Performance, Portfolio Breakdowns and Net Asset information as at: 30-Jun-2026. All other data as at 09-Jul-2026.
This document is marketing material. For Investors in the Denmark. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to achieve a positive absolute return through a combination of capital growth and income on your investment regardless of market conditions.
- The Fund seeks to gain at least 70% of any investment exposure to equity securities (e.g. shares) of companies domiciled in, or the main business of which is in, developed countries worldwide. This is achieved by investing at least 70% of its assets in equity securities, other equity-related securities and, when determined appropriate fixed income (FI) securities (such as bonds), money market instruments (MMIs) (i.e. debt securities with short-term maturities), deposits and cash.
- The equity-related securities include financial derivative instruments (FDIs) (i.e. contracts the value of which is based on one or more underlying assets). FDIs may be used to help achieve the Fund's investment objective and the Fund may, via FDIs, generate market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). At any one time, a substantial amount, or even all of the Fund's assets may be held as cash to provide cover for the exposure created by the use of FDIs or to assist in achieving its investment objective.

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

KEY FACTS

Comparator[†] : ICE BofA 3-MO US Treasury Bill (G001) (USD)

Asset Class : Equity

Fund Launch Date : 02-Jun-2014

Share Class Launch Date : 21-Jan-2026

Fund Base Currency : USD

Share Class Currency : CNH

Net Assets of Fund (M) : 897.60 USD
