FUND OVERVIEW

The Fund seeks to track the performance of an index composed of U.S. Health Sector companies as defined by the Global Industry Classification Standard (GICS)

KEY BENEFITS

- 1. Diversified exposure to U.S. companies
- 2. Direct investment in leading U.S. companies
- 3. Single country exposure with a focus on stocks within a specific sector

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
