PRODUCT STRATEGY

The ETP securities aim to provide investment exposure to Bitcoin. Each ETP security corresponds to a specific amount of Bitcoin, known as the cryptoasset entitlement (the "Cryptoasset Entitlement"). The ETP is compliant with Shariah investment principles.

KEY BENEFITS

1. The ETP aims to provide investment exposure to Bitcoin and is traded on stock exchanges.
2. The ETP is backed by Bitcoin held by Coinbase Luxembourg S.A., the Issuer's Custodian, in cold storage (offline).
3. The ETP is denominated in US Dollars.
4. Shariah investment principles compliant.

Capital at risk. Don't invest unless you're prepared to lose all the money you invest. This is a high-risk investment and you should not expect to be protected if something goes wrong. The ETP is intended for retail investors (i) with specific knowledge and/or experience of investing in similar products and with a solid understanding of the significant risks associated with cryptoassets including its associated volatility; (ii) seeking a product offering exposure to the performance of the underlying asset(s); and (iii) that have the ability to bear losses up to the amount they have invested in the ETP. The ETP will not be suitable for retail investors that are unable to sustain a significant or complete loss of their investment.

KEY RISKS:

- Cryptoasset platforms may be at risk of being hacked or exploited and may involve significant risks due to a compromise of private keys, which may result in losses. Market disruption and government intervention can make digital assets illegal.
- The price of bitcoin fluctuates daily and the value of bitcoin is driven by various factors including market liquidity. Cryptoassets can be subject to high pricing volatility and substantial fluctuations.
- The value of the ETP securities is closely tied to acceptance, industry developments, and governance changes, making them susceptible to market sentiment. Digital assets represent a new and rapidly evolving industry, and the value of the ETP securities depends on their acceptance.
- The market value and price of the ETP securities does not exclusively depend on the prevailing price of bitcoin and changes in the prevailing price of bitcoin may not necessarily result in a comparable change in the market value of the ETP securities. The performance of the ETP securities may differ significantly from direct holdings of bitcoin as a result of the negative effects of fees and charge. The return on the ETP securities may not reflect the return if you had actually owned bitcoin and held such investment for a similar period.
