FUND OVERVIEW

iShares MSCI EMU CHF Hedged UCITS ETF (Acc) is an exchange traded fund (ETF) that aims to track the performance of the MSCI EMU 100% hedged to CHF Index as closely as possible. The ETF invests in physical index securities and incorporates a monthly currency hedge, using one month foreign exchange forward contracts to reduce exposure to the impact of currency fluctuations between the base currency of the fund (Swiss Francs) and the currency of the constituent securities in the index (Euro). The MSCI EMU 100% hedged to CHF Index offers exposure to equity securities from countries in Europe that form part of the Economic and Monetary Union (EMU) which comply with MSCI's size, liquidity and free float criteria. iShares ETFs are funds managed by BlackRock. They are transparent, cost-efficient, liquid vehicles that trade on stock exchanges like normal securities. iShares ETFs offer flexible and easy access to a wide range of markets and asset classes.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Currency hedging may not completely eliminate currency risk in the Fund, and may affect the performance of the Fund.
