FUND OVERVIEW

- The Fund aims to provide a return on your investment over a 1-3 year period (generated through an increase to the value of the Fund's assets and/or income received from those assets) of 1.5% per annum (gross of fees) over the return of 3 Month Sterling Overnight Index Average Rate (SONIA), whilst incorporating the ESG commitments described below
- The Fund invests at least 50% of its assets in Sterling denominated fixed income (FI) securities (such as bonds) issued by companies and supranationals (e.g. the International Bank for Reconstruction and Development).
- The Fund may invest in a full range of available FI securities globally, including those that are non-Sterling denominated, investment grade or non-investment grade (i.e. securities which have a relatively low credit rating or which are unrated) and/or issued by governments and government agencies. Non-investment grade FI securities are expected to be limited to 10% of total assets. The Fund is expected to invest in FI securities that mature (i.e. the date on which the principal amount of a bond is to be repaid in full) within 5 years or less at the time of investment but may, in certain market conditions, invest in FI securities with a longer maturity.

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTMs based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

IMPORTANT INFORMATION:

The Ongoing Charge may be discounted depending on the size of the fund.
