October 2026

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Oct-2026. All other data as at 13-Nov-2026.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to achieve a total return on your investment through a combination of capital growth and income on the Fund's assets, in a manner consistent with "ESG" focused investing.
- The Fund has a flexible approach to asset allocation and will seek to gain exposure across a variety of asset classes. In order to achieve its objective the Fund will invest globally in equity securities (e.g. shares), equity-related securities, fixed income (FI) securities (e.g. bonds), FI-related securities, money market instruments (MMIs) (e.g. debt instruments with short-term maturities), asset backed securities (ABS) and mortgage-backed securities (MBS) (i.e. financial securities backed by cash flows from debt), deposits, cash and other funds (including exchange traded funds). The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) globally and may include investments with a relatively low credit rating or which are unrated. The Fund may take long, synthetic long and synthetic short exposures. The Fund may have exposure to both developed and emerging markets, however, no more than 20% of the Fund's assets shall be invested in securities issued by issuers established in emerging markets.
- In order to determine long and short exposures, the investment manager (IM) will use quantitative (i.e. mathematical or statistical) models to score and rank securities broadly according to three categories: fundamental information about the issuer of a security (e.g. financial reports), market sentiment towards the security and comparison of the its market price with its intrinsic value. The lowest-scoring securities are then further analysed by the IM for exclusion from the Fund's portfolio.

RISK INDICATOR

Lower Risk
Potentially Lower Rewards

Higher Risk
Potentially Higher Rewards

1	2	3	**4**	5	6	7

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of perceived risk.
- Asset backed securities and mortgage backed securities are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

KEY FACTS

Target 1 : ICE BofA 3-Month U.S. Treasury Bill Index

Asset Class : Fixed Income

Fund Launch Date : 14-Jun-2021

Share Class Launch Date : 20-Jan-2026

Share Class Currency : USD

Net Assets of Fund (M) : 135.81 USD

CALENDAR YEAR PERFORMANCE

This chart has been left intentionally blank as there is less than one year's performance data.

GROWTH OF HYPOTHETICAL 10,000 USD SINCE INCEPTION

This chart has been left intentionally blank as there is less than one year's performance data.

CUMULATIVE & ANNUALISED PERFORMANCE

This chart has been left intentionally blank as there is less than one year's performance data.

The figures shown relate to past performance. **Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past.** Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation. GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices. **Article 9:** Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTMs based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

IMPORTANT INFORMATION:

In the European Economic Area (EEA): this is Issued by BlackRock (Netherlands) B.V. is authorised and regulated by the Netherlands Authority for the Financial Markets. Registered office Amstelplein 1, 1096 HA, Amsterdam, Tel: 020 – 549 5200, Tel: 31-20-549-5200. Trade Register No. 17068311 For your protection telephone calls are usually recorded.
