BlackRock Fixed Income Dublin Funds Plc

Performance, Portfolio Breakdowns and Net Asset information as at: 31-May-2026. All other data as at 15-Jun-2026.

This document is marketing material. For Investors in the Norway. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to achieve a total return on your investment, through a combination of capital growth and income, which reflects the return of the FTSE EMU Government Bond 0-5 Years Index, the Fund's benchmark index (Index).
- The Fund invests predominantly in the fixed income (FI) securities (such as bonds) that make up the Index (which normally comprises government bonds in the European Union). At the time of purchase, the FI securities will be investment grade rated (i.e. meet a specified level of credit worthiness). If the credit rating of a FI security is downgraded, the Fund may continue to hold this, until it is practicable to sell the position.
- The Index measures the performance of bonds issued by governments and includes countries in the Index. The Index includes FI securities with a maturity (i.e. the time until they become due for repayment) which is less than 5 years and which pay a fixed rate of interest.

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices.

Article 9: Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTM's based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.
