FUND OVERVIEW

The fund aims to achieve a total return, through a combination of capital growth and income on the Fund's assets, which reflects the return of the STOXX Europe Targeted Defence Index, the Fund's benchmark index ("Index").

KEY BENEFITS

- 1. The Index is a free-float adjusted market capitalisation weighted index that comprises European equity securities of companies included in the STOXX Europe AC All Cap Index (the "Parent Index") which receive revenue from business activities relating to military equipment and services.
- 2. The fund seeks to exclude companies classified as non-compliant with the United Nations Global Compact (UNGC) Principles and excludes issuers deemed by the index provider to be involved in controversial weapons.
- 3. The Index selects companies from the Parent Index that derive a minimum percentage of revenue from "Military Equipment and Services," assigns them to High, Medium, or Low Revenue Tiers based on this revenue, and allocates a minimum proportion to each tier while weighting the Index (the STOXX Europe Targeted Defence Index) to favor companies in the High and Medium Revenue Tiers according to the index methodology.

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

GEOGRAPHIC BREAKDOWN (%)

Geographic exposure relates principally to the domicile of the issuers of the securities held in the product, added together and then expressed as a percentage of the product's total holdings. However, in some instances it can reflect the location where the issuer of the securities carries out much of their business. Bonds are included in US bond indices when the securities are denominated in U.S. dollars regardless of the domicile of the issuer.
