FUND OVERVIEW

The Fund seeks to track the performance of an index composed of a sub-set of MSCI Europe stocks that capture undervalued stocks relative to their fundamentals.

KEY BENEFITS

1. Exposure to a sub-set of MSCI Europe stocks that capture undervalued stocks relative to their fundamentals
2. Direct investment in regional equities which are undervalued relative to their fundamentals
3. Regional exposure with a focus on undervalued stocks

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Index Methodology Risk: Although the benchmark index aims to seek exposure to securities with high quality characteristics from within the Parent Index, there is no guarantee that this objective will be achieved.
- Factor Focus Risk: Indices with a factor focus are less diversified than their parent index because they have predominant exposure to a single factor rather than the multiple factor exposure of most indices. Therefore they will be more exposed to factor related market movements. Investors should consider this Fund as part of a broader investment strategy.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

GEOGRAPHIC BREAKDOWN (%)

Fund

Geographic exposure relates principally to the domicile of the issuers of the securities held in the product, added together and then expressed as a percentage of the product's total holdings. However, in some instances it can reflect the location where the issuer of the securities carries out much of their business. Bonds are included in US bond indices when the securities are denominated in U.S. dollars regardless of the domicile of the issuer.
