BlackRock Strategic Funds

Performance, Portfolio Breakdowns and Net Assets information as at: 31-Aug-2026. All other data as at 10-Sep-2026.
This document is marketing material. For Investors in Luxembourg. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to achieve positive absolute returns through a combination of capital growth and income on your investment regardless of market conditions.
- The Fund seeks to gain at least 70% of its investment exposure to equity securities (e.g. shares) and equity-related securities of companies (including derivatives), or giving exposure to securities of companies whose predominant economic activity is in healthcare, pharmaceuticals, medical technology and supplies and the development of biotechnology. There are no geographical restrictions on the Fund's investments., which may be based in developed or emerging markets. In selecting the Fund's investments, the investment adviser (IA) will use fundamental analysis, focusing on a variety of different strategies.
- The Fund will invest at least 70% of its assets in equity securities, other equity-related securities and when determined appropriate, fixed-income securities (such as bonds), money market instruments (MMIs) (i.e. debt securities with short term maturities) deposits and cash.

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- 'Absolute Return' funds may not move in line with market trends or fully benefit from a positive market environment. Emerging markets are generally more sensitive to economic and political conditions than developed markets.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
