August 2026

Performance, Portfolio Breakdowns and Net Assets information as at: 31-Aug-2026. All other data as at 07-Sep-2026.

This document is marketing material. For Investors in Luxembourg. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

The Fund seeks to track the performance of an index composed of investment-grade mortgage-backed pass-through securities[1] issued by U.S. government agencies

[1]Pass-through securities deliver both the interest and principal repayments directly to the MBS owner.

KEY BENEFITS

1. Exposure to a broad range of U.S. mortgage-backed securities issued by government sponsored enterprises such as Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC).
2. Diversified access to mortgage-backed securities issued by U.S. government agencies in a single share class
3. Incorporate exposure to the income-generating characteristics of mortgage-backed securities

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

1	2	**3**	4	5	6	7

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Asset backed securities and mortgage backed securities are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

PRODUCT INFORMATION

ISIN : IE00BZ6V7883

Share Class Launch Date : 23-May-2016

Share Class Currency : USD

Total Expense Ratio : 0,28%

Use of Income : Distributing

Net Assets of Share Class (M) : 787,28 USD

KEY FACTS

Asset Class : Fixed Income

Benchmark : Bloomberg U.S. MBS Index

Fund Launch Date : 23-May-2016

Distribution Frequency : Semi-Annual

Net Assets of Fund (M) : 3.911,03 USD

SFDR Classification : Other

Domicile : Ireland

Methodology : Sampled

Issuing Company : iShares IV plc

Product Structure : Physical

PORTFOLIO CHARACTERISTICS

Average Weighted Maturity : 7,33 yrs

Effective Duration : 5,67 yrs

Standard Deviation (3y) : 6,43%

3y Beta : 1,00

12m Trailing Yield : 3,75%

Yield to Worst : 5,27

Number of Holdings : 599

The figures shown relate to past performance. **Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past** Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. Performance data is based on the net asset value (NAV) of the ETF which may not be the same as the market price of the ETF. Individual shareholders may realize returns that are different to the NAV performance. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation. Allocations are subject to change. **Source:** BlackRock

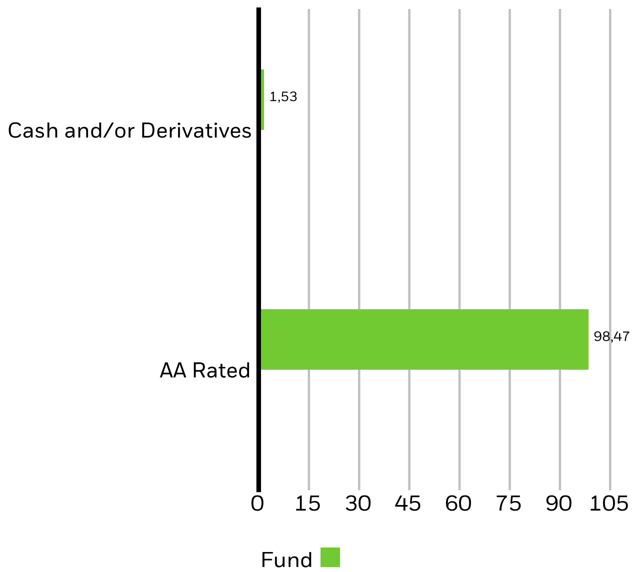
CREDIT RATINGS (%)



Credit quality ratings on underlying securities of the fund are received from S&P, Moody's and Fitch and converted to the equivalent S&P major rating category. This breakdown is provided by BlackRock and takes the median rating of the three agencies when all three agencies rate a security the lower of the two ratings if only two agencies rate a security and one rating if that is all that is provided. Unrated securities do not necessarily indicate low quality. Below investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices. **Article 9:** Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTMs based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

IMPORTANT INFORMATION:
