Performance, Portfolio Breakdowns and Net Asset information as at: 31-May-2026. All other data as at 11-Jun-2026.

This document is marketing material. For Investors in the Norway. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to outperform the BBG Global High Yield Corporate 100% EUR Hedged Index (Benchmark Index) over a rolling three year period.
- The Fund invests at least 80% of its assets in fixed income (FI) securities (such as bonds, notes, debentures) issued by corporate or government-related issuers (including governments, foreign agencies, supranational bodies and local authorities) which are high yield (i.e. below-investment grade or unrated) and instruments related thereto, including financial derivative instruments (FDI) (i.e. investments whose prices are based on one or more underlying assets). It may invest up to 25% of its assets in emerging markets and it may invest in investment grade FI securities (i.e. securities that meet a specified level of credit worthiness) and instruments related thereto, deposits and cash.
- The Fund will invest in sustainable investments and it's total assets will be invested in accordance with its exclusionary policy. For further details regarding the exclusionary policy (and the applicable levels) please refer to the prospectus supplement. The Fund may obtain indirect exposure (e.g. through certain FDIs) to securities considered not to satisfy the exclusionary criteria.

RISK INDICATOR

Lower Risk Potentially Lower Rewards

Higher Risk Potentially Higher Rewards

1	**2**	3	4	5	6	7

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Asset backed securities and mortgage backed securities are subject to the same risks described for fixed income securities. These instruments may be subject to 'Liquidity Risk', have high levels of borrowing and may not fully reflect the value of underlying assets.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

KEY FACTS

Target[†1] : BBG Global High Yield Corporate 100% EUR Hedged Index

Asset Class : Fixed Income

Fund Launch Date : 23-Apr-2024

Share Class Launch Date : 23-Apr-2024

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics provide investors with specific non-traditional metrics. Alongside other metrics and information, these enable investors to evaluate funds on certain environmental, social and governance characteristics. Sustainability Characteristics do not provide an indication of current or future performance nor do they represent the potential risk and reward profile of a fund. They are provided for transparency and for information purposes only. Sustainability Characteristics should not be considered solely or in isolation, but instead are one type of information that investors may wish to consider when assessing a fund.

The metrics are not indicative of how or whether ESG factors will be integrated into a fund. **Unless otherwise stated in fund documentation and included within a fund's investment objective, the metrics do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund.** For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG % Coverage	78.29%	**MSCI ESG Fund Rating (AAA-CCC)**	BBB
MSCI ESG Quality Score - Peer Percentile	11.34%	**MSCI ESG Quality Score (0-10)**	5.51
Funds in Peer Group	97	**Fund Lipper Global Classification**	Bond Global High Yield EUR
MSCI Weighted Average Carbon Intensity % Coverage	72.84%	**MSCI Weighted Average Carbon Intensity (Tons CO2E/$M SALES)**	80.66

All data is from MSCI ESG Fund Ratings as of **22-May-2026**, based on holdings as of **31-Jan-2026**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and money market funds) of the fund's gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities.

GLOSSARY

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

MSCI Weighted Average Carbon Intensity (Tons CO2E/$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per $1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices. **Article 9:** Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Yield to Maturity: Yield to Maturity (YTM) is the discount rate that equates the present value of bond's cash flows with its market price (including accrued interest). The fund YTM is the weighted average of fund's individual bond holding YTMs based upon Net Asset Value ('NAV'). The measure does not include fees and expenses. For callable bonds, YTM is the Yield-to-Worst.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score, and MSCI ESG Quality Score - Peer Percentile metrics are displayed for funds with at least 65% coverage.

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.

Effective Duration: Effective duration is a measure of a fund's interest-rate sensitivity. Put simply, the longer a fund's duration, the more sensitive the fund is to shifts in interest rates. So a fund with a duration of 10 years is twice as volatile as a fund with a five-year duration.
