BlackRock**May 2026**

Performance, Portfolio Breakdowns and Net Assets information as at: 31-May-2026. All other data as at 11-Jun-2026.

This document is marketing material. For Investors in Sweden. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) over the long-term (5 years or more).
- The Fund invests at least 80% of its assets in equity securities (e.g. shares) and equity-related securities of companies domiciled in, or whose main business is in, global developed markets. The Fund may also invest in other equity securities and equity-related securities and other asset classes.
- The Investment Manager (IM) uses fundamental, company specific research to identify and select securities that, in its opinion, have the potential to produce attractive long-term growth. The Fund's portfolio is expected to be concentrated (i.e. a less diverse portfolio).

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
