FUND OVERVIEW

- The investment strategy of the Fund is deemed to be capacity constrained. Buying Shares in the Fund (or converting shares from another fund) is capped at a daily limit of EUR 10 million (or the equivalent thereof) per investor until further notice except at the discretion of the Directors of the Fund (you can still sell your Shares daily without limit).
- The Fund aims to provide long term capital growth (including income) on your investment through the use of an extension strategy, meaning that, in addition to having up to 100% of the Fund's assets exposed to equity securities (e.g. shares) via long positions and/or synthetic long positions, the intention is to enter into synthetic short positions, to achieve additional investment exposure as further disclosed in the prospectus.
- The Fund seeks to gain at least 70% of any investment exposure to equity securities and other equity-related (E-R) securities, of companies domiciled in, or whose main business is in, Europe (including former Soviet Union countries) and, fixed income (FI) securities (such as bonds), money market instruments (MMIs) (i.e. debt securities with short-term maturities), deposits and cash. The E-R securities include financial derivative instruments (FDIs) (i.e. investments whose prices are based on one or more underlying assets). FDIs may be used to help achieve the Fund's investment objective and.the IA intends to generate market leverage via FDIs (i.e. where the Fund gains market exposure in excess of the value of its assets).

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
