October 2026

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Oct-2026. All other data as at 19-Nov-2026.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

The Fund's investment objective is to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) over the long-term (five or more consecutive years). The Fund will invest at least 70% of its total assets in other funds to gain indirect exposure globally to equity securities (i.e. shares), real estate investment trusts, fixed income (FI) securities (such as government and non-government bonds), alternative asset classes (i.e. assets that are not publicly traded or otherwise not readily transferable or realisable) and on a limited basis commodities. Commodity exposure is not expected to exceed 10%. The exposure to alternative assets will be achieved by the Fund investing in one or more long-term asset funds (LTAFs) that invest at least 60% of their assets in alternative assets such as private (i.e. unlisted) equity, private debt (i.e. loans), private real estate and/or private infrastructure. Up to 35% of the Fund's assets may be invested in LTAFs (in aggregate), but the Fund will target an allocation of approximately 20% (in aggregate) in LTAFs. The Fund applies two environmental, social and governance (ESG) commitments to its selection of other funds. First, at least 80% of the assets the Fund invests in government bond funds must be in funds that track benchmarks comprised of at least 50% of government bond issuers with an ESG government rating of BB or higher (as defined by MSCI or another data vendor). Second, at least 80% of the assets the Fund invests in other funds, other than funds used for EPM purposes, government bond funds and commodity funds, must be in funds that apply ESG screening criteria (as set out in the Fund's prospectus) within their investment processes.

RISK INDICATOR

Lower Risk
Potentially Lower Rewards

Higher Risk
Potentially Higher Rewards

1	2	3	**4**	5	6	7

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund may seek to exclude Funds which are not subject to ESG-related requirements. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
- Tax treatment of Fund: The tax treatment of this fund structure is so far untested which could lead to adverse tax consequences for the investor. Changes to the tax status of the Fund could lead to taxation being due.
- LTAFs invest in long term illiquid assets which may be subject to legal or other restrictions on transfer and it may not be possible to sell the asset for an extended period of time, or at all. The market prices for such assets tend to be volatile and may not be readily ascertainable, and the underlying LTAFs may not be able to realise what is perceived to be a fair value upon sale.

KEY FACTS

Asset Class : Multi Asset

Benchmark : Placeholder for prolonged perf holidays (No Benchmark applicable)

Fund Launch Date : 16-Mar-2026

Share Class Launch Date : 16-Mar-2026

Share Class Currency : GBP

GLOSSARY

Average Market Cap: The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

Modified Duration: A measure of price sensitivity of a bond to changes in interest rates. The Modified Duration of the fund is calculated as the average of the underlying bonds' modified duration values, adjusted to take account of their relative weight (size) within the fund.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.
