Performance, Portfolio Breakdowns and Net Assets information as at: 31-Aug-2026. All other data as at 12-Sep-2026.
This document is marketing material. For Investors in Luxembourg. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to outperform the MSCI EM (Emerging Markets) ESG ex Select Business Involvement Screens Index (the Index) over a rolling three year period while seeking to minimise risks associated with certain environmental, social and governance (ESG) themes and considerations.
- The Fund invests at least 80% of its assets in the equity securities (e.g. shares) of companies incorporated in, listed in, or the main business of which is in emerging markets (EM) and instruments related thereto, including financial derivative instruments (FDIs) (i.e. investments whose prices are based on one or more underlying assets). The Fund may also invest in other equities and equity-related securities and/or instruments, deposits and cash.
- The Fund may also invest in equity and equity related securities of real estate companies and in Real Estate Investment Trusts and, for liquidity and other ancillary purposes, it may also invest in money market instruments (i.e. debt securities with short term maturities).

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
