-Aligned Benchmark Exclusions.. For further details please refer to the Fund's ESG policy section of the prospectus and the BlackRock website at:https://www.blackrock.com/baselinescreens.The Fund adopts a "best in class" approach to sustainable investing meaning that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities in which the Fund invests shall be ESG rated or have been analysed for ESG purposes.

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Constraint 1 : Bloomberg MSCI Euro Corporate ESG SRI Index (EUR)

Comparator 2 : 80% BBG Euro Corporate Index / 20% BBG US Corporate Index

Asset Class : Fixed Income

Fund Launch Date : 21-Jun-2019

Share Class Launch Date : 21-Jun-2019

Share Class Currency : EUR

Net Assets of Fund (M) : 306.87 EUR

The figures shown relate to past performance. **Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past.** Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation. GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices. **Article 9:** Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTMs based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.
