May 2026

Performance, Portfolio Breakdowns and Net Assets information as at: 31-May-2026. All other data as at 11-Jun-2026.

This document is marketing material. For Investors in Sweden. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to provide a total return, taking into account both capital and income returns, which reflects the total return of the Bloomberg Global Aggregate Government Bond ex Emerging Markets Index (the "Index").
- The Fund is passively managed and will invest in a portfolio of fixed income securities (i.e. bonds) that so far as possible and practicable consists a sub-set of fixed income securities within the Index. The Index measures the performance of fixed income securities issued by governments and government agencies and supranational bonds domiciled globally. All fixed income securities in which the Fund invests will be investment grade rated by Moody's, Standard & Poor's Corporation or Fitch Ratings at the time of purchase or are deemed by the Investment Manager (IM) to be of an equivalent rating.
- The Fund will also invest in accordance with the Exclusionary Policy as outlined in the Fund's prospectus and will seek to exclude certain issuers that are listed in the Exclusionary Policy

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.
