FUND OVERVIEW

The investment objective of the Fund is to seek to achieve long-term capital growth.

KEY BENEFITS

- 1. Invests across global developed markets in themes and emerging trends shaping equity markets.
- 2. The team use a proprietary systematic thematic rotation model leveraging data, AI and Large Language Models to assess themes and companies to invest in.
- 3. Follows a disciplined portfolio construction process to identify and rotate across themes, and ensure proactive risk management.

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund’s investments compared to a fund without such screening.
- The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
