FUND OVERVIEW

The Fund aims to achieve a return on your investment through a combination of capital growth and income by tracking the performance of the STOXX UK Foreign Focus Index.

KEY BENEFITS

1. The Index excludes companies that generate 50% or more of their revenues domestically within the STOXX UK All Cap Index region. The remaining companies form the Index. At each rebalance, companies newly entering the investment universe are subject to this 50% exclusion threshold, while companies already in the universe but not included in the Index are only added if their foreign revenue exposure exceeds 55%.
2. The Index is free float-adjusted and market capitalisation weighted and is rebalanced on a semi-annual basis.
3. The Fund seeks to replicate the Index by directly holding the equity securities that make up the Index in similar proportions

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

The figures shown relate to past performance. **Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past** Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. Performance data is based on the net asset value (NAV) of the ETF which may not be the same as the market price of the ETF. Individual shareholders may realize returns that are different to the NAV performance. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.
