CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
