October 2026

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Oct-2026. All other data as at 12-Nov-2026.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The aim of the Fund is to provide a return on investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the iBoxx MSCI ESG GBP Non-Gilts Index (the "Index").
- The pre-defined ESG screens set by the index provider seek to limit and/or exclude from the Index corporate issuers within the iBoxx GBP Non-Gilts Index which are determined by the index provider (often by reference to specific revenue thresholds or to any connection to an activity regardless of any revenue received) as having exposure to, or other ties with, certain activities and involvement in relevant ESG controversies (as further described in the Fund's prospectus).
- The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so may take into consideration the Index. The Fund invests in fixed income securities (such as bonds) that make up the Index and, at the time of purchase, comply with the credit rating requirements of the Index. The Fund may at times invest indirectly via other fixed income-related investments (i.e. other investments whose value is related to debt) giving exposure to such fixed income securities, or in other fixed income securities not in the Index.

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

1	2	3	**4**	5	6	7

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.

Data Coverage %[ii] is available input data for rating calculation at the Pillar level

Analyst Driven %[i] is the analyst input into the overall rating assignment, including direct analyst coverage and inheritance of an analyst-rated pillar

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTMs based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

IMPORTANT INFORMATION:

** The Morningstar Medalist RatingTM is the summary expression of Morningstar's forward-looking analysis of investment strategies using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Analysts assign three pillar ratings (People, Parent and Process) based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. For more detailed information about these ratings and methodology, please go to global.morningstar.com/managerdisclosures. The ratings are not statements of fact, nor credit or risk ratings. The rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks which may cause expectations not to occur or to differ from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions, (iv) involve the risk that the return target will not be met due to unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange and tax rates, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product.
