FUND OVERVIEW

The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the STOXX Global Space Satellites and Drones Index, the Fund's benchmark index ("Index").

KEY BENEFITS

- 1. Exposure to companies in the global space, satellite and drone ecosystem.
- 2. Access to a broad investible universe spanning large, mid and small companies across developed and emerging markets.
- 3. Eligible companies must satisfy the minimum revenue threshold requirements across three core sub-themes: Space Equipment, Diversified Aerospace and Drones.

RISK INDICATOR

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
